CHAPTER XXVIII.

The Duke of Milan had sent a secret embassy to Mastino della Scala, lying crushed outside Milan -a secret embassy he had long been meditating. The masterstroke of his policy should be the Duke of Verona's ruin, and his complete triumph.

And the moment of his sending was well chosen. The two days of which Mastino spoke had passed. The answer from d'Este at Novara had been unfavorable. His plans, yellow satin caught his eye-yellow and locked it on the women whishe said, were to march back to Modena and Ferrara, protecting that part of Lombady, held now by Julia Gonzaga's men alone, against Viscsonti; he would wait for his army to come up; he would wait for Mastino, but not long; his duty lay inside Modena and Ferrara, not outside the hopeless walls of Milan.

And Mastino had set his teeth, and taken his answer in silence. That night there was a wild at- had met him and seized his hands, tack on the walls of Milan, so sudden, so fierce, that it almost seemed as if the ramparts must fall before the furious onslaught.

For five hours the Veronese and the defenders had struggled on the walls. Twice Mastino had wrenched the towers of the western gate blue dress. from the enemy's hand; twice he had been driven back, leaving his dead piled high. A third desperate attempt had also been lost, and Della Scala fell back towards Brescia with frightfully diminished numbers, and mad with the agony of final defeat. His cause seemed hopeless. And in the moment of his hopelessness Visconti's embassy arrived.

"Give Della Scala one day to consider," Visconti said to Giannotto, who accompanied de Lana on this missison. "An' if he mislikes the terms, say thou art to carry them to Ippolito d'Este." It was evening and very still.

Visconti stepped on to the balcony, and looked through the clustered pillars of its arcade into the gar-
