

"OPSONIC" THEORY AT GENERAL HOSPITAL

A "NEW THEORY" THAT IS NEW ONLY IN NAME, BUT CORRECT IN PRINCIPLE.

The Toronto General Hospital is making a series of tests of a "new theory" in medical science, which they claim will revolutionize the theory and practice of medicine. The system is "the method of germ of any disease, then by a method of increasing the patient's ability to digest or kill off the microbes by increasing the white corpuscles of the blood and filling it with serum, make his recovery possible." This is in reality Dr. T. A. Stocum's theory of thirty years ago. Dr. T. A. Stocum said: "I discovered that the corpuscles of the blood are the foe of disease. If I can sufficiently increase these and strengthen digestion and circulation, I have solved the problem of overcoming disease." Dr. Stocum devoted his life to the working out of this problem. When, after innumerable experiments through days and nights for months and years of patient labor, he discovered that wonderful remedy, Psychine, he exclaimed "Eureka, I have found it." For a quarter of a century this remedy has been doing exactly what the authorities at the General Hospital are at present racking their brains to accomplish. Psychine is exactly what they are looking for. It enables the white corpuscles of the blood to overcome bacteria and disease of every kind. Speaking of a number of cases that came under the observation, J. R. Andrews & Co., of Bishops Crossing, says:

The party whose case was most remarkable, having been given up by several doctors, among them consulting experts from Montreal, and who, so far as can be determined, was restored to comparative good health by the use of Psychine, most of which I supplied. I have to direct you to my new home in Edmonton, Alta., formerly Cookshire, Que. This woman was past audible speech, except a whisper, was only given ten days as a possibility, friends had been to say good-bye and so forth. No other remedy, save prominent family, well-to-do also. Yours in haste, (Signed) J. R. ANDREWS & CO., Bishops Crossing, Que.

Psychine is a certain cure for all throat, lung and stomach troubles, and all bacterial diseases. At all druggists, 50c and \$1.00 a bottle, or Dr. T. A. Stocum, Limited, 179 King street west, Toronto.

KAFFIR RESTAURANT.

A municipal Kaffir eating house which has been opened in Victoria Street, Durban, South Africa, has turned out a success, the natives appreciating the better food they have. The eating house owes its existence mainly to the Hon. Robert Jameson, M.L.C., who has agitated for many years to get a Kaffir eating house in Durban. One morning, towards the end of December, a large crowd of natives met Mr. Jameson, and presented him with a silver snuffbox, suitably inscribed, as an expression of gratitude for his efforts in the corporation to open the place. The snuffbox was also presented with a silver-mounted walking stick for his kindness and good management.

BABY'S FRIEND.

"Before I got Baby's Own Tablets my baby was troubled with colic and vomiting and cried night and day, and I am almost worn out. But after giving him the Tablets for a few days the trouble disappeared and you would not know it was the same child, he is so healthy and good-natured now." This is the grateful testimonial of Mrs. George Howell, Sandy Beach, Que., and it tells of other mothers who are worn-out caring for cross sickly children, how they can bring health to the little one and ease to themselves. Baby's Own Tablets promptly cure the minor ailments of little ones, and there are no cross, sickly children in the homes where the Tablets are used. Sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

"That is rather a shabby pair of trousers you have on for a man of your position." "Yes, sir; but clothes do not make the man. What if my trousers are shabby and worn, sir? They cover a warm heart!"

Do not delay in getting relief for the little folks. Mother Graves' Worm Expeller is a pleasant and sure cure. If you love your child why do you let it suffer when a remedy is so near at hand?

"Do you know the Jacksons?" asked a lady of a young man who lived in the neighborhood. "No, I am not personally acquainted with all the members of the family," he replied. "But I always speak to the dog at the front gate as I go past."

They Drive Pimples Away.—A face covered with pimples is unsightly. It tells of internal impurities, which should long since have been corrected. The liver and the kidneys are not performing their functions in the healthy way they should, and these pimples are a sign that the blood is impure. Parment's Vegetable Pills will drive them all away, and will leave the skin clear and clean. Try them, and there will be another witness to their excellence.

