1se 39.

When did I fust think of it? Well now I can tell you to a day. 'Twas ten year ago last spring I was taken with an uncommon bad spell of rheumatiz; doctor's stuff didn't seem to do me any kind of good. My pocketbook was getting emptier and emptier and the rheumatiz was worse, if anything. I sat by the fireplace a heap, them days, and havin' nobody to talk to, sis being mostly busy, I thought a good deal, and it come to me all of a sudden, 'Lias, try roots and yarbs. The good Lord put 'em here for a purpose. Most of 'em haven't any I can see, 'less it is to heal. Mother was powerful inclined to it, so I reckon I come by it natural. I don't take undue credit to myself. There's one thing I can say, and that's more than most of the doctors can say of their nasty stuff, I've tried it all on myself and when I found it

helped me I give it to others.' The farmer looked down from the high seat of his wagon upon Elias Bennet who stood resting one foot upon the hub of the front wheel. His brown jeans clothes were rudely made. He wore no hat and the south wind blew his white hair about his simple and not altogether homely face. Among the country people Elias passed for one not over shrewd, but honest and "powerful knowia' when it comes to roots and

yarbs." The farmer idly chewed a straw as he looked down on Elias. "Well, you might as well bring me a bottle. Nancy said 1

necdn't come home without it." Elias turned toward the low log house set in the wide fields, and presently returned with a large, yellow-labeled bottle. He limped slightly and bent his head as though always in search of his favorite herbs.

"Well, I declare, 'Lias, if you ain't decided on a name at last !" The farmer slowly turned the bottle to follow the letters on the encircling label: "Elias Bennet's Botanic Blood Builder.'

"Just the other day, yours is the second bottle I have sold with the label."

"Does make it look more business like," said the farmer. Same old price, or have you concluded to raise on us?" "Same price; and where else air you

goin' to find such medicine for the money?" "Sure enough," replied the other, as he searched through his pockets for the money. "I ain't grumblin'. Good day, 'Lias."

It was only after many months experimenting upon himself that Elias had hit upon a compound that he fondly fancied a cure-all. A scoffer might have pointed out his crippled limbs as a poor recommendation; but none such existed among Elias's acquaintances, and he was persuaded to devote his time to the manufacture and sale of his compound.

The name troubled him most. He had great scorn for "patent medicines," but their names had a peculiar fascination for him as he read the glaring advertisements in the papers, or, on his weekly visits to the town, eyed the signs painted in conspicuous places: Three black E's on a yellow sign, setting forth the merits of Eller's Electric Elixir, called forth his unwilling admiration. It was this last sign which finally suggested to him his great name, and he wrote it fear he might forget it before he could she could watch Elias. carry it to the printer. When the beatiful yellow labels came home he was overjoyed as a child, and sat up half the night pasting them on the bottles ranged upon a shelf in

"No, I don't; I wan't 'Lias Bennet. The far field, you say?" She gathered up doctor in the French village of Neuvilleher skirts and struck of through the high Champ-d'Oisel, about nine miles from grass in the direction indicated. Jane Rouen, made an important experiment last

"'Lias Bennet!" 'Lias was kneeling in the moist clay, pulling at a refractory root | diphtheria broke out, and the deaths were when he heard his name called. He rose stiffly and with difficulty; his overalls were stained with yellow clay; his crumpled hat was pushed back from his eyes. His face, a little thoughtful, its usual look of innocent pride sobered a little, brightened at the sight of Mrs. Totten.

"Why, Mis' Totten; how are you? Glad to see you. And how's Em'ly?"

The woman's face was purple. "Em'ly's dead," she gasped. "She died day before yesterday, and I come here a purpose to on his brush, as a drop too much might tell you o' your work. The doctor says, and all the neighbors say, 'at ef she had a been taken in hand right at the start she'd a got well, but like a fool I give he. that poison stuff o' yours and killed her Poor Em'ly! the prop of my house!" She burst into tears, and turning quickly, tramped away over the clayey field.

Late in the evening Elias came home, and drawing off his muddy overalls sat down in the chimney corner. His basket was

empty. Soon after Jane came in, hung up her sun-bonnet, smoothed down her gray hair membrane to Prof. Francois Hue, bacteriand took her rocking-chair near the fire. ologist of the Medical College of Rouen,

she ventured a word. "'Lias, what was Mis' Totten a wantin' with you this afternoon?"

THE WAGES OF SIN.

Awful End of a Fast Young Man.

A Denver, Col., despatch says :- Edward Handfield lies in the morgue here tonight with a record as a burglar, forger, a possible murderer. Mr. and Mrs. Edward Handfield, whose country place is in Ashfield, Mass., are wealthy. Their son, after been abandoned. completing his studies in an academy, was sent to Montreal to prepare for the priesthood by a course in the Jesuit College Montreal on January 9th. there. Young Handfield led a wild life in Montreal. He came to Denver in June and ended up a round of dissipation. He dressed well whenever he received money from home, and his parents were lavish in their remittances. While awaiting these he would do anything to make a living. He fell in love with Miss Ida Hall, the youngest daughter of Mrs. Mary Hall, who keeps a restaurant. Young Handfield lavished considerable money upon the 18-year old daughter of the Hall family when he had of New Brunswick, to the Lieutenantmeans. Handfield became impatient to get Governorship of that province. married, but he was made to understand that it required money. He forged the name of a friend upon a card, by which | died from the wound. means he was permitted to enter the friend's room, where he stole two overcoats. The same night he captured a bicycle and large bundle of woman's clothing, by which he intended to procure funds for his wedding. This was late in October, and a few days afterwards he was arrested and put in Then Mrs. Hall forbade the girl having anything more to do with Handfield.

On being released on bail he claimed to have repented and desired to marry at once. The girl meanwhile had trouble with her family to get their consent to the proposed marriage. Her family did not credit Handfield's repentance. To-day Mrs. Hall said that the young girl must decide finally beand before the girl could call for help or able circumstances and esteemed by all. upon the bed, dying almost instantly. The girl crawled to the door and gave the alarm before she fell. She was taken to the hospital, where an examination showed no possibility of her recovery.

### Mysterious Electricity.

To the metaphysical mind on the one hand and to the confident ignoramus on the other, the mysterious nature of electricity offers a fruitful subject of speculation. To the latter especially it seems a reproach

face with the same conditions that confront can never hope to have his material vision evident. True we may demonstrate the exact relation between electricity and magnetism, and may satisfactorily connect these with other phenomena, and even obtain a working hypothesis that will answer all scientific needs, but the ultimte metaphysicians or the guesses of tyros, but

Baron Alberto Blanc, the new Italian Minister of Foreign Affairs, has received a letter from the Porte congratulating him upon his appointment to office, and expressing the hope that he will show in his official position the same sympathy with Turkey that he exhibited when he was Secretary of the Italian Embassy at Constantinople.

Deciding Ownership of a Letter. A chemist at Preston, England, having

written a letter and mailed it, wished to get it back. With that object in view he went to the postoffice, specified the address: on the envelope, pretended that he desired to send it by special delivery, at the same time putting down sixpence as the payment of the extra postage. Deceived by these proceedings the clerk hunted up and produced the letter to have the sixpenny stamp stuck on. No sooner did the writer get hold of the letter than he tore it into fragments, asserting that he had a right to do what he liked with his own property.

His view of the matter was not accepted either by the postoffice department or by
