By the time this climax was reached, the limit of Miles' patience had been reached also.

"I hearlily echo your wish," he said, shortly, "but unfortunately we cannot undo what has been done. Be quiet please," he added sternly, seeing ner about to speak again; "you are not 'n a fit state to speak again; "you are not in a fit state of mind just now to discuss ! anything calmly or reasonably. In his tone there was a change instantly perceived by Hope, a hint of suspicion which aroused in her a fresh

tempest of wrath. "You are suspicious like your mother," she said; "I don't know what you telh suspect me of having done? Do you suppose I stole the ring? What do you think?
