

HOT WEATHER AILMENTS

A medicine that will keep children well is a great boon to every mother. This is just what Baby's Own Tablets do. An occasional dose keeps the little stomach and bowels right, and prevents sickness. During the hot weather months stomach troubles speedily turn to fatal diarrhoea or cholera infantum and if a medicine like Baby's Own Tablets is not at hand the child may die in a few hours. The wise mother will always keep a box of Tablets in the house and give them to her children occasionally to clear out the stomach and bowels and keep them well. Don't wait until the child is sick—the delay may cost a precious little life. Get the Tablets now and you may feel reasonably safe. Every mother who uses these Tablets praises them and that is the best evidence that there is no other medicine for children so good. And the mother has the guarantee of a government analyst that the Tablets contain no opiate or harmful drug. Dealers sell the Tablets at 25 cents a box or you can get them by mail from The Dr. Williams' Medicine Co., Brockville, Ont.

NIGERIA FISHING TACKLE.

Simple Contrivance With Which Natives Make Good Catches. Natives of Nigeria are remarkably skilful anglers, and their manner of catching fish recommends itself alike for simplicity and success. The fisherman grasps a small line weighed at the other end with a small stone, and at regular distances along the line he attaches a number of hooks made of animals' bones in the form of a narrow V, while to the angle of each V is fastened a short line made of sinews and baited with a kind of snail; the fish, swallowing the bait and the line, swallows also the hook, which is so acted upon by the tension of the line as to expand its two prongs and fasten them firmly in the throat. The victim struggles and whirls about the line, thus attracting its family and neighbors to swallow the same snare.

MOTHERS!

Give the Children a Chance

Spanking does not cure children of bed-wetting. There is a constitutional cause for this trouble. Mrs. M. Summers, Box 100, Windsor, Ont., will send free to any mother her successful home treatment, with full instructions. Send no money, but write her to-day if your children trouble you in this way. Don't blame the child, the chances are it can't help it. This treatment also cures adults and aged people troubled with urinary difficulties by day or night.

Waiter (who has just served up some soup)—"Looks uncommonly like rain, sir." Diner—"Yes, by Jove!" and tastes like it too. Bring me some thick soup."

Much distress and sickness in children is caused by worms. Mother Graves' Worm Exterminator gives relief by removing the cause. Give it a trial and be convinced.

The frog has, like the camel, the power of storing up moisture, which enables it to pass through times of drought which would otherwise prove fatal.

Put up in St. Yara Rolls. The famous "The D.E." Menstrual Tablets which cure labors, backache, aches, neuralgia, etc., are also put up in one year's supply for physicians and family use. Davis & Lawrence Co., Montreal.

Costing about as much as a good horse, the camel's speed is equally great, and his life much longer. He is, moreover, able to carry three times as much as one horse.

Holloway's Corn Cure destroys all kinds of corns and warts, root and branch. Who, then would endure them with such a cheap and effectual remedy within reach?

According to Lord Avebury, the most important things in the world are good air, good water, and food, good health, and a good conscience; and they are not costly.

Satisfaction means "that which satisfies." Use "Salada" Tea and you will appreciate this definition. Sold by all grocers in sealed lead packets only.

Every packet will kill more flies than 500 sheets of sticky paper. SOLD BY DRUGGISTS, GROCERS AND GENERAL STORES. 10c per packet, or 3 packets for 25c. Will last a whole season.

The Mild Climate of Virginia offers splendid opportunities for stock raising. Fruit growing, dairying and general farming. Winters are short. Climate healthful. Land good and selling below its value. Live stock in large numbers. Many Canadians are living in Virginia. Write for information to G. W. ROYNER, Commissioner of Agriculture, Richmond, Va.

CALLING SICKNESS. Fits, Epilepsy, St. Vitus' Dance, Nervous Tremors, Etc., positively cured by LIEBIG'S FIT CURE. Free trial bottle sent free on application. Write the LIEBIG CO., Phoebe St., Toronto.

IN THE EVENT OF WAR

THERE WOULD SURELY BE GREAT NAVAL LOSSES.

War Would Cost Great Britain \$10,000,000 a Week for the Command of the Sea.

