## -Rabies-

Rabies is a fatal disease affecting wild and domestic animals and transmitted to man through,

- (a) bites and scratches,
- (b) the saliva,
- (c) handling carcasses of infected animals.

This infection among animals has been confined during recent months in some parts of Ontario to a greater extent than previously experienced. The most heavily infected areas include Muskoka, Simcoe, Parry Sound and Prescott. To date sporadic infections have also been reported in Algoma, Carleton, Essex, Frontenac, Glengarry, Lanark, Manitoulin, Nipissing, Northumberland, Ontario, Renfrew, Russell, Stormont, Victoria, York and Waterloo. In consequence, an increasing number of persons have been exposed to infection, necessitating, in some cases, the use of rabies vaccine as a preventive measure.

During the coming months many people will use the above mentioned areas for camping and other outdoor recreational pursuits. It is therefore desirable that all persons resident in those proceeding as campers on holidays to the areas referred to, should understand and act in accordance with the following:

1. All wild and domestic animals are subject to the disease.
2. Discourage the coaxing of, playing with or handling of wild animals or any found dead. (Children should be particularly warned in this regard.)
3. Family pets, cats and dogs, in or being taken to areas infected should be previously vaccinated against rabies by your veterinarian.
4. Bites and scratches from any animal incurred where rabid animals have been discovered, should be reported as soon as possible, both to your Physician and the concerned Medical Officer of Health.
5. Abnormal behaviour of any animal, wild or domestic, or the presence of any sick or dead animal should be reported immediately to the nearest Health or Animals Veterinarian (Canada Department of Agriculture); the Game Warden; the representative of the Department of Lands and Forests; or the local Police.

REMEMBER that once the symptoms of Rabies have developed in man there is no known cure. Proper preventive measures taken in time, may save a life.  
PRACTISE CAUTION, AVOID ALARM.

### IN MEMORIAM

Fallis.—In loving memory of a son and brother, Robert Fallis who passed away suddenly on May 27th., 1952.

The evening stars shine on his grave  
Of the one we loved, but could not save.  
The call was sudden, the shock severe,  
To lose the one we loved so dear.

'Tis sweet to know we'll meet again  
Where troubles are no more,  
And that the one we loved so well,  
Has just gone on before.

—Sadly missed by Mother, Dad and Brothers.
