WEED OF THE WEEK

STINKWEED

This weed is a real "stinker" and is appropriately named, says J. W. MacRae of the Field Crops Branch, Ontario Department of Agriculture.

When bruised, the plant will give off an unpleasant odour, and farmers have lost thousands of dollars through tainted milk or beef caused by Stinkweed being present in the pastures, and excessive amounts of seed in feed grains have been known to poison animals.

Stinkweed, Pennygrass, Frenchweed and Fanweed all refer to an introduced annual which grows 6 to 24 inches high and is found in meadows, grain fields, roadsides and waste place.

The flowers are small, white, with four petals, and the seeds are borne in small, flat pods surrounded by a membrane, clothed at the top, not unlike a tiny fan. The stems are slightly woody and branched at the top.

Stinkweed has shallow roots and responds readily to both cultivation and spraying.

Pre-cropping cultivation should be such as to induce seeds to germinate and then be destroyed by subsequent cultivations.

This helps to thin the stand, and good control can be obtained with as little as four ounces of 2,4-D acid per acre, if applied in early stages of growth.

Stinkweed is a prolific seed-er. Control measures are six-fold:

1. Kill as many as possible by pre-planting cultivation.
2. Spray the growing crop early with 2,4-D or MCP.
3. Practise early after-harvest cultivation, where possible.
4. Destroy all weeds growing around the farmyard, lanes, fence rows, etc.
5. Be sure weed-infested manure is well rotted before spreading it on the land.
6. Clean all Stinkweed seeds from feed grains and destroy the screenings.

Stinkweed is a real "stinker" in Western Canada and is now much too common in Ontario.

DURHAM COUNTY

4-H

MILLBROOK MAN BEST IN LAND JUDGING CONTEST OF DURHAM COUNTY

The 1961 Durham Land Judging Competition was held on Thursday, July 27. There were 28 4-H Club members and farmers on the tour.

The morning tour started on the farm of Mr. Garnet Rickard of Bowmanville and moved north ward visiting different areas with specific type profiles. Mr. Harvey Wright, Soils Expert from Lindsay, and Mr. A. O. Dalrymple, Agricultural Representative, explained the soil types and their use in general crop production.

The Competition was held in the afternoon on the farm of Mr. Sam Turner, Bowmanville.

The competition saw Mr. Bill Olan of Millbrook as top contestant in the Junior Section with Lynn Brown of Newcastle in second place.

Mr. Don Winslow of Ida was the winner of the Senior Section and Don Welsh of Bowmanville as the runner-up.

The winner of the Special Prize of \$25 for the high contestant in the Competition was Mr. Bill Olan.

This event was sponsored by the Central Lake Ontario Conservation Authority, The Ganaraska River Conservation Authority, The Durham Soil and Crop Improvement Association, the Soils Department of Ontario Agricultural College, and the Department of Agriculture in Bowmanville.

MILLBROOK PUBLIC SCHOOL FIELD DAY RESULTS

On the afternoon of June 29 Millbrook Public School held a Field Day of races, arranged for boys and girls according to age.

Mr. Hamilton was the starter for the Seniors. Miss Burnham and Mrs. Kennedy handed out prizes, the losers getting gum and candy. Mrs. Ouellette was the starter for the Juniors, and Mrs. Stuart and Mrs. Stevens handed out the prizes.

The pupils ran their swiftest in spite of the heat, and the cool ice cream was enjoyed by everyone.

Taking advantage of favourable conditions often means a big difference in profits. Modern farm machinery provides an efficient and economical work force that is always ready for immediate action. You can depend on Massey-Ferguson machines and implements to keep your labour costs low, increase efficiency and promote more profit on every farming operation.