There is no nation in the world whose prosperity is so intimately bound up in its Navy as is the case with Great Britain, so that under these circumstances it is of peculiar interest to inquire what would be the cost to this country should it ever be involved in a naval war with a first-class Power, says London Tit-Bits.

The four principal British fleets in commission in time of peace are the Mediterranean, Atlantic, Channel, and Home fleets. Together these are composed of thirty-eight battleships and forty-six cruisers of varying ages and gun power. Every modern battleship may be taken, in round figures, as having cost at least £2,000,000 before she is in a fit condition to hoist her flag, while a cruiser may be set down as representing \$1,000,000 hard cash. These are inside figures, as the official returns of the cost of various vessels in the Navy will amply demonstrate. Thus the value of our four principal fleets amounts to the enormous total of £122,000,000 sterling, or, roughly speaking, one-sixth of the National Debt.

A YEAR'S NAVAL WARFARE to this country for damage done to its ships alone would be more than the entire revenue of a good many States.

So far, it must be remembered, attention has only been paid to battleships and cruisers; but there is a third class of vessels that would play a very important part in any naval war in which this country is involved. This class contains the torpedo boats and torpedo destroyers. Attached to the four fleets just mentioned are about 150 of these "mosquito" craft, each one of which has cost at the very least £100,000 to construct, or a total of £15,000,000. The danger of damage to these craft is infinitely more than it is to the larger ships of war, as the work they have to perform is the most hazardous of all; while their chance of being repaired, once they are put out of action, is correspondingly less.

A modern battleship of the Dreadnought or Lord Nelson class is built to stand a tremendous amount of battering before it becomes a total wreck, but one well-directed shot from a 12 inch or a 16 inch gun is calculated to send a torpedo-destroyer immediately to the bottom of the sea. Still, only allowing 10 per cent. again of the initial cost of these vessels as the amount of damage that would be done to them in a war of twelve months' duration, we have another £1,500,000 to add to our little bill.

ANOTHER IMPORTANT ITEM

to be taken into consideration is that of ammunition. It has been calculated that a 12 inch gun with a Service charge costs over \$200 every time it is fired, and when it is remembered that the Dreadnought and her sister vessels each carry ten of these guns it will be seen that a very considerable fortune would be blown away in the course of a day's fighting. These ships, it may be explained, are all so constructed that the whole of their ten great guns can be brought to bear on either side of the vessel, so that one single broadside would cost \$2,000.

It was estimated that in a single day the Russian fleet at Port Arthur, shortly after the commencement of the war with Japan, fired away ammunition to the value of at least £100,000 sterling, and this without doing the slightest appreciable damage to the Japanese fleet.

Another item that would prove an expensive one during a year's war is the renewal of the guns of our fleets. It was proved during both the Cuban and the Russo-Japanese Wars that the modern high explosives with which the shells are charged are very destructive to the interior of the barrels, and it was found that Admiral Togo had almost completely re-arm his fleet before he had been at sea more than six months.

It will be seen, therefore, that the money this country would have to provide for ammunition and guns for its fleets in a year's fighting would amount to a very large sum—certainly not less than £10,000,000 sterling and probably a great deal more. Still, accepting £10,000,000 as the amount to be spent under this head, the cost of the campaign has now been brought up to, approximately, £24,000,000.

THEN THERE IS COAL.

Scarcely less important to a fleet in time of war than ammunition is coal. Every modern warship is designed to develop enormous engine power and to travel through the water at tremendous speed. And the greater the speed the greater the consumption of coal. It is for this reason that in time of peace vessels are very rarely driven at their full speed. A ship like the Dreadnought, with its huge displacement and its engines working at their full 23,000 h.p., would literally eat coal by the hundred tons; and this remark applies with even greater force to the new cruiser-battleships of the Invincible class, whose turbines are designed to develop no less than 41,000 h.p. when driven at top speed. A coal bill of at least £20,000,000 or £30,000,000 might safely be looked for when the whole available strength of the

British Navy took the seas to fight for the integrity of the Empire, so that the bill now grows to from £40,000,000 to \$50,000,000.