"How long would you be willing to wait for me?" she asked, in tones so low he could scarcely catch the words. And then she went on: "You know, George," she said, "father has recently invested in a silver mine, and he is going there at once, and I cannot leave mother alone. So I ask you again, George, how long would you be willing to wait for me?" "Wait for you, my darling?" repeated George, with deep emotion. "For his was no fleeting love, dear reader. I will wait for you until we learn how the silver mine turns out."

The effect of malaria lasts a long time. You catch cold easily or become run-down because of the after effects of malaria. Strengthen yourself with Scott's Emulsion. It builds new blood and tones up your nervous system.

ALL DRUGGISTS; 50c. AND \$1.00.

NEW ATLANTIC PROJECTS

THREE AND A HALF DAY LINE BETWEEN EUROPE AND AMERICA.

Proposed Routes for Faster Vessels—Halifax to Blacksod Bay Service.

Many projects to reduce the length of the over-Atlantic voyage have been made in the last fifty years. The first of these was a line of steamers from Galway, Ireland, to St. John's, Newfoundland, before the cable was laid. The Cunards planned a fast line to Halifax with train service to New York. This was never tried. The dangers of the St. Lawrence route militate against speed there. In 1870 an English railway syndicate planned a service from Melford Bay, Wales, to Pasphebec, in Gaspe, Quebec, which is accessible in winter. The steamer Gaspe was sent out in January to prove this, and got caught in the ice and remained there till April. The project was given up. In 1902 the claims of Sydney, Cape Breton, were advocated. The experience of sealers has shown however that the route south of Newfoundland is so beset with ice in February, March and April that speed is impossible.

ALLAN'S EXPERIMENT.

In June, 1905, moreover, when the Allan line's new turbines, the Victorian and Virginian, were first placed on the Canadian route, their owners and the Canadian Government tried the experiment of taking the mails from the latter line of Sydney, transferring them to the cruise of Canada, and running them into that port, where a special train was waiting to convey them to Montreal. It was hoped to break all records of trans-Atlantic mail delivery, but the ship met ice and fog off the Grand Banks and sustained considerable delay. Last year one of the big Canadian railway concerns which are rivals of the C.P.R. conceived the idea of extending its lines eastward from the southern portion of Labrador, parallel with the Belle Isle Strait, to the eastern face of that peninsula, thus securing a direct line on the Atlantic and operating a line of ocean steamers between there and the British Isles. This project is not likely to materialize for many years.

TWO NEW PLANS.

The opening of 1907 saw two rival short line projects launched. One contemplates twenty-two knot steamers between Green Bay, on the north-east coast of Newfoundland, whence a railway line would cross this island and a steam ferry of equal speed convey passengers and mails to and from Canada. This project is based on the fact that scientific inquiry has proved that there is a fog zone stretching eastward from Green Bay to mid-ocean, and that, with the utilization of Newfoundland, the real ocean voyage will be reduced to less than three days. Of course this route would not be possible in midwinter, as ice floes block the approach, but for the rest of the year it would offer an unending source of pleasure to those travelling by it, and passing through an area remote from the torrid summer heat of the American States, and possessing a climate more salubrious than any which is traversed by steamship lines at present.

BLACKSOD BAY LINE.

With the powerful backing of Lord Strathcona, who offered to contribute a million dollars to it, the proposal for a transatlantic express service between Blacksod Bay, Ireland, and Halifax, Nova Scotia, all the year round, was templated in the employment of twenty-five knot steamers, equal in every respect to the new turbine propelled Cunard liners Lusitania and Mauretania, plying on the New York route, and is being received with great enthusiasm throughout the Dominion. Objection is offered in some quarters to the selection of an Irish port, the grounds of that would involve an additional short journey by steamer from Holyhead to Dublin and then a short railway journey across Ireland to Blacksod, with the delays inevitable in twice transferring passengers, mails, baggage and express freight, besides the probability of seasickness in the Irish channel and the inconvenience incidental to these transfers, while if an English port like Milford, Plymouth or Southampton were to be chosen, probably as speedy a voyage might be made and the steamers could also touch at French and German ports, or connect directly with smaller steamers plying there, so as to obtain a larger share of the Continental passenger traffic.

