

# Men's Summer Suits

AT PRICES TO CLEAR.

Every man should own one of these comfortable, light and dressy suits; light, dark and medium grounds, checks, stripes and faint plaids. The proper dress for country, seashore, yachting, outing and general comfort. Our prices now are:

\$3.50, \$4.50, \$5.00 and Up.

We are showing some wonderful values in

## SERGE SUITS

of the best kinds, fast colors all wool, at \$6.00 and \$7.50, worth double, as they are the perfection of fit.

As we have said before, and repeat for your benefit,—if you have a boy in need of clothing you can make money easy by coming here for his outfit. We can rig a boy out for so little money that you'll feel tempted to offer us a dollar or two more than we ask.

In Men's Youths' and Boys' Furnishings our values are wonderful. That's because the buying for half-a-dozen stores is done all at the same time.

### Our Visit to the Pan-American Exposition at Buffalo.

A Short Sketch which May be of Interest to Our Readers.

Anyone who intends to visit Buffalo can have any information we possess by calling at the Mirror Office.

Ye Editor, accompanied by Mr. R. J. Cornwall, left Omeme Monday morning, via the Grand Trunk Railway, enroute for the Pan-American Exposition at Buffalo, N. Y., and we must say it was one of the most delightful trips we have ever taken. The scenery along the route is beautiful, the cars are elegant, and comfortable, more especially those from Toronto to Buffalo, and the officials are courteous and obliging.

We left Omeme on the 8.50 a. m. train, arriving at Toronto about noon, where we had dinner, and remained until 5 p. m., at which hour we again took the train for Buffalo, arriving there about 8.30 that evening. We found no trouble whatever in acquiring accommodations. We put up at "The Gordon," 240 North Division St., a beautiful part of the City. We found ourselves "right at home" with Mr. and Mrs. Brown and family, who conduct "The Gordon," a nice, clean and up-to-date boarding house, which is being run for the accommodation of visitors to the Pan-American. The rates are very reasonable, and you are made welcome at once. We could not possibly have been treated better by friend or stranger.

Early Tuesday morning, in fact, immediately after breakfast which is served from 7 to 9 a. m., we struck for the Exposition, and remained there until late the same night, and the gorgeous display of buildings and exhibits that met our eyes there cannot be described to satisfy our readers. We can give a meagre description of the many buildings and the magnificent exhibits the em, but one must visit them to understand their magnificence and splendor, and to rightly appreciate them.

We will endeavor to give our readers some idea of the buildings and exhibits in the following write up: The Service Building was the first to be erected on the grounds. It is the administrative headquarters of the Exposition, all of the officers whose presence is required upon the grounds having their headquarters there.

The Electricity Building is 500 x 150 ft. The largest display of electrical machinery and appliances ever presented are shown in this building. It contains plant for distribution of Electric Power for Exposition, and the Commercial and Historic Exhibits in Electrical Arts. The Machinery and Transportation Building, covers about four acres, and contains a wonderful display of modern machinery, and shows the progress that has been made within a few years. The Transportation exhibits include all of the very latest specimens of automobiles, road vehicles, cars and railroad appliances. The Plaza is an open space immediately north of Electric Tower, and is 350 x 500 ft.

The Manufactures and Liberal Arts building covers over four acres, and contains the very latest productions of the wells and factories of the U. S. and other countries of the West. Exhibits showing the processes of manufacture constitute a very interesting feature of this division:  
The Temple of Music is one of the most beautiful of the Exposition buildings. It has an auditorium with a seating capacity of over 2000, and contains one of the largest and best pipe organs ever made in the United States.

The United States Government expended half a million dollars upon its group of three large buildings and the exhibits which they contain. One is devoted to Fisheries while the Departments make very complete displays, and in addition, new exhibits from Hawaiian and Philippine Islands, Tutuila, Porto Rico and Cuba, occupy the main building.

The Ethnology Building contains exhibits relating to the Ethnology and Archaeology of the Western World. A living exhibit of the Six Nations is given under the direction of this division.  
The Agricultural Building contains exhibits for cultivating the soil, harvesting and preserving crops, implements, machines, &c.

The Horticultural, Graphic Arts and Mines Buildings, form a semicircular court, and are really beautiful. They are connected by conservatories in which are rare exhibits. The Horticulture Building is very fine, its style of architecture being richly ornate, and the coloring very effective. It is 220 ft. square, with dome and lantern rising to 246 ft.

The Electric Tower is over 400 feet high; main body of tower 80 ft. square; surmounted by statue, "Goddess of Light." It is lighted by 40,000 electric lamps. The view from the tower is grand.

The Albright Art Gallery which will cost nearly a half million dol-

ars, is to be a permanent building of white marble. This gift of Mr. Albright, of Buffalo, will become the permanent home of the public art treasures of Buffalo, after serving the purposes of an Art Gallery for the Exposition.

