Mr. and Mrs. Skuce and baby, and Mrs. Skuce's sister, Miss Lizzie Carroll have returned to their home in Rochester...

Mr. Rankin has been visiting friends in town.

Federal College Re-opening.

The Lindsay Federal Business College will open for full term, September 5th, with the same expert instructors that have been in charge during the past two years.

Students entering at the opening of the term will be allowed railway fares for distances not exceeding 100 miles.

Mrs. N. P. and Miss Hilda Clarke took in the excursion to Niagara on Thursday.

Work Wanted. Let us do your next job of printing. Expert compositors will set the type. Expert pressmen will do the printing.

What's the matter with getting up a mammoth Fall Fair in Omeme this year? The Emily Agricultural Society should start once to make preparations.

PHOTOS.—Mr. G. E. Whiten, of Peterboro, will be at his Millbrook Studio on 2nd and 4th Tuesdays of each month.

Miss Keith has returned to Lindsay after a pleasant visit with her brother, Dr. J. P. Keith.

The granite walks are being constructed rapidly. Contractor Miller of Lindsay, has both the contracts of building our new school and putting down the pavements.

FARM FOR SALE OR TO RENT.—329 acres comprised of part lots 8, 9 and 10, cons. 4 and 5, Emily township, 1 1/2 miles from Omeme.

A number of our citizens attended the Masonic excursion to Lakefield, Mr. A. McCrea, W.M. of Lorne Lodge, was very attentive to all the excursionists, and everyone enjoyed the outing very much.

NEW TONSORIAL PARLOR.—Thos. Henderson, has started business in W. E. Holden's old stand, Omeme. A call is most respectfully solicited.

Mrs. (Dr.) Keith is visiting friends at London.

A couple of Lindsay men are making good money raising sunken oak logs out of the river above and below the town.

Mr. T. Z. Webster was 45 years of age on Tuesday last. He celebrated the event by giving a birthday party to a number of his friends at his palatial summer home on Lake Katchewanooka.

A double drowning accident was narrowly averted this week by presence of mind of one of our citizens. It appears that Master Jerry Cery and a friend, who when interviewed by a reporter refused to disclose his name and address, were enjoying a day's fishing on the mill pond, and as they endeavored to "land" a 20 pounder, in some manner the boat capsized...

Rev. Enoch Cook, of Dunsford, will preach twice at the Queen-st. Methodist Church next Sunday. The pastor, Rev. L. Phelps is holidaying at Pleasant Point.—Lindsay Watchman.

A quiet but pretty wedding took place at the Methodist Parsonage, Lindsay when Miss Eva Canning, ham was united in the holy bonds of matrimony to Mr. Ellis Lloyd, both of Omeme.

The bride, who is in high esteem by a large circle of friends, was the recipient of many handsome and useful presents.

Mr. James McCaffrey is in town spending a two week's vacation.

Mrs. Andy Wilson visited her brother in Buffalo on Thursday.

Mrs. Thos. H. Henderson returned home on Saturday from a week's visit with her mother in Peterboro.

Misses Ella and Annie McCaffrey took in the excursion to Niagara Falls and Buffalo on Thursday.

Miss Bertha Wilson is attending the millinery openings in Toronto.

Mr. and Mrs. Robt. Adams visited Niagara Falls last week.

Miss Annie McCaffrey was a visitor to Peterboro on Wednesday.

The Weekly Mail and Empire and Mirror to Jan. 1, 1905, for 50c., including your choice of the following artogravures:—"The Miner's Farewell," "On the Edge of the Herd," "Contentment" or an enlarged picture of Mr. R. L. Borden.

Sparkling Gems

that shine as bright as ladies' eyes. We have them in great variety. The right sort, too—diamonds, pearls, rubies, sapphires, amethyst, etc.

The Popular Jewelry Store, W.F. McCARTY'S, 77 Kent-St. LINDSAY

Mr. W. McCaffrey spent a week's holidays in town and enjoyed the outing splendidly.

The Women's Institute held their monthly meeting at Mrs. A. Scott on Aug. 11th, and a very large number were present. The subject, "Flowers," proved very interesting, each lady giving her method of cultivating flowers.

