DOCTORS MISTAKES

Are said often to be buried six feet under ground. But many times women call on their family physicians, suffering, as they imagine, one from dyspepsia, another from heart disease; another from liver or kidney disease, another from nervous prostration, another with pain here and there, and in this way they present alike to themselves and their easy-going or overbusy doctor, separate diseases, for which he, assuming them to be such, prescribes his pills and potions. In reality, they are all only symptoms caused by some uterine disease. The physician, ignorant of the cause of suffering, keeps up his treatment until large bills are mide. The suffering patient gets no better in reason of the wrong treatment, but probably worse. A proper medicine like Dr. Pierce's Favorite Prescription, directed to the cause would have entirely removed the disease there.

have entirely removed the disease, there-by dispelling all those distressing symptoms, and instituting comfort instead of prolonged misery. It has been well said, that "a disease known is half cured." Dr. Pierce's Favorite Prescription is a scientific medicine, carefully devised by an experienced and skillful physician, and adapted to woman's delicate system. It is made of native American medicinal roots and is perfectly harmless in its

As a powerful invigorating tonic "Favorite Prescription" imparts strength to the whole system and to the organs distinctly feminine in particular. For overworked, "worn-out," run-down," debilitated teachers, milliners, dressmakers, seamstresses, "shop-girls," house-keepers, nursing mothers, and feeble women generally, Dr. Pierce's Favorite Prescription is the greatest earthly boon, being unequaled as an appetizing cordial and re-

As a soothing and strengthening nervine "Favorite Prescription" is unequaled and is invaluable in allaying and subduing nervous excitability, irritability, nervous exhaustion, nervous prostration, neuralgia, hysteria, spasms, St. Vitus's dance, and other distressing, nervous symptoms commonly attendant upon functional and organic disease of the uterus. It induces refreshing sleep and relieves mental anxiety and despondency. Dr. Pierce's Pleasant Pellets invigorate the stomach, liver and bowels. One to three a dose. Easy to take as candy.

BEING MASTER.

Every boy likes to master things. Strength is a joy to a lad's heart. It Mr. Joe Fee is putting a wire fence | ought to be. That is the way boys are made. The boy who does not want to be strong and gain mastery is a pretty poor speciman. The Bible recommends us to acquit ourselves like men and be strong. But some boys, who would like to be fearless and powerful are timid. They are like the great Henry of Navarrh, who, though he longed to be a conqueror, was exceedingly timid by nature. In his first Quite a number of our young people | battle he ran away. How did he gain went to the garden party at Cavanville strength? Simply by saying to himself, over and over, "I will and I can and I can conquer this shameful fear." So, when the next battle came and he began to tremble from head to foot, he shouted out masterfully, "Down, traitorous body!" and plunging his spars into his horse, pressed forward into the very middle of the fight The big-Thorne, left for camp on Monday of gest victory he eyer won was this early victory over his own cowardice. He fought for the mastery, gained it, and kept it. Peter the great was another timid boy. He was so scared when he crossed a high bridge over a stream juveration of a failing industry, and that he had to pull down the carriage curtains so that he could not see the water. But Peter was bound to be master. "I can and will overcome my weakness," was his resolve; and so the lad that feared to cross the stream ended by crossing the sea and working in an English shipyard, so that he gave Russia her first fleet; and he forever associated with the very element he was afraid of as a boy.

Being master of one's self is an ac complishment, not a gift. A boy can be master if he fixes these two phrases in his mind, "I can" and "I will." The body must obey the mind, if the mind is made up. In the matter of a bad habit when the mind once savs to the body, "You shall not," the habit is mastered, "I can't help It," is a coward's plea. No lad who wan s to be strong will ever allow himself to utter it. Mastery over others follows mas tery over self, Until Henry of Na varre and Peter the Great could make themselves do what they shrank natur ally from doing, they could not hope The sun is after the in, look for In- to rule others, but they became great rulers and masters of men by practicing on themselves. The boy who rules bimself gets knowledge of the science of ruling. He learns to get a grip on the minds of his comrades. after awhile he has knowledge enough to influence a wider circle, and so on To master self is the first step to power .- From Observer,

About the poorest economy our farmere can practice is to give up raising their o n wheat, and to spend their money for Manitoba flour. It is downright extravagant, for they lose money both ways. In the first place, there is a steadily growing demand for blended

wheat and Manitoba wheat No flour milled of a single kind of flour. For instance, Ontarto wheat lacks strengtl., although it makes very white bread and light pastry. Manit ba wheat makes a big loaf that is very nutritious, but the bread is coarse and yellow. But a blended flour-containing both Ontario and Manitoba wheat-supplies what each single kind of wheat lacks, and contains the good

qualities of both Then, look at it another way. If our own farmers buy Manitoba flour, they are making another province rich at the expense of our own. The money which they earn in Ontario, is turned o er to the farmers and millers o

What all our farmers, and what al our housewives, should do, is to get toge her on this flour question. Every farmer in Ontario should raise winter wheat -as big a crop as his farm will justify. He should not only raise Ontario wheat, but he should also make it a point to buy a blende! flour, made of this same home-grown wheat.

The money is made here-the money should be spent here and kept here, Our woman-fork can help this cause along by using a blended flour for all their baking. The more they use, the greater will be the demand for Ontar io wheat. As this increases, naturally the farmers will go in more for wheat Everybody will thus share in the rerejoice in the greater prosperity of our