ADVANTAGES OF HALIFAX.

The advantages of Halifax, on this continent, are such as to leave it a serious Canadian competitor. The 2,100 miles between it and Blacksod would be covered by 25-knot steamers in three days and twelve hours, and the railway journey from Halifax to Montreal in fifteen hours, while the 654 miles between Blacksod and London should be covered in thirteen hours, so that it would be possible to transfer mails from London to Montreal, or vice versa, in four days and sixteen hours, to Chicago in less than six days, to the Pacific coast in nine days, to Japan with faster steamships in ten days, and to Hong Kong in twelve days, and to San Francisco in twenty-two days. It is, indeed, asserted by the promoters of this scheme that they can deliver mails from London in Chicago in exactly the same time it now takes for the fastest liners to steam from Liverpool to New York.

NEWFOUNDLAND LINE.

The project for a line via Newfoundland has this in its favor, that it represents a saving of another 24 hours in the transatlantic passage. From Cape Race, Nfld., to Halifax, N.S., is about 450 miles, or say 24 hours for an ocean "greyhound"; a further gain would be

A SOCIAL LEADER OF KANSAS CITY

Attributes Her Excellent Health to Pe-ru-na.

MRS. W. H. SIMMONS.

MRS. W. H. SIMMONS, 119 E. 8th St., Kansas City, Mo., member of the National Annuity Association, writes: "My health was excellent until about a year ago, when I had a complete collapse from overdoing socially, not getting the proper rest, and too many late suppers. My stomach was in a dreadful condition, and my nerves all unstrung. I was advised by a friend to try Peruna, and eventually I bought a bottle. I took it and then another, and kept using it for three months. At the end of that time my health was restored, my nerves no longer troubled me, and I felt myself once more able to assume my social position. I certainly feel that Peruna is deserving of praise."

There are many reasons why society women break down, why their nervous systems fail, why they have systemic or pelvic catarrh. Indeed, they are especially liable to these ailments. No wonder they require the protection of Peruna. It is their shield and safeguard.

obtained by the greater speed of the railway trains across the island, which it is proposed to run by electricity obtained from water power in the interior of the country, and the smaller steamers to ply across the gulf would maintain a speed at least equal to that of the ocean flyers.

The prospects, then, should be for a route that would attract those who are eager to make the very quickest journey, and it should also become the favorite mail route and largely develop tourist traffic.

TUNNEL TO IRELAND.

The next really important step in the direction of shortening the transatlantic voyage will be the tunneling of the Irish Channel at its narrowest point, from Slinnanean, in Scotland, across the Irish coast, thus giving an unbroken railroad line from London to the west of Ireland.—N. Y. Herald.

THE FATE OF HIS ENEMIES

END OF THE MEN WHO PERSECUTED DREYFUS.

Expiation by Sudden Death Seemed to Have Followed Their Footsteps.

"Always the dead!" Renach cried bitterly; "whenever we find a forger, a crime, always it is set to the account of a dead man!" And he drew up a list, horrible in its eloquence of the dead who strewn the dark path of this monstrous case of crime and cruelty and infamy. Yet there had fallen so many of the enemies of truth and justice, that he might have called them the Expiatory Dead. "For I have told you of that poor wretch, Lemaire-Picard, 'found dead' in his room in the Rue de Sevres; Henry 'found dead' with a closed razor near by; Felix Faure 'found dead,' and snuggled into his palace. FOUND DEAD. There are many others. Captain d'Allet, who claimed to have heard Dreyfus avow his guilt to Lemaire-Picard, was 'found dead' in a railway train, his corpse blue and already on the way to decomposition, though his journey had lasted but an hour. This pretended confession, which Dreyfus never made, d'Allet was related to his friend, Chaullin-Serviniere, a member of the Chamber of Deputies; the deputy took train one day to visit his home; an hour later he was 'found dead' on the railway tracks between two stations. And Rocher, of the prison guards, who also claimed to have heard Dreyfus say 'I am guilty, but I can not tell you where or how. It was as though Elerat's Truth had reached down and slain this lie wherever it lifted its evil head. The prefect Barreme was summoned to Paris by his government chief; he was 'found dead' in his compartment when the train arrived at the Gare St. Lazare. Laurenceau, prefect of the North, was called to Paris to give evidence regarding the spy system on the German frontier; there was no accident on the journey; the next day he was 'found dead' in his room at the Hotel Terminus.