There are a thousand and one other expenses, direct and indirect, that would have to be provided for when preparing for a great war at sea. New ships, for instance, would have at once to be laid down in every available dockyard in the kingdom to replace those sunk or otherwise rendered useless. There would also be the wages of the officers and crews, their food and maintenance, hospital charges, and pensions for the crippled and for those permanently disabled, so that it may safely be said that a naval war would cost this country at the very least £2,000,000 sterling every week that it lasted. Under these circumstances it will be well understood that those in charge of the affairs of the Empire are prepared to strain every nerve and to exhaust every resource of diplomacy before they finally prepare to fling down the gage of battle.

WEEKLY LETTER.

A. J. Pattison & Co., Toronto, state that the recent failure of A. C. Brown & Co., of New York will not affect Canadian investors, as their business was carried on in Canada through Canadian brokers, and if the firm do not pay in full the brokers will be the losers. The New York market has been active and prices advanced beyond any immediate warrant—with recent recessions. However, every one knows that Wall Street anticipates events, and there is certainly marked improvement in trade conditions, which promises to not only increase, but to be permanent. The well-established dividend paying stocks are undoubtedly a safe investment and at present prices will pay a good rate of interest. They will sell higher after the Presidential election—if not before. In the Toronto market the advance in Mexican Paper which we recommended to our clients at 50 to 75 and San Paulo to 150 are the features. The buying at these prices is probably foreign. The English and French investor are more favorable to South and Central American investments than the Canadian. The settlement of Dominion Coal-Steel differences will not now be long postponed, and we look for a substantial advance in the price of this stock.

The mining market has been exceedingly active, large numbers of shares changing hands. Prices have advanced slightly, but dividend payers are still selling under their market value from the standard of earning.

The American investors are purchasing heavily. Our reports from the Larder Lake Gold fields are highly encouraging the permanence of the Camp is stated to be assured and the extent of the gold-bearing belt if confirmed will make this camp the greatest gold field in the world. Why not. Cobalt is now in its partially developed state, the greatest Silver Camp—and they are only a short distance apart.

In china, the property of the father must be divided equally among all his children.

If our neighbors would only praise our virtues once in a while we might be willing to overlook their faults.

"Death from lead-poisoning," is the polite term used by Colorado juries to specify a gambler's fate in a shooting affray.

They Wake the Torpid Energies.—Machinery not properly supervised and left to run itself, very soon shows fault in its working. It is the same with the digestive organs. Unregulated from time to time they are likely to become torpid and throw the whole system out of gear. Parmelec's Vegetable Pills were made to meet such cases. They restore to the full the flagging faculties, and bring into order all parts of the mechanism.

In 1840, ninety-six million eggs were imported into Great Britain, while in 1906 the number had grown to nearly 2,265 millions.

An African woman, to be considered beautiful, must have small eyes, thick lips, a large flat nose, and an intensely black skin.

No Alcohol in It.—Alcohol or any other volatile matter which would impair strength by evaporation does not in any shape enter into the manufacture of Dr. Thomas' Electric Oil. Nor do climatic changes affect it. It is as serviceable in the Arctic Circle as in the Torrid Zone, perhaps more useful in the higher latitudes, where man is more subject to colds from exposure to the elements.

At the age of 40 a man gets busy and looks for some of the money he threw away at the age of 21.

Dumley—"I read in the financial papers this morning that 'money is easier' now. What on earth does that mean?" Peppley—"Probably it means that it goes easier. At any rate, I don't find that it comes any easier."

DODD'S KIDNEY PILLS. GUARANTEED TO CURE ALL KINDS OF KIDNEY DISEASE. BRONCHITIS, RHEUMATISM, GRAVEL, CALCULI, NEURALGIA, MIGRAINE, SCIATICA, ETC. Sold only in bottles.

CATARRH OF HEAD

Which Peruna Relieved in a Short Time.

MISS SUSIE M. KINGSWORTH.

MISS SUSIE M. KINGSWORTH, 466 Quebec St., London, Ontario, writes: "I began using Peruna last January, when I had such a bad cold, and I could not get anything to help me. My nose and head were all stopped up, so that I could hardly get my breath. I thought at times that I would smother, especially at night. I have no trouble with that now. The noise in my head has all disappeared."

