Yours truly, JOHN N. THOMPSON, M.D.

That our American forests abound in plants which possess the most value medicinal virtues is abundantly attested by scores of the most emment medical writers and teachers. Even the unintored Indians had discovered the useful ness of many native plants before the advent of the white race. This information, imparted freely to the whites, led the latter to continue investigations until to-day we have a rich assortment of most valuable American nedicinal roots.

Dr. Pierce believes that our American for ests abound in most valuable medicinal roots for the cure of most obstinate and fatal dis-eases, if we would properly investigate them; and in leafningation of this conviction, he points with prior is the almost marvelous cures effected by his "Golden Medical Discovery," which has proven itself to be the most efficient stomach tonic, liver invigorator, heart tonic and regulator, and blood cleanser known to medical science. Dyspep-sia, or indigestion, torpid liver, functional and even valvular and other affections of the heart yield to its curative action. The reason why it cures these and many other affections, is clearly shown in a little book of extracts from the standard medical works which is mailed free to any address by Dr. R. V. Pierce, of Buffalo, N. Y., to all sending

request for the same. Not less marvelous, in the unparalleled cures it is constantly making of woman's many peculiar affections, weaknesses and distressing derangements, is Dr. Pierce's Favorite Prescription as is amply attested by thousands of unsolicited testimonials con-tributed by cateful patients who have been cured by it of catarrhal polyic drains, pa periods, irregularities, prolapsus and of after many other advertised medicines, and

physicians had falled. Both the above mentioned medicines are native, medicinal roots. The processes emwith Dr. Pierce, and they are carried on by skilled chemists and pharmacists with the aid of apparatus and appliances specially designed and built for this purpose. Both medicines are entirely free from alcohol and all other harmful, habit-forming drugs. A full list of their ingredients is printed on each bottle-wrapper.

The fact of the steady decline in the demand for Ontario wheat must be matter of concern not only to the i dividual wheat grower, but to the public ge erally. Ontario people have a lopted the use of western flour to a considerable extent, and the building up of western industry to the detri ment of the Ontario farmer and miller has been a serious economic loss

The Ontario farmer has not only lost a ready market for his wheat, but nas suffered from the high prices of feed When the business of wheat growing In Ontario was still flourishing the price of bran and shorts had not soared to the present figure of twenty to twenty-two dollars a ton. In view of the increased cost of living, and the hifficulty of obtaining cheap labor such prices for feed are discouraging to farmers all over Ontario. Giving up wheat and going into stock raising a: d darying does not hely the farmer. if the cost of an essential part of the feed becomes almost prohibitive.

There seems, however, to be no reason for regarding this state of offairs as inevitable. The Ontario wheat is conceded to Lave a flavor that is utterly lacking in the western flour, and were it not for the larger per centage of gluton in its western rival, it would have held its own in the open market for bread making as it still does for pastry, biscuits, etc. Those millers and bakers who have adopted the use of a blended flour, made from a proper mixture of Ontario wheat and the stronger western wheat to bring up the per centage of gluten, report a great demand for their product all over the Maratime Provinces. Down East the prople do not care where the flour comes from or where the grain is grown rovided good flour is supplied them the fact that they prefer the blended flours ought to be an argument for thoir use by the people of Ontario, to whom the increase in wheat growing

is a matter of vital interest Anything that will help to divert some of the money now turned into western channels ought to be welcomed by the farming community. The use of the Ontario blanded flours will increase the market for the farmer Come in and you will be convinced that this is the place to buy. and prove extremely beneficial to the the dairymen and stockmen by bringthis colt when less than 6 mos old. | ing down proces of bran and sherts to a more reasonable basis.