HANGED HIMSELF.

Lorimer, one of Henry's most tireless agents of forgery and crime, was 'found dead'—hanged in a lonely barn; another, Guenee, was 'found dead' on the floor of his room in Paris. Then there was Meunier; his part in the conspiracy had been to falsify the meaning of a cryptic telegram sent by Pannizzari to the Italian Government, so that it affirmed the guilt of Dreyfus; and Meunier was 'found dead' in a railway train. Was it any wonder the martyr's friends began to see in these mysterious and opportune deaths the work of an avenging destiny? With grim emphasis Renach declared: "Decidement, la Fatalite est Dreyfusarde!"—the very stars in their courses fought against the lie.—Success Magazine.

Doctor—"Have you been able to keep anything on your stomach?" Victim—"Nothing but my hand."

PEN-ANGLE

Pen-Angle Underwear is form-knit so it can't be fitted wrong, it's made of long-fibred wool so it won't shrink—and it's guaranteed besides. The whole idea is to make it so good you can't afford not to buy by the trademark (in red).

AFFECTIONATE WILD BIRDS.

A Traveller's Experience in South America.

To the naturalist wild life is every way more interesting than that of domesticated creatures. Nowhere can this be studied better than in regions least frequented by man. Captain Snow tells, in his "Voyage to the Sea of Puego," how completely unacquainted with man were the birds of those South American islands. What particularly interested him was the fellow-feeling shown among the sea-fowl.

"I remember once when I wanted to give the men a change of diet at Koppel Island, I shot, in an hour and a half, twenty-nine of the best upland geese, quite as good and large as our finest geese at home.

"I was not always, however, that I wanted to shoot these birds. I have mentioned how they went in pairs or threes when feeding. On the occasion when I shot, was making sad slaughter among them, when I observed a male bird suddenly turn from the flight which he and his companion were making, and look round. I had shot his mate, and the poor thing had just dropped on a hillock not far from me. At a moment the male hesitated, and walked off, after glancing near his partner; but he again returned, on seeing the female struggling in death. On he came leisurely toward the fallen bird, so indifferent to his fate that for a second or two I did not shoot, until I bethought me that I would end his grief, if grief he had, by making him share the same fate.

"Another male bird that I winged fell in the water, where I could see him swimming about, closely attended by his female companion. When, at last, I sent the boat and captured the wounded one, his poor consort took to the shore, and wandered about by herself, apparently quite disconsolate, and refused to mix with the others.

"I could mention several instances in which I noticed of affection between these wild birds, but must give only the following: One of the logheader ducks had been caught alive and carried about with me on the beach. The other bird, at once, on shore for it, and followed us quite obediently, to get when they joined each other, and immediately waddled away to the water."

CANADIAN INVENTOR'S EXPERIENCE

INTERESTING INCIDENT BY A FAMOUS PATENTEE.

Mr. Wm. Wilson, of Craigie Villa, London (Ont.), the inventor of the Wilson Fruit Case, now adopted by the Canadian Government, tells an interesting experience which shows the healing and antiseptic value of Zam-Buk, the herbal balm. He says: "I had two very sore wounds on my leg, which were very much inflamed. They caused me much pain and suffering, and although I tried several salves they recommended to me, Zam-Buk was recommended and I applied some. It acted splendidly and in a very short time healed the wounds.

