

**COLTSFOOTE EXPECTORANT**  
Keep it in the house and use it at the slightest sign of an approaching cold or cough. It positively cures Colds, Coughs, Croup, Whooping Cough, Asthma and all Throat and Lung Troubles.

A pure vegetable syrup. Your druggist keeps it and recommends it. Price, 25 cents.

## COLTSFOOTE EXPECTORANT

### GREAT SALE

OF

## AYRSHIRES

Will sell by public Auction, 50 head of High-class Ayrshire Cattle, also Agricultural implements, etc., property of Hon. W. Owens, River Side Farm, Montebello, Que., on C. P. R. North Shore Line, between Montreal and Ottawa. Sale at 1 p.m. sharp.

**October 17, 1906**

Send for live stock catalogue.

**CAPT. T. E. ROBSON,**  
Auctioneer,  
Elberton, Ont.

### SOLITAIRE AND THREE-STONES

**SOLITAIRE** and Three-Stones Diamond Rings are the most favored of all finger adornments — especially as engagement tokens.

In both styles Diamond Hall has particularly attractive values at \$25.00, \$50.00 and \$100.00.

These would cost you considerably more were we not Canada's largest importing gem-dealers.

Drop us a postal card and we will send you free of charge our large illustrated catalogue.

### A NEW AMERICAN NOVEL.

A novel by Arthur Goodrich, entitled "The Balance of Power," is announced for early publication. It is the story of the loves of two friends for the same girl, with a gripping, vital struggle of every-day American life as a background, a story of high ideals and courageous optimism. The publishers of this book, the Ontario Publishing Company, say that it "grabs you in the beginning and sweeps you off your feet in the end," and they boldly prophecy that it will be one of the best selling books of the year.

There is living at Recife, near Perambuco, a child of five and a half years of age who is 4 feet 2 inches in height, and who boasts a moustache and a deep bass voice.

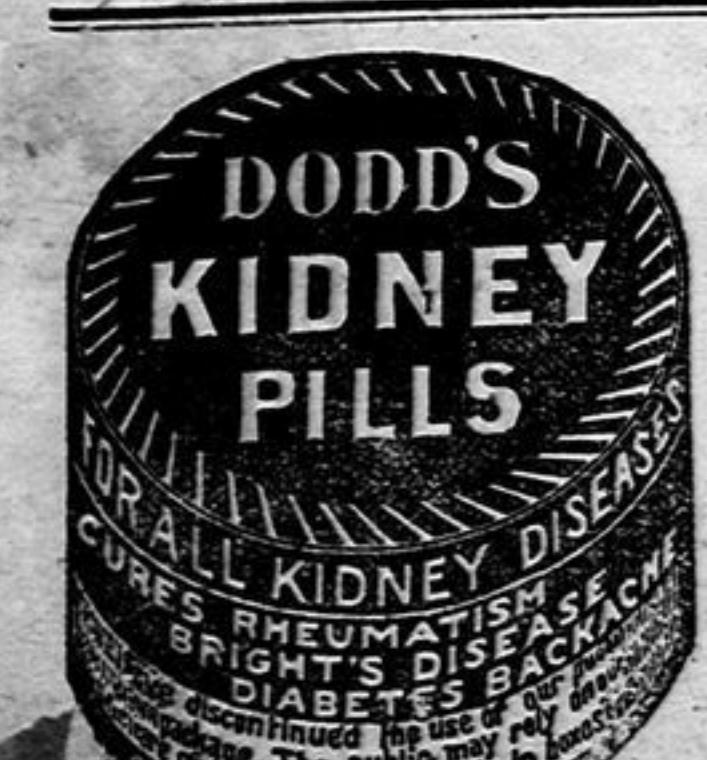

It is only necessary to read the testimony to be convinced that Holloway's Corn Cure is unequalled for the removal of corns, warts, etc. It is a complete extinguisher.

A tombstone has been erected in the West Hampstead Cemetery over the grave of Mrs. Louise Day, the inscription on which, including a verse of poetry, is in shorthand.

Nearly all infants are more or less subject to diarrhoea, and such com plaints while toothless and as this period of their lives is the most critical, met them should not be without a bottle of Dr. J. D. Kellogg's Dysentery Cordial. This medicine is a specific for such complaints and is highly spoken of by those who have used it. The proprietors claim it will cure any case of cholera or summer complaint.

### INSTEAD OF LOOKING FOR ANOTHER ONE.

"It's awful for a young man to lose a good opportunity." "Yes, because he doesn't do anything all the rest of his life but lose time talking about it."

three whole days. If it is done too rapidly, the meat is soggy, wet and nasty, and quite spoilt. On the other hand, if slowly and carefully carried out, the thawed meat is left dry and firm, exactly resembling that newly killed.

The enormous proportions of the frozen meat industry are really almost miraculous when one considers that the first cargo of frozen meat came to England only twenty years ago. It was in 1880 that the Strathleven brought the first cargo of 400 carcasses from Melbourne to London.

### SENTENCE SERMONS.

Your hard task is a great invitation. The problem of living cannot be solved by talking.

Things are not heavenly unless they are really happy.

Human kindness is the greatest law of the heavenly kingdom.

Cursed be the success that crushes aspiration.

Back of all public corruptions are our private corruptions.

Our great losses are not the things taken from us but the things we miss.

The damage is not in the corruption of our riches, but in our corruption by them.

He only can walk in the high places who walks humbly before the Most High.

He who has learned to do deeds that are immortal no longer worries over the immortality of his soul.

