MENER-FIVE COWS. A monster banquet has just been given by a wealthy land-owner at Quinsperle, France, to celebrate the simultaneous wedding of his four children-two sons and two daughters. No fewer than 1,600 guests sat down to the feast, which took place in the open air. The bill of fare included five cattle, each weighing about 440 pounds, and 16 lambs, and enormous quantities of other meats and catables. So lavish was the scale ordered that. though the 1,600 guests are reported to have had magnificent appetites, there was more than enough for all. Nor was their thirst neglected, for the guests emptied ten large barrels of wine and fifteen of cider, besides dipposing of much else of a liquid character.

MEDICAL PERILS. In Beloochistan, when a physician gives a does, he is expected to partake of a similar one himself as a fuarantee of his good faith. Should the patient die under his hands, the relatives, though they rarely exercise it, have the right of putting him to death, unless a special agreement has been made freeing him from all responsibility as to consequences; while, if they should decide upon immolating him, he is fully expected to rield to his fate like a man.