"At another time I sustained a nasty cut. Zam-Buk took away the soreness almost instantly and soon closed and healed the wound. I have also used Zam-Buk for other injuries, and I have no hesitation in expressing my high opinion of its value. It is without doubt, a splendid household balm. Zam-Buk cures blood poison, cuts, bruises, old wounds, running sores, ulcers, boils, spring eruptions, sculp sores, eczema, itch, barber's rash, burns, scalds, and all skin injuries and diseases. All druggists and stores sell at fifty cents a box, or from Zam-Buk Co., Toronto, for price. Remember, it is purely herbal."

SLEEPING AT WILL EXPLAINED.

To be able to sleep at will is one of the accomplishments most people would desire. It appears, however, that those who possess it are not so much to be envied. Dr. Courtney, an expert in nervous diseases, says that the majority of people who can fall rapidly asleep whenever they wish it are persons who have very little feeling, and are without emotion. A poet, an artist, a man of strong emotions, cannot sleep at will, for his mind is as active when he closes his eyes as when he is looking out on the world. But in the case of the sleep-at-will people, when they shut out sights and sounds their mind is nearly empty. Very little remains to produce consciousness, and so they fall asleep because there is nothing to keep their brains at work.

THE HEIRLOOM.

Mrs. Nurich, proudly—"That clock on the stairs is more than 200 years old." Mrs. Blueblood Cutting—"Ah, of whom did you buy it?"

SENTENCE SERMONS.

It's no use fiddling 'gigs in a graveyard. The saddest failure of all is not to try. He who sneers at men cannot be his God. The measure of your love is its cost to your life. The words of the most high are his best words. He who is not afraid to die is truly immortal. The really good man always is better than he knows. Only those things that are put into living are always sure to come up to your expectations. Folks who balk a great deal always kick a good deal more. The greatest hindrance of all is to meet with no opposition. People who make a show on credit seldom make a creditable showing. You never can be more than a small man until you believe in great things. Some are sure they will find rest in heaven because they are sleepy in church.

He who refuses honor to others usually lacks the roots of honor in himself. He loses any benefit from relationship to God who shrinks responsibility for man. The lightweight is almost sure to feel that he is called to be the light of the world. The man who cannot show his religion in his business has no business with his religion. The crooked man believes this would be a straight world if the upright were out of it. The use of the tailor's goose on your clothes will not take the goose out of your character. Many people are talking about the gladness of the gospel who know nothing about the virtuous life which does more than abstain from a few vices and contributes no virtues to the world. This world would be a good deal better if some folks who talk a great deal about their love for the human race would localize their affections.

A SPRING TONIC.

Dr. Williams' Pink Pills Make Rich, Red Health-giving Blood.

Cold winter months, enforcing close confinement in overheated, badly ventilated rooms—in the home, in the shop and in the school—sap the vitality of even the strongest. The blood becomes clogged with impurities, the liver sluggish, the kidneys weakened, and sleep is restful—you awake just as tired as when you went to bed; you are low spirited, perhaps have headache and blotchy skin—that is the condition of thousands of people every spring. It comes to all tonic—by Dr. Williams' Pink Pills. These pills not only banish this feeling, but they guard against the more serious ailments that usually follow—rheumatism, nervous debility, anemia, indigestion and kidney trouble. Dr. Williams' Pink Pills are an ideal spring medicine. Every drop makes new, rich, red blood. Every drop of new blood helps to strengthen the regular nerves; overcomes weakness and drives the germs of disease from the body. A thorough treatment gives you vim and energy to resist the torrid heat of the coming summer. Mrs. Jas. McDonald, Sun Camp, Ont., says: "I was badly run down, felt very weak and had no appetite. I could scarcely drag myself about and felt that my condition was growing worse. I decided to try Dr. Williams' Pink Pills and before I had used a dozen boxes I was strong as ever. My appetite returned and I am now able to do my household work and feeling worn-out. I think Dr. Williams' Pink Pills the best tonic there is."

PRINCES TO MAKE A WORLD TOUR.