It is no use shouting the glad tidings as though you were reading a death warrant.

You are most likely to find God's face when you are wiping another's eyes.

The question is not how much money you have made, but how much have you made with your money.

One of the meanest men on earth is he who talks to Peter about his gifts to Paul and to Paul about his gifts to Peter.

An unearned advantage is a disgrace if there be no unrecompensed service.

It is an ill time to boast of your speed when your lusts are running away with yourself.

No man has a poorer outlook on life than he who always is on the lookout for himself.

It looks queer when a man backs up a petition for a million dollars' worth of relief. They will assist the assimilation of the ailment, and used according to direction will restore healthy digestion.

The death has occurred of Mr. Thomas Robertson, C. V. O., of Cawnpore, Criffell, formerly superintendent of the Highland Line, general manager of the

most interesting part of this huge import trade is without doubt the carriage of live stock. Seven years ago the writer crossed from New York to London in the depths of winter on a large cargo vessel, which carried 600 cattle, about 300 sheep, and a large quantity of pigs. These were penned on the lower decks, and as the weather, though cold, was fortunately fairly fine, the losses were small.

### BELLOWING, BLEEDING HEAPS.

Yet even so, almost every morning three or four unfortunate cattle which had been injured and consequently slaughtered, were slung by the horns and flung overboard. In bad weather the losses among live-stock on the Atlantic passage are sometimes very heavy indeed.

Cattle rolls fairly. This is no doubt largely owing to the great weight so near the top of the ship, but it is an odd fact that cattle have the power of making a vessel roll even in calm water. Cattle on board ship are confined in pens. In the modern first-class cattle carrier these pens are of stout material, but on some tramp steamers the timber is much too frail. Consequently, when a gale comes and the heavy beasts are rolling against the rails, they give way, and the unhappy creatures, perhaps horribly wounded, are thrown below, bleeding helplessly. Then if a few weeks over the vessel, comes confusion worse confounded. The poor brutes with horns and legs smashed are swept from side to side of the steaming, slippery deck. It is as much as a man's life is worth to venture among the frenzied, helpless creatures yet the cattle man is here, there, and everywhere, and is often nobly backed up by the "stiffs" as those men are called who are allowed to work their passage by attending to the needs of the floating farmyard.

Cattle smell the land. It is too dreadful a subject to dwell upon, but that this is no faint picture can be proved by any statistics. One vessel bound from the Argentine to Liverpool lost 100 cattle out of 140, another 50 cattle out of 100, and nearly 400 sheep out of 600. A third vessel landed less than 100 sheep out of more than 700.

Such cases as these are happily the exception, and not the rule. The Royal Society for the Prevention of Cruelty to Animals has done a great deal, and now-a-days, unless the weather be exceptionally bad, the public may rest assured that cattle suffer very little indeed on the sea passage. Most of them feed very well, and drinking water is always plentiful. The modern cattle boat is a large one, some of them over 10,000 tons—that rolling is largely eliminated, and, indeed, the beasts have more to fear from the heat of summer than from the storms of winter.

Two curious facts about the carriage of live cattle are worth mentioning. One is that they have a peculiar power of discoloring white paint all over the ship, and the other that they are able to "smell" land long before it is in sight.

To turn to the importation of dead meat. As most readers are aware, it is frozen before being shipped, is carried in iron boxes, and is usually arrived in this country at once transferred by insulated lighters to cold storage.

Most of our frozen meat—meat especially—comes from New Zealand and the Argentine. The freezing is done in great chambers which each hold 60,000 carcasses, and three great refrigerating engines produce the appalling cold of 30 degrees below zero. Each carcass, after being frozen as hard as stone, is wrapped in a cotton cloth, weighed and ticketed, and transferred to the ship, where the temperature of which is kept at about twenty degrees, or twelve degrees of frost. Recently, these ships have passed through the tropics. It is cold, when gasping on the deck in the Red Sea, in a temperature of perhaps 105 degrees in the shade, to think that one might go snowballing in the hold just below.

### THREE DAYS TO THAW.

London's cold storage warehouses will hold over two million frozen carcasses. Nelson's Wharf at Lambeth is one of the largest. It is six stories high and if you want to enter, you have to do so by a door on the top floor. There are no doors below, for if there were every time one was opened the air would get in, and it course rise to the upper floors. Here the meat is stored until it is needed, and then very carefully "unfrozen." The latter process is a most important one. It usually takes

ALCOHOL FROM CORN COBS.  
Eleven Gallons Were distilled From  
One Ton.

In the manufacturing of alcohol from corn cobs and corn stalks, at small cost the United States Department of Agriculture is developing a new industry that is likely to be of large commercial value. Investigations which the department is making at Hoosier, Ills., have proved that the large quantities of corn cobs which every year heretofore have gone to waste can be converted into alcohol in sufficient quantities so as to justify the erection of a distilling plant in connection with a corn mill.

The Department of Agriculture sent a representative to Hoosier to make experiments at a large cannery there.

They have succeeded by simple methods of fermentation in getting a yield of eleven gallons of alcohol from a ton of green cobs, and six gallons of alcohol from a ton of green corn stalks.

It is a peculiar fact that Africans never sneeze, neither do their descendants, if they be pure blooded, although domiciled in other parts of the world.

During 1905 there were wrecked, burned, and foundered at sea 297 steam vessels of a net aggregate tonnage of 23,611, and 29 sailing vessels of 214,600 tons, says Lloyd's.
