Faith Saved Him From Suicide

Bobby R. was born in the hills of Kentucky on a mountain farm. He attended a two-room school house as a barefoot boy. While going to school he met a girl with brown eyes and black hair. He married her on Easter Sunday two years later. One year later he moved to Ohio and began a grocery business with his brother. The first year they lost \$600 but then the business began to grow.

He opened a dry goods store, then a used car lot and began to sell semi-trailers; after that a furniture and appliance store. Finally the brothers bought up a whole block and built nice buildings on it. Business continued to boom until May of 1956.

At that time he had just built 15 new houses. He owned the franchise on new and used cars as well as trucks and trailers. He also owned a trucking line.

Then pressure began to build up. By August the appraisals on his houses showed an inability to even meet costs. Bankruptcy reared its ugly head, and the fruits of his years of hard work hung by an eyelash. The last of August he called in his brothers and told them his plight but they could not help him.

Desperately he sought an answer—he searched for one ray of hope. Where was "the way

RAWHIDE AT WORK

Max Ferguson, creator and alter-ego of CBC's famous "Rawhide" often works until the wee hours of the morning preparing his script for the "Rawhide" show. Frequently his only companion during the

'CANADIAN FIRSTS' FEATURE OF NEXT YEAR'S TORONTO-DOMINION BANK CALENDAR

Canadian ingenuity as shown in achievements and inventions known and used throughout the world today is the subject of the 1958 calendar of The Toronto-Dominion Bank.

A full-color illustration of the "S.S. Royal William", the first ship completely propelled by steam to cross the Atlantic Ocean is depicted on the front of the Bank calendar. The significance of the Royal William's first voyage seems to have slipped into obscurity with some of the Canadian achievements described on the calendar, although some of these were never publicized at any time.

Few Canadians know that the first steam foghorn was invented in 1854 by Robert Foulis, a Saint John, New Brunswick piano teacher. The principal of sounding a low-pitched note penetrated the fog and is employed throughout the world. The first marine compound engine, whereby escaping steam given off by a marine engine was used to drive a second engine, was invented by Benjamin F. Tibbits in 1842 at Fredericton, New Brunswick.

Short circuits in wet weather disrupted street traffic until in 1885 John Wright and Arthur Vanderpool installed in Toronto an experimental trolley pole as a source of electricity using overhead wires, instead of a third rail.

Standard time, Marquis wheat, the telephone, the splitting of the atom, the battery-less radio, the first submarine telegraph cable, the discovery of calcium carbide, electric heating, all are described and illustrated in The Toronto-Dominion Bank's 1958 calendar of "Canadian Firsts".