"I know Peruna will do just what you say it does. I cannot praise Peruna too highly, as it has done so much for me. I hope my letter will reach other sufferers." Mrs. S. J. Kountz, 1015 Fovel street, Nashville, Tenn., writes: "I have had a very bad cough nearly all my life, and I am forty-five years old. I have taken all most every kind of cough medicine that has ever been made, but none did me much good. I would have spells of coughing that I thought I would cough myself to death. I took Peruna, and last winter and this winter I have had no cough, and I know that Peruna cured me."

DANGER FROM SPRINGS.

In the summer, when so many thousands drink from tempting springs in the woods and on the hillsides, a warning recently given by Mons. E. A. Martel, the celebrated French explorer of caverns, should not be unnoticed. Contrary to a widely prevalent opinion, Monsieur Martel says that springs of apparently pure water are, in many cases, merely the outflow of surface-waters which have disappeared through fissures, carrying with them pollution from the soil, and not purified in their passage through the rocks. He thinks that even chalk is not an effectual filter for surface-water passing through it.

A CONTEST WORTH ENTERING.

A Life Annuity of FIFTY-TWO DOLLARS is offered by the ORANGE MEAT people to the one sending in the largest number of bottoms of ORANGE MEAT packages before May 31, 1909. This means that the winner will receive One Dollar EVERY WEEK, or FIFTY-TWO DOLLARS every year, as long as he or she lives, or they can exchange it for a CASH PRIZE OF SEVEN HUNDRED DOLLARS. Besides the above there is a second Cash Prize of ONE HUNDRED DOLLARS, also other Cash Prizes as follows:— Ten Cash Prizes of TWENTY DOLLARS each. Ten Cash Prizes of TEN DOLLARS each. Twenty Cash Prizes of FIVE DOLLARS each, and ONE HUNDRED Cash Prizes of ONE DOLLAR each.

The only condition attached is that you cut out the bottoms of the ORANGE MEAT packages and send them in to ORANGE MEAT, Kingston. The bottom of a Jumbo package counts equal to Three of the smaller size. You should be able to win one of the above prizes if you start immediately and get your friends to help you. Send your name and address to ORANGE MEAT, Kingston, TO-DAY, and state that you are entering the contest. It is surely worth trying for.

He—"I shall speak to your father to-night. How had I better begin?" She—"By calling his attention to the statutes governing assault, manslaughter, and murder. Papa is so impulsive, you know."

A. R. BICKERSTAFF & CO., Stocks, Bonds, Debentures and Real Estate. Cobalt and all Mining and Oil Stocks of Canada and United States.

Orders executed with promptness. Correspondence solicited. 621 to 627 Trades Bank Building, Toronto, Ont.

QUICKLY THE DOCTORS DIE.

Report of the British Registrar-General.

If you would enjoy a long life you should become a minister (of any religious denomination), or failing that a gardener, a game-keeper, a farmer or a railway engine driver, says the London Daily Chronicle. These, according to Dr. John Tatham's report to the Registrar-General on the mortality in certain occupations during the three years from 1900, are the calling which offer the best prospect of longevity. At the other end of the scale come the general laborer, the tin miner, the hawker and the hotel servant, and about midway are the physician, the undertaker and the tobacconist. As compared with lawyers Dr.

Tatham records, medical men die more rapidly at every stage of life, while as compared with the clergy their mortality is enormously in excess. Tuberculosis, phthisis and diseases of the respiratory organs are the only causes of death that are substantially less fatal to medical men than to males in the aggregate. Diseases of the nerves and circulatory systems contribute the largest share to the mortality of doctors, men, due, no doubt, to their anxious and arduous occupation. A sign of the times is given in the particulars relating to commercial travelers. They fall victims to alcoholism in greater proportion than do all occupied and retired males by 38 per cent., while their mortality from liver disease is more than double that standard. But the mortality from alcoholism, gout, liver disease, accident and suicide was considerably less in the last period than in 1880-82.

