One of my miners, who noticed my distress, told me that if I would take an Indian cure which he knew of, he would guarantee relief; as he had known it to cure, and never failed in any one case. He further stated that miners of the Cariboo District-situated in the mountains four hundred miles from any railway-had used it for the past forty years. After taking the medicine conscientiously, for four weeks, I commenced to notice a marked improvement in my general health, and inside of six weeks' time I had not a twinge of rheumatism in any part of my body, nor have I had a symptom since-and this after trying seven celebrated mineral springs, and nine medical men, at the expense of fifteen hundred dollars with no benefit whatever.
