**EDITORIAL NOTES.**

Monday's rain did no damage to crops in Manitoba.

"Has Tariff Reform hurt American industries?"—Toronto Globe. "Wall to put it in figures, we should say about \$1,000,000,000."—Chicago Inter-Ocean.

Mr. Israel Tarte has been sent to Westmoreland, N. B., to assist in winning the county over to the side of purity in politics and honesty in government.

The charred bones of a boy have been discovered in a house at Irvington, a suburb of Indianapolis, once occupied by H. H. Holmes. It is believed the remains are those of little Howard Pitzel.

Tarte is said, in a Westmoreland despatch to one of the Liberal papers, "to have handled the boddlers without gloves." This must be a typographical error. The r and the s in the word "boddlers" no doubt slipped in by accident.

As expected, the majority of 800 in Westmoreland is represented as a Tory defeat. If the Conservatives could have a disaster of this kind in every constituency they could accept the reverse with equanimity, and the entire country could consider itself safe.

Mr. Holmes will hear of the destruction of his Chicago castle with feelings of pleasure rather than regret, as it will prevent the finding of any more of his victims there. It is not improbable, however, that another castle exists somewhere in which the remains of a few dozen more unfortunates have been secreted.

When our contemporary, the Globe, undertakes to make the amende honorable it does not stop half way. Having found that its question "Has the N.P. made you rich?" was beginning to rankle and induce inflammation in the minds of its readers, it promptly had the paragraph killed. In yesterday's issue it adds to this act of reparation a very full and handsome apology. A gentleman can do no more.

That it is an ill wind that blows nobody any good has been demonstrated by the stimulus that has been supplied to certain branches of manufacture in Japan by the recent war. The very playthings in Japan have now a warlike character. The Japan Mail says that even the game of chess is transformed, the figures being painted clay images representing Japanese and Chinese soldiers of various ranks. A long line of mechanical toys, either of tin or wood, by turning a crank or by simple clockwork, are made to show Chinese combatants in a large variety of unenviable positions, sometimes pursued by Japanese troopers, who make terrific sweeps with sword or lance in a stately see-saw; or prisoners caught by their queues, and trying to avoid the rising and falling blades. Clay figures representing Chinamen pleading for mercy are used as paper weights or desk ornaments.

Yet another cure for consumption is announced. This time it is a Genese professor, Dr. Maragliano, who thinks he has mastered the terrible disease, and his method of treatment is by introducing serum, drawn from "dogs, donkeys, or horses," into the patient's system. If the disease is taken at an early stage, he says, brilliant successes may be obtained, and he points out that of the 83 consumptive people whom he has treated, 61 derived real benefit. But there is a difference between a real benefit and complete recovery. This Dr. Maragliano seems ready to acknowledge, for on the point whether his results can be regarded as "veritable cures" he is uncertain. A tuberculous patient, he says, can never be considered as completely cured, because the disease may break out afresh after years have elapsed. What is wanted is a remedy that will prevent this recurrence, and until Dr. Maragliano proves his treatment to be thoroughly efficient in this respect, an open mind towards his discovery may be permitted.

**COMMUNICATION.**

To the Editor of the Mirror.  
DEAR SIR:  
In your last issue I observe an article from "An Old Journalist," in which he apparently hurls a dart at me, or better he digs a pit for me to fall into, but has fallen therein himself. If he had written directly to me, it would have been excusable, but he did not do such. He believes people should always use their proper name, and not write anonymously. Well, if he were an old journalist, his statement should be of value, but why not practice what he preaches? Why does he not come out like a man and sign his proper name, or is he also nameless? My letter was perhaps sarcastic, but I considered no language too strong to use in condemning a man guilty of such an offence as that of Mr. Sherwood. His letter was untrue and so is his last. Thanking you, Mr. Ed., for space, I remain,  
Yours truly,  
YOUNG CANADA.

O.A.C., GUELPH, ONT.,  
Aug. 23rd, 1895.

To Editor Mirror:

DEAR SIR,—  
I have made arrangements with Mr. H. J. Hill, Director of the Toronto Industrial Exhibition, to temporarily move my office from the College building to the Fair Grounds, Toronto.

I will occupy from September 2nd to 14th, inclusive, a large tent situated East of the Cattle Ring, and just between and in front of the Horse and Cattle Sheds.  
Mr. J. W. Wheaton, B. A., Second week of the Show.

One or more of the staff of the Ontario Agricultural College will be present during the greater part of the time.

Officers and Members of all Farmers' Institutes, of Live Stock, Dairy, Poultry, Fruit Growers', and kindred Associations, are cordially invited to make this Tent their headquarters during the time of the Exhibition.

I will be in attendance in aforesaid Tent from 8 a.m., to 4 p.m., each day of the Show, and will be pleased to meet Institute Officers and Members, also Members of other kindred Associations, to discuss with them the best means to advance the work of the Farmers' Institute in their respective Districts. You are respectfully invited to call on me; I desire your hearty and active co-operation in advancing this important work.

During the second week of the Show, the following meetings will be held in the aforesaid Tent:  
SHEEP BREEDERS CONVENE.  
On Tuesday, Sept. 10th, at 1 p.m., the Officers and Directors of the Dominion Sheep Breeders' Association will convene to consider the Report of the Committee appointed at the last meeting of the Association to consolidate the by-laws and re-draw the constitution of each Association. As 2.30 p.m., the members of this Association. At 2.30 p.m., the members of this Association will convene to consider the Report of the Officers and Directors of said constitution and by-laws; and to re-consider their action at the last meeting in appointing delegates to meet the Honorable Minister of Agriculture to consider the Record question. The Minister informs me, that but two delegates are required from each Association. At our last meeting we elected seven, therefore, a new election must be held.

