## A FARMER'S VICTORY.

Rheumatism find Fastened Its Fangs Upon Him for Years and Caused Him Endless Misery-Tells How He Found a Cure.

From the Acadian, Wolfville, N. S. Among the many in this vicinity who firmly believe in the efficacy Dr. Williams' Pink Pills as a cure for rheumatism is Mr. John Stewart, of Hortonville. To a representative the Acadian who recently interviewed him, Mr. Stewart said he had been a victim to the pangs of rheumatism for upwards of twenty years. Two years ago Mr. Stewart was thrown from a load of hay and was injured so severely that he was obliged to take to his bed. While in this condition his old enemy - rheumatismagain fastened itself upon him, the pains radiating to almost every joint in his body, making life almost a burden. He had read frequently in the Acadian of the cures effected through the use of Dr. Williams' Pink Pills and decided to give them a trial. After the use of a few boxes the pains began to diminish, and his general health began to improve. Mr. Stewart continued taking the pills until he had used eight boxes, when the pains had entirely disappeared and another victory over disease had been won by this peerless medicine.

The Acadian can add that Mr. Stewart is worthy of every credence, as he is a man of intelligence and sterling qualities, whose word is unhesitatingly accepted by all who know him.

The public is cautioned against numerous pink colored imitations of these famous pills. The genuine are sold only in boxes, the wrapper around which bears the words "Dr. Williams' Pink Pills for Pale Peo-

Beginning Their Careers. "To win success in any vocation, the present day, requires hard, persistent, conscientious work, the best equipment that is possiple, and the employment of every resource that can be commanded," writes Barton Cheney, in a valuable article on "The Young Man and the Professions," in the Ladies' Home Journal. "Even the young man's manner, his personality, is a factor that makes itself felt in his work, while executive ability and good, hard common sense are elements of genius that should never be lacking. The young man should clearly understand in advance that if he does not have the capacity or love for work there is no profession in which he can win success. But, having this, he will find great opportunities to make a name for himself and to earn larger pecuniary rewards than men have ever before been able to coin out of their brains."
