Methodist church last Sunday morning, and took for his text, 2 cor. 10: 5, the subject being "Thought." The speaker said thought was the prerogation of learned men; the inmost as well as the outmost of man's being. Action springs from thought-when we imagine or dream we indulge in thought, which is the greatest thing in man. Goodness is the result of thought; every action of God the fruit of thought; character arises from and it sufficeth us." Mr. Marsh read the thought, and is the result of thought and action combined, but is our thoughts crystallized? Every man requires a special thought along the special profession he practices. The more powerful thought is, the more necessary it is to be controlled. We should bring our thoughts into cap-tivity to the obedience of Christ, by

becoming Christians and giving allegiance to Christ, and submitting our wills to Him. .....Rev. Dr. Potts, secretary of the educational department, occupied the pulpit in the evening, taking for his text Col. 2: 3, and Isa. 33: 6, being a general exposition of the great results of wisdom and knowledge. For the soul to be without knowledge is not good. To neglect the obtaining of religion, knowledge and education would result in impoverishment. How is wisdom and knowledge related to Jesus Christ! A Big Lumber Firm Stops Cutting. A report reached town last Monday that the Gilmour Co. operating in the townships of Peck and Hunter, bordering on the Algonquin Park game reserve, have decided to slop cutting on their limits for this season and that 400 men will lose their winter's employment in consequence. In conversation with a well-known lumberman, he said the ramer was no doubt correct, as 50 men had arrived in town from that company's limits that morning, and he was in a position to know that the company had a huge stock of lumber on hand at Tranton for which they could not obtain a suitable offer owing to the low prices prevailing. He did not think that the company contemplated a complete cessation of work, but the fact that they have already over 100,000 logs ready for the dump owing to the early coming of the snow has prompted them to stop cutting. The shut-down will mean a serious loss to the farmers of the north country.