Messrs. Arthur McCrea and Robert Johnson took in the excursion to Niagara and Buffalo.

Mr. Sid Lang spent Saturday with Omeme friends.

Miss Mabel McCaffrey has secured a good position as teacher at Shanick, in Hastings County.

Miss Stella Sandy took in the excursion to Buffalo on Thursday.

The cricket match between Lindsay and Omeme clubs on Friday last on the grounds of the latter, proved to be one of the most closely contested and good games yet seen for a single innings match.

The Misses Annie and Maud Dal-four were visitors to Niagara Falls and Buffalo on Thursday.

Mr. and Mrs. T. J. and Miss Lila Parsons and Mrs. R. J. Weir took in the excursion to Niagara Falls and Buffalo on Thursday.

AUTUMN SOWN CROPS.

Results of Experiments in 1903 and for a Series of Years.

Owing to the peculiar weather conditions of the past year, the autumn sown crops have not been as successful at the college or throughout Ontario as they have been on some former occasions.

THE PEOPLES' GROCERY

has a full supply of everything in New Raisins, Currants,

Candies & Confectionery;

Crockery and Fine China Ware

Fresh Groceries

Post Office Block, W. BRADBURN.

between Ontario and German grown seed, with the result that the former surpassed the latter in yield per acre by 3-4 bushels.

2.—Winter barley has been grown in the experimental grounds for eleven years. It has completely killed out in some seasons, proving more tender than winter wheat.

3.—Two varieties of winter oats were sown on the 4th of September, 1903, but as usual the plants did not survive the winter.

4.—The Mammoth winter rye has surpassed the common variety in four out of five years. The average yield per acre of the former was 60.5 bushels and that of the latter 57.8 bushels.

5.—Within the past fifteen years about 200 varieties of winter wheat have been grown at the college. The most of these have been grown for at least five years in succession.

6.—The average yield per acre of the following average number of pounds of grain per measured bushel and bushels of grain per acre: Dawson's Golden Chaff, 59.8 lbs., 59.8 lbs.; Imperial Amber, 61.2 lbs., 58 lbs.; Prize Taker, 59.8 lbs., 57.6 lbs.; Silver Dollar, 59.7 lbs., 57 lbs.; Buda Pesth, 61.4 lbs., 55.4 lbs.; Rupy, 61.4 lbs., 55.4 lbs.; Forty-fold, 59.1 lbs., 55.4 lbs.; and Egyptian Amber, 61.4 lbs., 55.2 lbs.

7.—The greatest yields among seventy-two varieties grown in the past year, however were the Imperial Amber, 41.3 lbs.; Buda Pesth, 40 lbs.; Crimean Red, 29.6 lbs.; Budy, 29.1 lbs.; Tasmania Red, 26 lbs.; Dawson's Golden Chaff, 35.7 lbs.; and Egyptian Amber, 35 bushels per acre.

8.—The average yield less the amount of seed used, from sowing one bushel one and one-half bushels, and two bushels of each of two varieties of winter wheat per acre in each of six years, have been 39.7 bushels, 42.3 bushels, and 42.4 bushels per acre respectively.

9.—Seed wheat grown a thousand miles south of Guelph gave practically the same results as Ontario grown seed in the average experiments of two years.

10.—Winter wheat sown at the college during the first ten days of September in each of nine years has yielded 5.2 bushels per acre more than that sown from the 16th to the 20th days of September.

11.—The average results of sixteen experiments, covering a period of eight years, show that on well cultivated land winter wheat which was drilled in by a machine and that which was sown broadcast by hand gave practically the same yields of grain per acre.

12.—Winter wheat gave much better satisfaction on clover sod than on timothy sod.

13.—Land on which field peas were used as a green manure yielded 6.5 bushels of wheat per acre more than land on which buckwheat was used as a green manure, and 2.3 bushels per acre more than land which was worked as a bare fallow, in the average of eight separate tests.

14.—In each of five years, experiments have been conducted in treating winter wheat in different ways to kill the straggling snout, and this results have been very satisfactory. In the autumn of 1903, seven different treatments were made with each of two varieties of wheat. In the crop of the present year the wheat produced from treated seed had no snout, and that from untreated seed had 3.6 per cent. of smutted heads.

