THE MANY WAYS OF SHAMM-ING DISEASE.

Man Feigned Unconsciousness for 13 Years-Insanity Simulation Not Successful.

The art of shamming disease has reached a high level of perfection. This is mainly to be attributed to the fact that the rewards of proficiency are great. Fresh in the minds of all is the recent case of a professional beggar in the city of London, whose voluntarily paretic limbs the passers by, even of the poor, so that charitable gifts flowed into his

The detection of malingering is often no easy matter, and no general rule can be laid down which will be applicable to all cases. The mere SCOTT'S EMULSION threatening of severe methods treatment is sometimes successful. but frequently fails. The threat of the application of the actual cautery And yet in the matter of restorhas cured paralysis, but cases have been recorded where malingerers have endured the cautery on several occasions. A man who simulated blindness was placed on the edge of a Nell-I am surprised to hear that jetty and told to walk straight forward. He stepped out and fell into When they were engaged they used to the water, for he knew that those who were testing him dared not let him drown, In another case, how-

tating knife to be placed close to it without fiinching, but when thrown into the river he struck out with both arms and swam.

A very useful method af detection is the suggesting of new signs and symptoms to the patient. The surgeon remarks, say, in the case of a paralyzed arm, in the hearing of the malingerer that it is strange that the little finger is flexed-it ought to be straight. In all probability at the next visit the little finger will have assumed the suggested position. The more outre and irregular the fresh symptoms suggested by the surstirred up the lively compassion of geon, the more definite is the detection. In general anesthesia we possess a valuable means of discriminating in certain cases between true and false paralysis, or contractures. While the patient is going under or
