DYSPEPSIA AND HEADACHE.

An Elderly Lady Tells of Her Cure Through the Use of Dr. Williams' Pink Pills After a Score of Other Remedies Had Failed.

Dyspepsia causes more genuine distress than most diseases that afflict mankind. In this country from one cause or another, its victims are numbered by the hundreds of thousands.

There is no other medicine offered the public that will not so promptly and effectively as Dr. Williams' Pink Pills. Proof of this is given in the case of Mrs. F. X. Doldridge, St. Sauveur, Que.

Que. In conversation with a reporter, Mrs. Doldridge said: "For quite a number of years I have been a terrible sufferer from dyspepsia, accompanied by the sick headaches that almost invariably come with this trouble."

TRICK OF A ST. BERNARD. Among some interesting dog stories told recently is one concerning a remarkably sagacious St. Bernard, which lived at a house where the writer of the story once boarded.

The dog used to come into my sitting-room, and give me his company at dinner, sitting on the floor beside my chair with his head on a level with the plates.

Old Recipe for Black Ink. With black ink selling at five cents or so a bottle, it seems hardly worth while for one to use home-made ink.

Acridic Fruit. The Eskimo children have other things than snowballs and icebergs to eat. Things grow very fast in the short Arctic summer.

Teaching German in the Transvaal. Johannesburg has a German school which last June was giving instruction to 113 boys, 84 girls and 25 children in the kindergarten.

More Than Ornament. Life is more than ornamental. What does the dead man care for the fringes of his shroud?—Boston Congregationalist.

Intelligence of Animals. A German naturalist has collected evidence that monkeys, dogs, cats, birds and other animals recognize themselves or other animals in mirrors and pictures.

Ale and Porter. JOHN LABATT, London. Are undoubtedly THE BEST. Testimonials from 4 chemists, 10 medals, 15 diplomas.

It you are tired reading Blue Ribbon Tea advertisements, take a cup of the tea itself and you will be in a good humor again.

A Pet Canary.

A pet canary belonging to a very devoted twelve-year-old girl died the other day of pneumonia, and received a burial which probably stands alone in the annals of bird obsequies.

Dick was 6 years older than his little mistress, and spent fully half of his happy life in singing. When the little fellow died he was put in a silken shroud. Two boys of the neighborhood dug his grave, and a handsome jewel box, lined with white velvet, served for a casket.

All the girl friends of Dick's little mistress, Ruth, attended the funeral dressed in deep black and the 16 dolls that were in the erect congregation wore the same sombre hue.

When everything was in readiness Ruth threw up a window, under which was the newly made grave, and began playing a funeral march on the piano.

There was so much weeping that it was finally decided to bring it to an end by hurrying up the burial services. The body was quickly placed in the grave and a little mound was built up over it.

Two Queer Things. Most extraordinary in its resemblance to an animal is the bird-pee. It is found on a bush about five feet high, growing in Western Australia.

Should you see these tiny birds swaying in the wind you would almost expect them to fly away, so life-like are some of their motions; but they are firmly fixed to the bush, and in this respect just the opposite to the "leaves with wings," which can move at will from tree to tree.

Concerning Candles. It would not seem to the casual housekeeper necessary to take any thought about these humble luminaries. Yet there are certain points that it would be well to bear in mind about them.

Too Much. The bear broke the trap, you say? Was it a big bear? Not so very big. But it was mad clear through.

Minard's Liniment Cures Colic, etc. A military captain, desirous of inspiring a soldier with patriotic sentiments, asked him the following question: "What would you think if you saw a banner waving over the field of battle?"

Unfortunately True. "Revenge to-day, mourning to-morrow," is the cry in the European capitals, but there will be many mourning to-morrows before the day of revenge comes.

It Needs an Airing. The Chinese boast that their civilization is 4,000 years old. Perhaps that is the reason why it is necessary to shoot a few holes through it for purposes of ventilation.

They Are All Alike. Jack—She is a new woman, isn't she? Tom—Oh, I don't know. She shuts her eyes when being kissed, just the same as the others do.

One trial of Mother Grave's Worm Expeller will convince you that it is no equal as a worm medicine. Buy a bottle and see if it does not please you.

Washable belts of white leather are very popular. Girdles of gold or silver galoon, enriched with jewels, combined with colored panne or velvet.

A matinee of pale blue chiffon, ornamented with all over lace in a Renaissance pattern, is very chic. Louis Quinze bodices are beginning to appear for ball gowns. These are tight, with a long sharp point, at the back and front, while over the hips they are very short.

What He Said. Landlord—When you gave Kichard sausage for his breakfast, what did he say? Waiter—He said it was a horse on him.

Peach Stains Are Stubborn. Peach stains are particularly hard to remove. They should be soaked a long time in a weak solution of chloride of lime; rinse very thoroughly.

BRIGHT'S DISEASE

is the deadliest and most painful malady to which mankind is subject. Dodd's Kidney Pills will cure any case of Bright's Disease.

DODD'S KIDNEY PILLS. Dodd's Kidney Pills are fifty cents a box at all druggists.

HUMORS OF THE SIEGE.

Incidents at Kimberley During the Bombardment.

In times of long-continued danger, men often seek to relieve the strain by turning to account anything which can be called a joke.

It was very funny to see all the town's big swells either fetching their meat themselves or sending a member of their family for it.

At times the shelling was very severe, and buglers were constantly on duty to give warning when the big siege guns of the Boers were fired.

Dear Sirs,—I have great faith in MINARD'S LINIMENT, as last year I cured a horse of Ring-bone, with five bottles. It blistered the horse, but in a month there was no ring-bone and no lameness.

SPEAR POINTS.

The falling leaves enrich the living grass. He who fears God is not afraid of any other.

There is no second childhood in the Christian life. It is useless reaching out dirty hands for God's holy gifts.

Light comes with the knowledge of God and love with the taste of His love. It is not the length but the largeness of eternal life that makes it desirable.

Salvation is not the gathering of the salvage, but the perfection of the whole being. Many who are very seldom solicited that God should have the shells are eating the kernels themselves.

Signals of Danger.—Have you lost your appetite? Have you a coated tongue? Have you an unpleasant taste in the mouth? Does your head ache and have you dizziness?

The Future of the Army. It is, of course, premature to attempt to predict the changes which will be brought about as a result of the present war, but it is characteristic of the cool temper in which the present crisis is being faced that two suggestions are already being discussed in high quarters as certain to be seriously considered when the crisis is over.

GUARD THE BABY AGAINST CHOLERA-INFANTUM. DR. HAMMOND-HALL'S ENGLISH TEETHING SYRUP. WILL POSITIVELY PREVENT IT.

Did She Get the Hat. It was a mean trick, of course, and one day she will doubtless get even with him.