The treatment which proved very simple, cheap and effective was the immersion of the seed wheat for twenty minutes in a solution made by adding one pint of formaldehyde (formalin) to forty-two gallons of water.

Co-operative experiments with autumn sown crops were conducted during the past year on three hundred and four Ontario farms. The summary of the results of carefully conducted co-operative experiments which have been reported this season are here presented.

An interesting co-operative experiment has been carried on in each of the past two years by sowing Hairy Vetches, Winter Rye, and Crimson Clover in the autumn for the purpose of producing green-fodder for the following summer. The reports show that the Crimson Clover was badly winter killed in each of the past two years.

In the average results of the experiments of the past season, the Hairy Vetches gave a yield of 6.8, and the Winter Rye of 4.3 bushels of green crop per acre. When fed to farm stock the Hairy Vetches appeared to be relished much better than the winter Rye.

Three varieties of winter wheat were distributed throughout Ontario in the autumn of 1903 for co-operative experiments. The following in the average yield in weighed bushels of grain per acre for each variety for five years at the college and for 1904 throughout Ontario: Imperial Amber, 58 bushels and 22.5 bushels; Michigan Amber, 52.6 bushels and 18.8 bushels; and Turkey Red, 53.1 bushels and 17.1 bushels per acre, respectively.

All three varieties are rather weak in the straw. The Imperial Amber is a close rival to Dawson's Golden Chaff in yield of grain per acre. In the co-operative experiments with different manures applied in the spring of the year, the average yield of grain per acre for the past two years are as follows:—Cow manure, 30.2 bushels; mixed fertilizer, 20.2 bushels; nitrate of soda, 26.4 bushels; superphosphate, 25.8 bushels; muriate of potash, 25.1 bushels. The unfertilized land gave an average of 21.2 bushels per acre.

The cow manure was applied at the rate of 20 tons, superphosphate 330 pounds, and muriate of potash and nitrate of soda each 166 pounds per acre. The mixed fertilizer consisted of one-third the quantity of each of the last three fertilizers here mentioned. The usual cost of the fertilizers as used in these experiments is from three to three and a half cents per pound.

Notice to Experimenters. Each of the 3,740 experimenters with spring and summer crops will kindly report the results of their experiments as soon as they can after the crops are harvested.

Winter Crops for 1904-5. Material for any one of the five experiments here mentioned will be sent free to any Ontario farmer applying for it, if he will conduct an experiment with great care and report the results after harvest next year.

The seed will be sent out in the order in which applications are received as long as the supply lasts.

1. Testing Hairy Vetches and Winter Rye as fodder crops. 2 plots

2. Testing three varieties of winter wheat. 3 plots

3. Testing five fertilizers with winter wheat. 6 "

4. Testing autumn and spring applications of nitrate of soda and common salt with winter wheat. 5 "

5. Testing winter barley and winter rye for grain production. 2 "

A WORD ABOUT PAINTS.

The paint that wears and looks best is the Sherwin-Williams. It is made only of absolutely pure lead, zinc, color and pure linseed oil—no shoddy in it—therefore it will always look better and wear longer than any adulterated paint—it makes friends wherever used.

BRUSHES OF ALL KINDS. Boots and Shoes—Stock Fully Assorted.

CLOTHING--We have the largest and best stock ever carried by us in Omeme.

DRY GOODS SILKS--Ask to be Shown Our Stock.

We will be pleased to show you what we carry in this line. Special values in Lace Curtains, Prints and Cottons—all bought before the rise in prices. Our stock is very complete at present in all lines—quality and prices are right.

Wm. Curry & Co. OM E M E E

Don't forget the Sherwin-Williams PAINTS.

CAREYS MAGNESIA FLEXIBLE Cement Roofing.

Guaranteed for 10 Years.

Those contemplating putting roofs on their buildings, the coming season, will find it to their advantage to call on me, see samples and get prices before buying any other kind of roofing. It is wind, dust, rain and fire proof, and comes cheaper than first class shingles. Cement Roofing will last as long as the Roof Boards on which it is applied.