SWINE BREEDERS CONVENE.  
On Tuesday, Sept. 10th, at 7 p.m., the Officers and Directors of the Dominion Swine Breeders' Association will convene to consider a similar report; and at 8 p.m., the members of this Association will convene to re-elect a Record Committee to meet the Minister as in the case of the Dominion Sheep Breeders' Association; and to consider the report of the Officers and Directors regarding the revision of the constitution and by-laws.

CATTLE BREEDERS CONVENE.  
Wednesday, Sept. 11th, at 7 p.m., the members of the Dominion Cattle Breeders' Association will convene to consider the report of the Committee appointed to draft a new constitution and by-laws. All interested parties are invited to attend these meetings, whether members of an Association or not.  
F. W. HODSON,  
Superintendent of Farmers' Institutes and Secretary of Associations.

**Fowler's Corners.**  
Special to the Mirror.  
Mrs. John Byrne, of Chicago, is visiting her sisters, Mrs. W. and D. Tully's.

Mrs. A. Braden, of Bobcaygeon, daughter of Charles Fairbairn, M. P., is visiting this week among her friends and relatives in Emily.

Mr. John McCarrell, jr., left his mother to Peterboro where she took the train for Norwood to visit her daughter, Mrs. McGreggor.

Bethel congregation was favoured on Sunday evening last with a

duet from Miss Annie Faux and Miss Ida Switzer. The selection was well rendered and as it was the first time for them to sing together we hope it will not be the last. We noticed among the congregation on Sunday evening, one of Omemee's citizens, Mr. John Williams.

**MILLBROOK.**  
Special to the Mirror:  
All our campers have returned from the lake and seem to have spent an enjoyable time.  
A number of our young farmers left last week for Manitoba to help take off the large harvest.

Mr. Arthur Parkin, of Lindsay, was visiting with his brother, Mr. Howard Parkin and returned home Tuesday.  
Mr. Herbert Armstrong has left for an extended tour on his wheel going as far as Toronto by the road, and then taking the boat to Queenstown, and proceeding from there to Buffalo. The run is a large one and we wish him success.

Our electric light plant made its first run on Monday night. The first electric light scene in Millbrook was switched on by Master William Parkin, the two year old son of the genial proprietor of the plant, Mr. S. G. Parkin. The light was of the first water and the bright light shines in the windows like small chunks of sunlight, altogether the light is really beautiful and the plant and the arrangements reflect a great deal of credit on the installers. The way the work was done from the first showed that everyone concerned knew their part of the work and as a result we have the finest little plant of its size to be found in Canada. Messrs. Howard and Alf Parkins did all the wiring of the lamps, while Messrs. Fred and S. G. Parkin superintended putting in the plant and we feel we must congratulate them on their grand success. They are all good hearted aimable fellows and we hope that they will meet with success wherever they are called to show their handiwork. We understand from the company that they have a plant to put in at Brighton similar to this one, and we think that the Omemeeites should find no difficulty in getting electric light there.

**Facts for Farmers.**  
Amongst the varieties of pears the Lawrence holds a high place. It is not so subject to blight as some kinds and is late, giving a crop after the bulk of the pears have been marketed.  
Well cured corn fodder is more fully digested than timothy hay, and is nutritious and palatable. It is roasted, however, if left in the fields to be exposed to rains, winds and frosts during the winter. Though the price of dairy products is low, it is paid twelve times a year, enabling the farmer to have cash for his purchases throughout the year, thereby getting the benefit of cash prices. This is one great factor of dairying.

Experiments show that a grain of wheat reproduces forty-fold. Every pound should bring forty. It therefore follows that much of our seed wheat is wasted when we sow 1 1/2 bushels an acre and get from ten to twenty.  
The Virginia creeper is an excellent vine for covering fences and outbuildings. The plants should be cut down to the ground when planted, that the young shoots may cling as they grow. In the fall the foliage becomes a brilliant red and yellow.

Excepting goldenrod, milkweed and ragweed, all the rest of our weeds have been imported. These foreign are the most troublesome and persistent. If it were some one's duty to keep them from the highways these pests would not travel so fast.

**Strange Relationships in Marriage.**  
It is rarely that a daughter becomes her mother's mother-in-law, yet this curious coincidence does occasionally happen.  
A friend of mine, a colonel in the army, had been a widower for some years, and resided with his sons and daughters in Plymouth.  
At a ball given by the officers of his regiment he met a beautiful young girl, with whom he fell desperately in love, and to make a long story short, they were soon married.

At the year's end there was an addition to the family. Of course the mother came to be with her daughter on this interesting occasion, and being a handsome, well preserved woman, the Colonel's eldest son became much attached to her, and before long led her to the hymeneal altar. Thus the daughter became mother-in-law to her own mother.

Another strange relationship is that of a lady who is mother-in-law to her two sisters in a somewhat similar fashion to the above, they having married stepsons. I myself am cousin to my own sister, she having espoused my husband's first cousin, and am second cousin to my nephews—her sons.—London Tit-Bits.
