which is partly the ever-recurring famines. It was to cover the most urgent of these items that the Government recently had to call for an internal loan of \$31,500,000, the remainder is to be settled by means of a projected foreign loan of \$117,000,000, and both of these loans are marked down on the budget as "extraordinary receipts." The total amount derived from ordinary sources of direct taxation, customs and stamp duties, etc., can only be stated approximately, but M. Vodovozoff, the eminent Russian expert estimates the full amount raised by taxation at \$690,000,000. These figures correspond on the debit side with the fellowing chief items: The national credit, in which is included payment of interest on the national debt of \$190,-350,000, making it 28 per cent, of the total taxation receipts, and army and navy, \$236,850,000, or about 35 per cent., administration, \$252,700,000, equal to 37 per cent. The term "administration" covers the imperial family, the Govern-208 ment, the various Ministries, State officials, law and police, etc. The Imperia House alone receives over \$7,750,000, besides an enormous revenue from the imperial estates. The cost of the police service has been doubled in the last five years, and is now \$31,000,000, as against \$22,000,000 for education.
