Man is a millionaire many times over in the possession of blood cells. Woman is not quite so rich, for scientists have proven that the normal number of red blood cells in adult men is five million; in women four and a half million, to the square millimeter. The normal cell is not absolutely round in health, but, in disease, becomes extremely irregular in shape. Every one can be in perfect health and possess the millions of rich red blood corpuscles if they only know how to go about it. Dr. R. V Pierce, consulting physician to the Invalids' Hotel and Surgical Institute, at Buffalo, N. Y., advises every man and woman to prepare for a long life by observing nature's laws. In the first place, if your digestion is faulty, and the food you eat is not taken up by the blood and assimilated properly, you need a tonic and digestive corrector, something that will increase the red blood corpuscles; he believes in going about this in nature's own way. Years ago, in his active practice, he found that an alterative extract of certain herbs and roots, put up without the use of alcohol, would put the liver, lungs and heart into fuller and more complete action. This medicine he called Dr. Pierce's Golden Medical Discovery. By assimilating the food eaten, it nourishes the blood, and, instead of the ill-shaped corpuscles, the person's blood takes on a rich red color and the corpuscles are more nearly round. Nervousness is only the cry of the starved nerves for food, and when the nerves are fed on rich red blood the person loses those irritable feelings, sleeps well at night

Dr. Pierce's Pleasant Pellets cleanse the bowels and stimulate the sluggish liver.