The Stadium seats over 10,000 people, and contains a quarter mile racing track and ample space for all the popular athletic games. The Women's and Forestry Buildings are excellent. The exhibit in the latter are remarkably fine.

The Dairy Building is equipped with modern appliances, particulars regarding hygiene and sanitary matters.

The New York State Building will be a permanent edifice, constructed of white marble, and the style of architecture is that of a Doric Temple. It will become the property of the Buffalo Historical Society at close of Exposition. Cost is estimated at nearly two hundred thousand dollars.

The Press Building is a fine building erected for the accommodation of news paper workers and their friends. To find it easy we might say that it is opposite the Base of the Wild Animal Show, on the 34th way.

The Band Stand is a magnificent structure, and the music by the different bands is a great treat to visitors at the Pan-American.

Among the other most important and beautiful buildings were: Canada Building, in which were exhibits from all over the Dominion, and it was a display second to none, and on this building and its contents alone many columns could be written. The Ohio State, Michigan, Illinois, and Orange Buildings, and Cabin of Six Nations are also very fine.

Those of the side shows which interested us most were: The Johnstown Flood Trip to the Moon, Darkness and Dawn, The Baby Incubator, Babcock's Wild Animal Show. Many other shows are there, and perhaps would not do to list, but they are of interest to those who attended the Pan-American, such as The Philippine Village, Battle of Mission Ridge, The Old Plantation, Gypsy Camp, &c., every one of which will attract much the pocket fluffer as well as the sight seer.

Any of our readers who visit Buffalo should go out to Green Wood Cemetery and see the "John Bleker" monument, the cost of which is supposed to be nearly \$75,000. There are hundreds of other beautiful monuments on the grounds, and it is only a few minutes walk from the Pan-American grounds.

Visitors from this district will be made welcome at the Press Building. There are two elaborately furnished rooms for reading. There are also many other conveniences in this building for visitors to the Exposition.

A unique feature on the grounds is a miniature railroad. The rails are only about 1 1/2 inches apart, and the engine is about 1 1/2 ft. high by 3 ft. long, and runs by steam. It travels about the grounds, each capable of carrying 4 persons. The track is laid in a way such that one can see a "trip around the world," a good view of the exterior of the buildings. Very many patronize the said railroad. A trip in the "Loop-de-loop" is a thrilling experience. There are several other special attractions. We might say the fireworks were far superior to any we had previously witnessed.

We started our return trip on Thursday morning, and visited Niagara Falls, N. Y. We there took a cab and drove out to the Falls, and had a trip on the "Mad as the Wind," thereby getting a splendid view of the Falls. We returned to the town and visited the principal parts thereof, and then boarded the train for Hamilton, Ont., where we had a very pleasant visit, and where we did not leave until next morning.

The proprietor of this great general next visited Toronto, where he spent a delightful time, returning to Omeme on Friday evening well pleased with the excellent service he had received from Toronto. Special rates are given from Toronto to Buffalo during the Pan-American. Our readers will do well to take a trip via the said road.

When you get to Buffalo you have only about a minute's walk from the Lo High Valley Station to the street car. We have all of our readers who can visit the Pan-American.

Sir Wilfrid Laurier is getting it hot and heavy from Mr. Richardson, ex-M. P., for Lisgar. The former friend of the sunny Premier since he found out the real practices of Sir Wilfrid, called him a "mountebank" So far this charge has not been repudiated by the silver tongued Premier.

### PETERBORO CHEESE BOARD.

Wednesday, Aug. 21.  
There was an exciting time at the meeting of the Peterboro Cheese Board this morning, and upwards of an hour was spent in an oratorical battle between salesmen and buyers, and, in fact, buyers and buyers. The trouble has been brewing for some time, and it was expected that the climax would be reached at this morning's meeting of the board. Consequently, everyone came prepared. The discussion, while it lasted, was "fiery" to say the least, and became decidedly personal. It will no doubt be of much good to the board, as it to a certain extent cleared up a long existing misunderstanding between buyers and sellers.

Before the bidding opened, Mr. Ed M. Elliott asked that he be allowed to address the board regarding a certain grievance he claimed existed between

### PETERBOROUGH Pump Works

During the past winter I was successful in securing a great quantity of unusually fine pump timbers. This will be of benefit to all my customers, and will serve to maintain the high standard of quality that my goods have enjoyed in the past.

**Pumps for Every service**  
And satisfaction guaranteed in every case.

### Steel Windmills

The "Ideal" for 1897, is by all odds the best in the market. Its first cost is "low" when you remember that it is strictly a High Grader, and the annual cost for maintenance and repairs is lower still. I have handled these mills for six years and have never yet made a repair on account of defect in material or poor workmanship.

Send for particulars of my other lines.
