BACK TO WORK AFTER LONG LAY-OFF

We are pleased to note that Mr. Jack Kellett has resumed work at the Olan Sawmill after being off work ever since the mill was burned down a few weeks ago. Mr. Kellett, who was employed there, and is also a member of the local fire brigade, was badly hurt the morning of the fire. He was taking a stream of hose up the sawdust pile when the hose caught on a log causing him to lose his hold, with the result the pressure in the hose threw him to the bottom of the pile injuring him severely. We hope he has fully recovered and will be able to take his place steady with the other members of the mill staff, the mill having resumed operations again about two weeks ago.

ROADSIDE DRINKERS

Much has been written about the danger of roadside tables, picking up hitch hikers and courtesy on the highways, but little has been said or written about roadside drinking. Information is to the effect that many a social drink has taken place on the edge of the highway, some of which has been observed by the motoring public. It is looked on as one of the worst kind of social drinking. Too bad that some drivers of cars cannot wait until they reach their destination before uncorking the bottle. The old saying that another little drink won't do us any harm is a fallacy. It often leads to accidents and might well result in fatalities. One drink and one life may be extinguished. Let there be less roadside drinking.— Watchman-Warder.

MILLBROOK HAS FINE HOME-MADE SWIMMING POOL

In an effort to give the youngsters of the village a decent place to cool off in during the hot weather, Mr. and Mrs. Cutmore, at the former Collins homestead, on King Street, have set aside a portion of their property for a swimming pool. Through the good work of Mr. Cutmore and a number of his helpers, quite a pond has been formed by digging away the ground alongside the creek. This has a good flat stone walk around the top, and the ground slopes gently to the water. Two flower pots filled with flowers help give the pool surroundings a pleasant look.

A sign has been erected which reads:

PRIVATE POOL

Use at your own risk.

