beginning of a new quarter

We are pleased to announce, that with this issue, the MIRROR has reached its second quarter. As for the past three months, the MIRROR has spoken for itself, snd we think we are safe in saving that it has ontrivalled any of its predecessors and compares very favorable with the majority of local papers. Since starting the MIRROR some months ago, we have been successful in working up a subscription list which has exceeded any other journal ever published in Omemce. and as we have made no personal canvas of the country around, we are confident in getting a list well up in the thansands before the year rolls by. We will leave Give me a call when in need of no step unturned in making great im provements during the coming year, and will encourage every new enterprise that will make our town more thriving. Success has crowned our efforts since starting and it will be very gratifying tous if the coming quarter is as successful as the preceding one. We might add that a good number of our subscribers have given the Minnon a three months trial and we hope that we shall soon hear from them that we shall send the Mirror for the remainder of the year and that they will forward their remittances at an early date. We will send the MIRROR for the remainder Now is the time for to bring in your of 1894 up to the 1st of January, 1895. for 75 cents, so bring along your sub-All work done in the best of style, with scriptions and we will send the paper to any address. Wheat continues to remain at lowwater mark, and nothing but a European war, which everybody would profess to deplore, can restore prices, although the world's available supply is smaller today than it was three months ago. On the 1st of December last the available wheat was 190,386,000 bushels, whereas the figures for March 1st, 1894, are 184,-116,000 bushels. The decrease is however, too small to have any material efir, feet upon the market. Over supply in wheat production is an evil which is cured by slow degrees.

In reply to a correspondent who asks whether the year 1900 is a leap year, the following facts, which explain why it is not, will be of general interest. The astronomers of the time of Julius Cæsar, I have just received the first lot | 45 B.C., fixed the solar year at 365 days, of McLaughlin's Worlds Fair Re- 6 hours, which was about 11 minutes ward Flour. This flour received too much, for it consists really of 365 the Gold Medal and the first prize days, 5 hours, 38 minutes, and 49.62 seconds. In the year 1582 the error bad amounted to about 12 days, and with a ed for the last three years in Dr. Turner's All goods, delivered to any par view to rectification, Pope Gregory XIII. drug store, left for Toronto last Monday, ordered that October 5th of that year to take charge of a situation there. should be called the 15th. Lord Roseberry is credited with having made a remarkable aunouncement when he was leaving Oxford. He stated it as his intention to marry the richest heiress in England, to become Prime Minister, and to win the Derby, and circumstances now seem to point to the probability of his being able to accomplish even more. By marrying Miss Hannah Rothschild, who had a dowry of £1,000,000, he accomplished the first part of his programme; he has lately achieved the second; and his horse Ladas stands first favorite for the Derby at odds of eleven to four. Moreover, as if they were listening to the funeral there is a substantial rumor that the ond wife.

The population of the United States is about thirteen times as great as that of Canada; and in proportion to those in the Dominion they they would have mardered only 169. A simple calculation shows that crimes of this class are proportionately forty times as numerous in the United States as in our own country.

In the supreme court on Wednesday, 28th ult.. Solicitor General Curran moved the test case as to the power of the Ontario Legislative to pass a Prohibition Act, which was, a few days ago, placed at the head of the Ontario list at the May sitting of the court, be given precedence over all other cases at that sitting. He explained that this was a case which interested not only Ontario, but all the other provinces, some, if not all, of which would be represented by their Attorney-General, and it was of importance that the case should be heard as speedily as possible The mo tion was granted and the case will therefore be the first one argued on the May sitting of the courts.

In the matter of marriages Methodist ministers' wives get the most pin money at least Methodist ministers marry the most people in Ontario. Whether girls number of our subscribers, who have about to take the plunge prefer a Methodist ceremony because that ugly word trial, this coming week, as we are "obey" is omitted is matter for speculagreatly in need of money to make tion. Probably the cute parsons had that in view when they climinated it from the formula. However that may be the records of 1892 show that the proportion ists was one in every 2.82; Presbyterians, one in 4.90; Episcopalians, one in has decided not to publish her memoirs 6.2; Roman Catholics, one in 6.9; Baptists, one in 17.6. Although the Upper Canada Bible So-

ciety was holding its annual meeting in the English Church Sunday school room on Thursday night, there was a fair sized audience in the town hall to hear the Millbrook amateur minstrels. The concert lacked that enthusiasm and applause that generally characterizes a minstrel concert, but which was due to the fact that the audience did not know how to appreciate the wit which was rendered. We hope, 'ere this time, they have seen into the jokes. Whether the then rumored resignation of Gladstone will be at the Bradburn House, Omemee, on the 1st Monday and 3rd Wednesday of every month or the present financial depression made the audience feel down hearted, we do not kno , but when the best of jokes were given they, the andience, looked sermon of the late Sir John A.
