EDUCATION AND BURGLARY

Methods of English House-breaker Have Much Improved. Education, says the Head Constable of

Livxerpool, England, in his annual report on the city police, which has just been issued, certainly has had one effeet upon crimes of dishonesty in that it has to a certain extent eliminated personal violence as an accessory circumstance. Acts of violence only add to the dangers of the burglar's or thief's enterprise, and education, introducing better if any at all, but since using Anti-Pill I can methods to him, as to the honest work- eat anything the same as when a boy. I man, has enabled him to avoid them, ei- have been taking one Anti-Pill at bedtime ther by a more educated study of details for the past three months, and find they evrime from that of larceny to that of fraud. Either course decreases his danger, and the latter generally increases his profits-swindling, wheteher it be by means of a lying prospectus, a mislead ing trade description, an appeal for a logus charity, or any other false pretence is both safer and more profitable than stealing a man's cash and valuables by breaking into his house or knocking him on the head. Personal honesty and professional or trade tradition seem under the stress of modern competition to afford less protection to the rights of property than they did ed, if the honest and dishonest are to compete in life on anything like equal