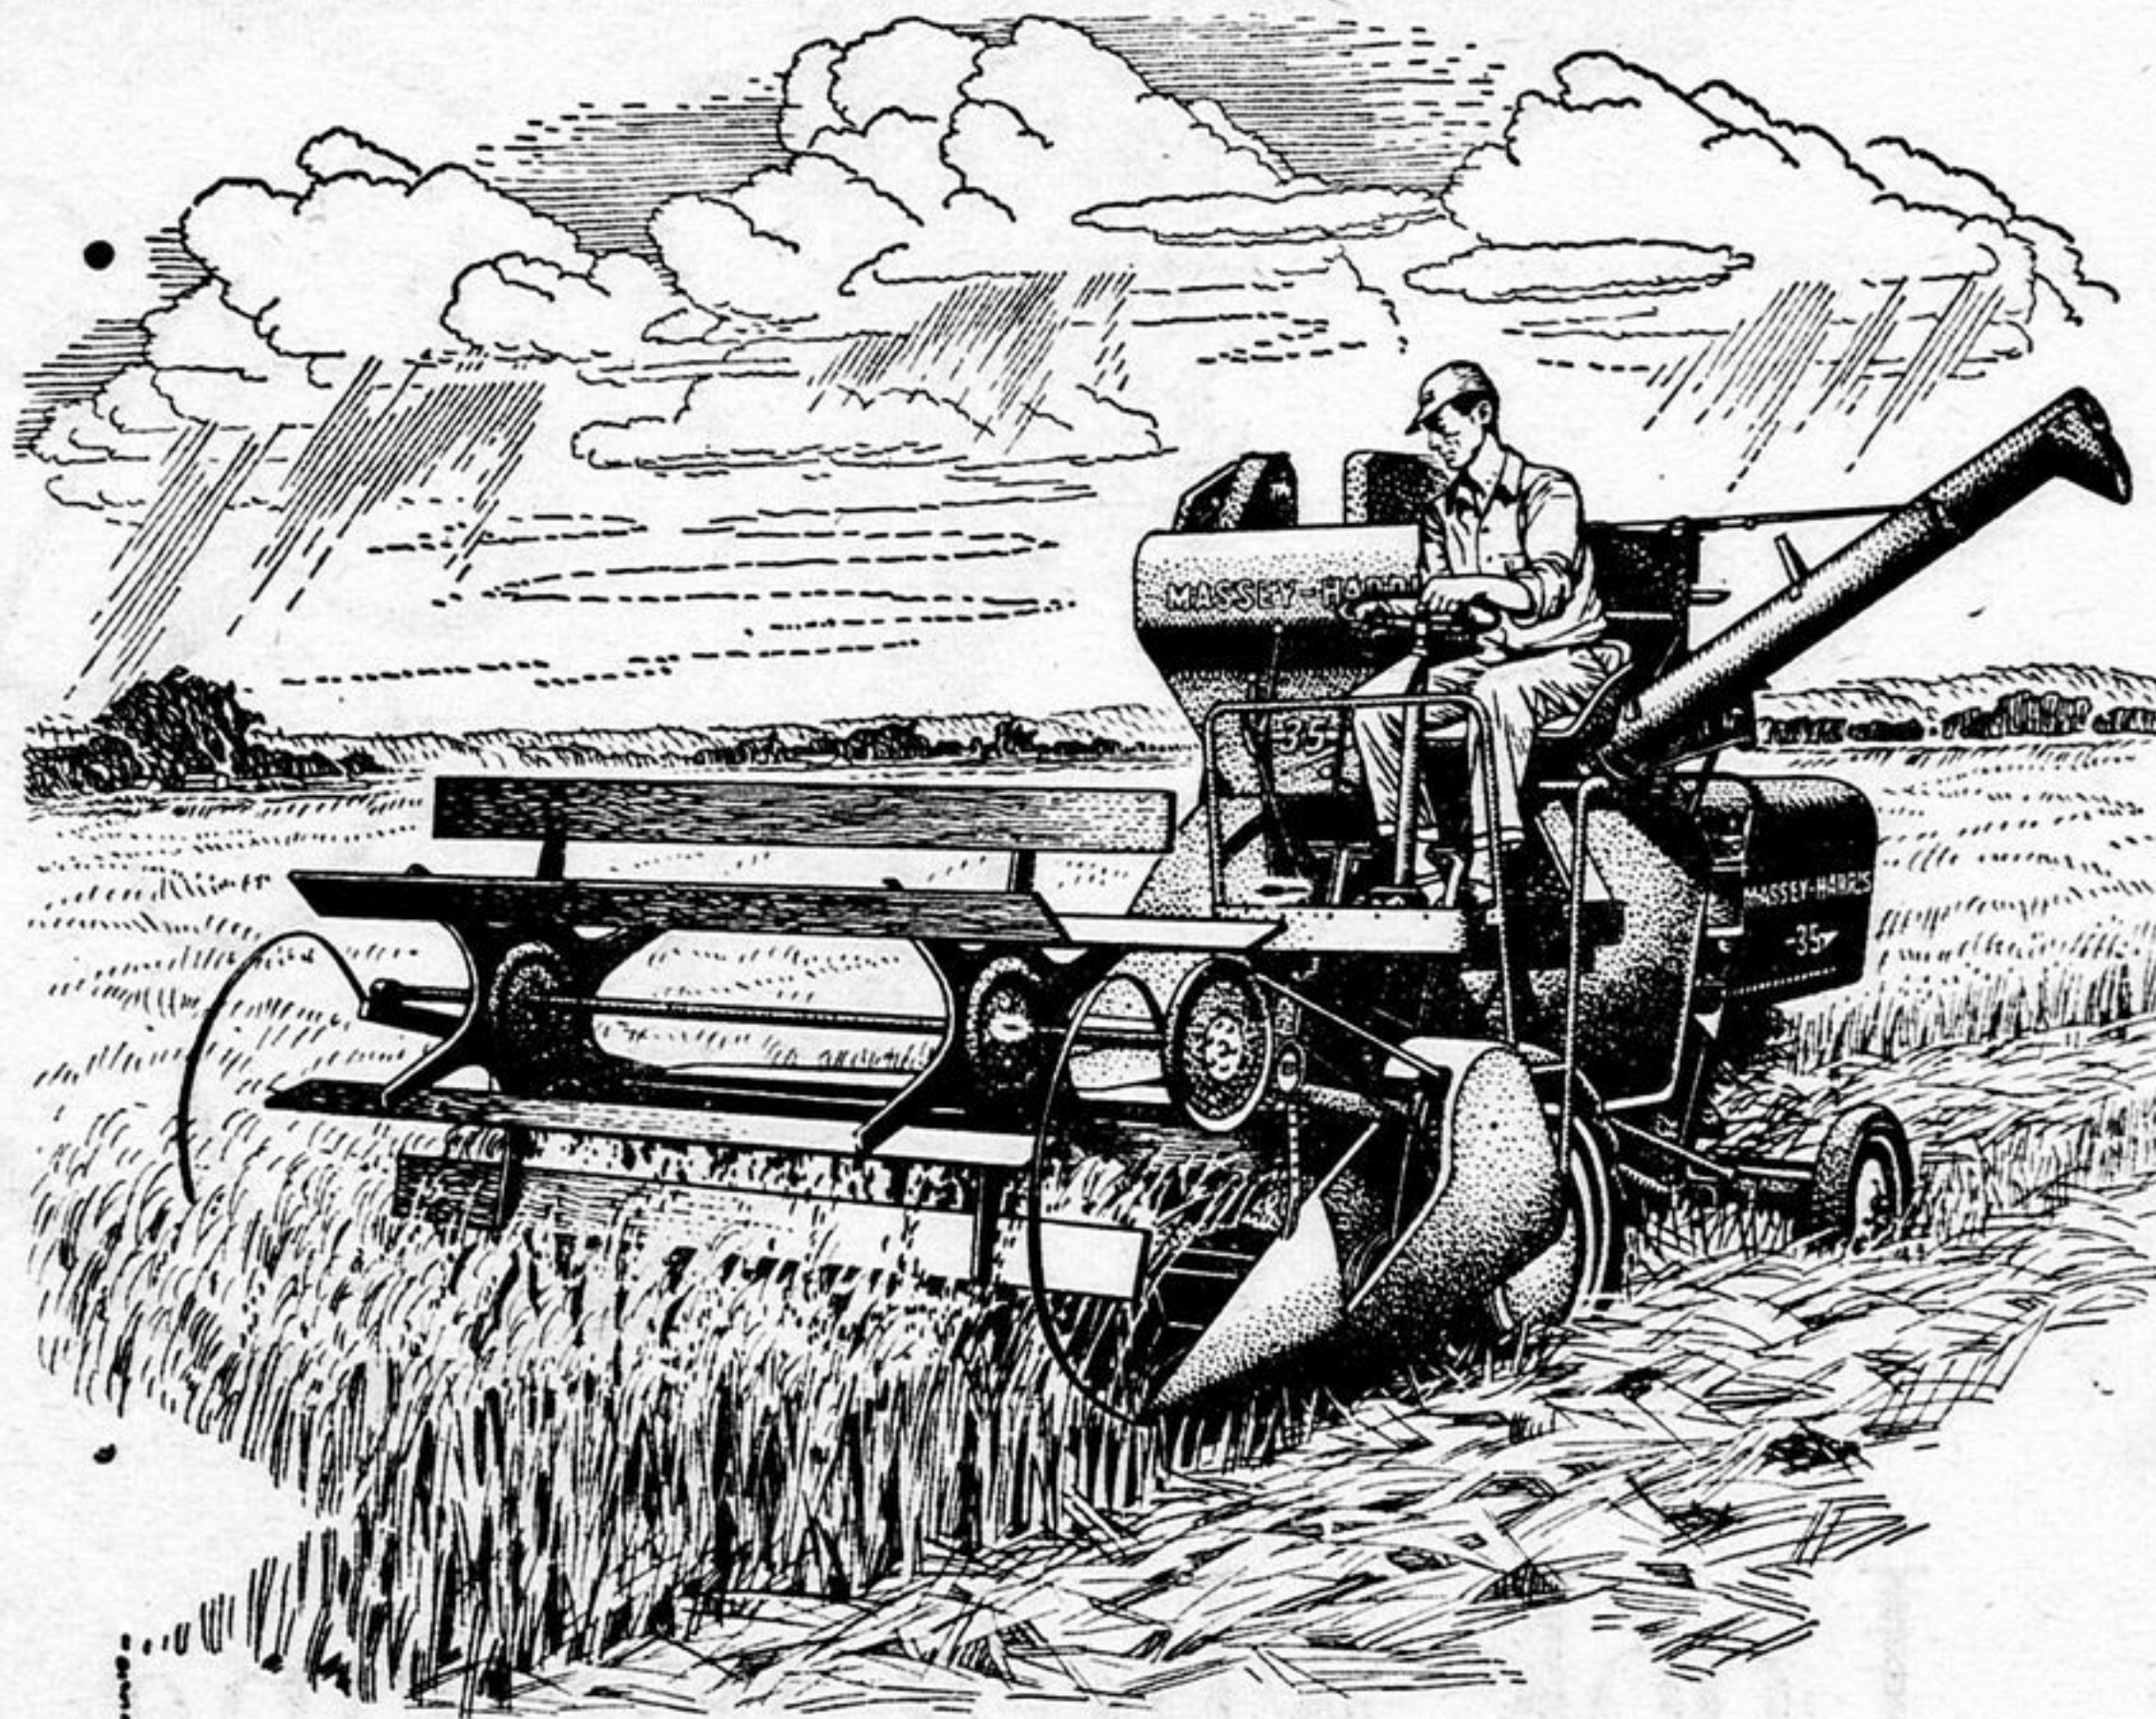

Mr. and Mrs. Cutmore take a great interest in young people and this is one example of what they will sacrifice for others, and no doubt but that the users of this pool during the balance of the summer, will bless this young couple for their forethought and interest in them. It's up to the users of this pool to use judgment and help keep the place clean and in good condition.

We have not been given authority to say so, but we believe that all young people will be welcome to use the pool but that no rowdyism or vile talk will be tolerated by the Cutmores.

60,000 new reasons every day for mechanized farming!

In these days of man-made planets we tend to overlook this old, but still miraculous, earth that feeds and provides for us all.

That over 60,000 babies are born into this world each day—more than enough to repopulate the whole of Canada in less than a year—goes unnoticed. That these 60,000 new mouths will be fed on the produce of this small earth does not make headline news!

Yet, when we consider this astonishing growth in the world's population, we must wonder how it is that our standard of living—measured in terms of food consumption—remains so high. How is it possible when there has been little appreciable increase in the world farm acreage and a decline in the ac-

tual farming population?

The answer lies in farm mechanization in a scientific approach to food cultivation and the development of modern machine methods to increase output per acre and per man-hour worked.

In this development Massey-Ferguson plays a leading role throughout the world—in Canada, in the United States, in France, South America, Great Britain, South Africa, Germany and Australia.

All the world over, wherever farming is mechanized to meet our ever-growing needs, there we find Massey-Ferguson machines hard at work in the fields.