Prince Edward is Destined for Army and Prince Albert for Navy.

It is stated that the two sons of the Prince of Wales, Prince Edward of York and Prince Albert will in due course have the advantage of a world-tour on one of His Majesty's ships. This follows the precedent of the Prince which was undertaken by the late Prince Albert Victor and the then Prince George, now Prince of Wales, on H. M. S. Bacchante.

Prince Albert is destined for the navy. The career of the first has been public knowledge for some time. Prince Edward was to be a soldier-prince was expected, but could not until now be definitely announced.

Prince Albert, who is 11 years of age, will follow in his father's footsteps in finding his vocation in the first line of defence. He will shortly join Osborne College.

Not without regret will Prince Edward leave the naval studies for which, it is stated, he has shown marked aptitude and unbounded enthusiasm. He will go from Osborne to the Naval College at Dartmouth, and will remain there until the world-tour.

Upon his return Prince Edward will leave the navy and enter the army, which vocation is his special desire of the King; and here again precedent is being observed, for the late Prince Albert Victor followed the course now set for Prince Edward.

BROOKS' NEW GURE FOR RUPTURE

Brooks' Appliance. New discovery. Wonderful. No operation. Automatic Air Cushion. Binds and draws the broken parts together as you breathe. A broken limb. No salve. No plaster. No pain. Durable. Sent on trial. Price 50c. BROOKS' 2615 Brock St., MONTREAL, QUE.

Prescription is here absent. I refer to the tiding of an organically healthy heart over an acute emergency, for in such a case lies the real value of blood letting.

"We have all seen a venesection save life for the time being, where a sudden emergency, such as an unusual strain, has caused failure of degenerate heart muscle, but the blood letting can do no permanent good. It might, however, and often would relieve us from the gravity of a sudden and distressing death."

Other diseases in the treatment of which Dr. Perry has experimented with blood letting are cerebral hemorrhage, heart stroke and nephritis.

There are a number of varieties of corns. Holloway's Corn Cure will remove any of them. Call on your druggist and get a bottle at once.

Lawyer—"What was done in the infernal?" Witness—"I don't know, sir. I didn't go into the infernal. I stayed in the anteroom."

PLEASE BEAR IN MIND that what is called a skin disease may be but a symptom of bad blood. In that case, should be supplemented with Weaver's Syrup, taken daily.

Traveller (to valet)—"That's a rather large statue, Pat." Pat—"Yes, sir. They tell me the hand is eleven inches wide." Traveller—"I wonder why they didn't make it twelve inches?" Pat—"Because they didn't want to make it into a foot."

Bickle's Anti-Consumptive Syrup needs no recommendation. To all who are familiar with it, it speaks for itself. Years of use in the treatment of colds and coughs and all affections of the throat has unquestionably established its place among the very best medicines for such diseases. If you give it a trial you will not regret it. You will find it 25 cents well invested.

AS TO THE PRIMA DONNA.

Stubbs—"Did you notice the pitch of her voice?" Penn—"Has she pitch in her voice?" I should think she would use about as much as she could get."

Stubbs—"Ade greaser?" Penn—"Yes; then perhaps she would stop screaming."

RETURN TO BLEEDING.

Some Physicians Advocate Trying It in Certain Cases.

Bleeding, once the first as well as the last resort of the doctor, seems to be coming into more or less favor again. "The custom of blood letting," writes an English physician in the Medical Record, "is passing into a stage of rational and moderate use. Venesection, properly employed, is a most valuable therapeutic agent."

Dr. Perry, who contributes the paper, says that he has tried bloodletting most often in cases of acute pneumonia because he looks upon it as a disease in which life may be saved and distress much relieved by a timely blood letting. Acute pneumonia is one of the few diseases in which venesection may be used as a curative agent; that is, as an agent that may directly aid in the restoration of normal health to a patient—and not merely as a palliative, as in chronic cardiac disease.

"When the cardiac muscle is degenerated or diseased," says Dr. Perry, "venesection can only be of value as a temporary remedy. The true value of ve-