In the previous supplement it was remarked that there was no other occupation in which the ravages of cancer approached that among chimney sweeps. It is still noteworthy that although the mortality from that disease has fallen by nearly one-fourth part, chimney sweeps are still subject to the highest fatality from this disease, although among several other occupations, such as servants in London, brewers, furriers, general laborers and seamen, the mortality does not fall far short of that of chimney sweeps. It is a subject which, as Dr. Tatham points out, deserves further attention.

For the first time in these returns the question of the mortality among women workers is dealt with exhaustively, though it is a matter full of difficulty. For instance, the case of a domestic servant, the daughter of a bricklayer who has returned home permanently invalid, is given. She is therefore regarded as unemployed, and in the event of death will be registered as a bricklayer's daughter, no mention being made of her previous occupation.

In the case of a married woman this cause would appear to operate even more strongly, the deceased woman being described simply as a wife or widow, with mention of her husband's occupation, but without mention of her own. It is rather curious that actors, authors and journalists have no place in these tables, even in the index. Even numerically they must be almost as important as, say, costermongers, wigmakers and chimney sweeps, who are all included.

Some men start out to practice what they preach, but they soon get out of practice.

Sure Regulators.—Mandrake and Dandelion are known to exert a powerful influence on the liver and kidneys, restoring them to healthful action, inducing a regular flow of the secretions and imparting to the organs complete power to perform their functions. These valuable ingredients enter into the composition of Parmelee's Vegetable Pills, and serve to render them the agreeable and salutary medicine they are. There are few pills so effective as they in their action.

"This watch will last a lifetime," said the jeweller as he handed the watch to the customer. "Nonsense!" retorted the other; "can't I see for myself that its hours are numbered?"

It will be noticed in the Singer Sewing Machine Company's advertisement that there are three addresses at the bottom of the announcement. Any one writing will please address them at the nearest one of the three places to his post office.

It's all right for a man to be a dreamer of dreams providing he wakes up occasionally and gets busy.

Do not give up in despair, you who suffer from obstinate disfigurements of the skin. Anoint the sore spots with Weaver's Ointment and purify the blood with Weaver's Syrup. All druggists sell them.

Gentleman (indignantly)—"You praised your kitchen coal up to the skies, and said it was most economical. Why, it won't burn at all!" Coal-Dealer (coolly)—"Well, what could you have more economical than that?"

In the treatment of summer complaints, the most effective remedy that can be used is Dr. J. D. Kellogg's Dysentery Cordial. It is a standard preparation, and many people employ it in preference to other preparations. It is a highly concentrated medicine and its sedative and curative qualities are beyond question. It has been a popular medicine for many years and thousands can attest its superior qualities in overcoming dysentery and kindred complaints.

One of the many things a congenitally young is unable to understand is how any sensible female can pass him up for some other chap.

Wife to husband, who is worrying over a heavy bill—"Jack, dear, it is unkind of you to let an insignificant thing like that upset you just after we are married." Husband—"Yes, it does seem insignificant when one thinks of that!"

Men should look for this Tagon Chewing Tobacco. It guarantees the high quality of Black Watch. The Big Black Plug.

Singer Talks

1. The Difference in Sewing Machines

- It is a mistaken idea that sewing machines are pretty much alike, when as a matter of fact there is a vast difference.
- There is but one machine that sews better than any other—and that one is the Singer.
- This is because the Singer idea is distinctive—every year shows improvement in that idea.
- This is because the Singer factories are not only equipped with tools and machinery better calculated to make good sewing machines than any other, but this equipment is unique and not to be found elsewhere.
- This is because a half century has been devoted to training and specializing men, each to do one thing best in sewing machine construction. The Singer's superiority—its lifetime-lasting value—does not appear on the surface.
- One machine does scw better than any other—and that one is the Singer.

Sold only by Singer Sewing Machine Company. TORONTO MONTREAL WINNIPEG. 312 Manning Chambers 533 Board of Trade Bldg 304 Main Street

TRISCUIT

Indoors or outdoors there is nothing quite so good as Triscuit—the Shredded Wheat Wafer, which contains in smallest bulk all the muscle-building, brain-producing qualities of wheat.
