

LINDSAY, ONTARIO, THURSDAY, JANUARY 7, 1909

SECOND YEAR

LIFE SENTENCE FOR ROSE; PRISONER SWOONS IN COURT

Jailbreaker Gets Limit Of the Law INSANITY PLEA NO USE Judge Winchester Gives Leader of Jailbreakers a Full Sentence

(Special to The Free Press.) Toronto, Jan. 6.—Alexander Rose, the daring criminal and jail-breaker, was yesterday sentenced to life imprisonment by Judge Winchester.

led into the dock by Constables Stewart and Brown. There he sat with bowed head to await his sentence. County Crown Attorney Drayton then addressed his honor, asking that judgment be passed upon the prisoner on the two charges of wounding with intent, on which he had pleaded guilty. The crimes for which he will have to pay the penalty were assaults on May 1 on Ethel Skitch in Wellwood's store, and on Allan G. Duncan in a store at the corner of John and Adelaide streets. The third charge, that of breaking jail, Mr. Drayton did not press.

Judge's Interrogation. "Rose, have you anything to say for yourself," said the judge as the prisoner rose to his feet. Mr. Curry, in appealing for mercy, addressed his honor, in which he drew attention to the fact that the prisoner had been subject to epileptic fits and also uncontrollable fits of cruelty. He believed there was a great deal of irresponsibility in Rose's character and make up, but he knew, to successfully prove beyond the shadow of a doubt that the prisoner did not know what he was doing when he committed the crimes.

Results of the Elections in Mariposa Township

Table with columns for candidates and their respective vote counts across various wards like Fingerboard, Valentia, Little Britain, Oakwood, etc.

DR. FRED WALTERS HONORED BY HIS MANY LINDSAY FRIENDS

ON THE EVE OF HIS DEPARTURE TO TAKE CHARGE OF HIS LATE BROTHER'S DENTAL PRACTICE THERE.

Monday night, after the close of "Alice in Wonderland" at the Academy, a number of Dr. Walters' friends gathered in his dental parlour over Gregory's store, ostensibly to have a final smoke and chat with their genial and popular friend prior to his departure to take charge of the large practise at Forest worked up by his brother, Dr. George Walters, whose recent death was deeply deplored by a host of old Lindsay friends.

But there was more than smoke in the air. When all had made themselves comfortable, Dr. W. J. Brown rose and read the following address, Mr. R. P. Butler making the presentation when the proper moment arrived: Dr. F. A. Walters:—Dear Sir,—It was with sincere feelings of regret that your numerous friends in Lindsay heard of your intended departure from town, and it is with equal feelings of reluctance that we gather together this evening to say good-bye, but we believe that you are leaving for your own betterment and advancement in that particular occupation which you have followed for many years in Lindsay. We wish you every success and prosperity.

Friends come and friends go, and it behooves us to make the best of circumstances, and therefore we welcome newcomers to our thriving town, and lament the departure of friends. During your life-long sojourn in Lindsay you have become endeared to all citizens, especially those whom you have come in contact with in the athletic arena. Ever have you displayed an interest in sporting matters and have joined in the various sports enthusiastically, and you have always been known to play the game and play it fair. To be successful in sport one must always act the gentleman; you have been a gentleman at all times and consequently have been a "king pin" in the sport. In curling especially, will you be missed, but it would be unfair to discriminate, suffice to say that

Diseases and Troubles Of the Poultry Kind

ALPHABETICAL LIST OF AILMENTS WITH THEIR DESCRIPTION—MAY BE USEFUL TO FANCIERS OF POULTRY.

The following hints will, perhaps, help in the prompt detection of the difficulty or disease which may be troubling a fowl.—Administering Medicine.—Too often it is a profitless expense. Avoid the necessity for it by retaining the health of the flock. Abdominal dropsy.—Abdomen distended with liquid, hangs down. Fowl loses appetite, becomes weak and pale. Anaemia.—Poor blood or poverty of blood from lack of proper nourishment, pure air, and sunshine. Apoplexy.—Bursting of blood-vessel in the brain prostrates the bird; comb purple. Asthenia.—"Going light," due to starving, digestive disorder, vermin, blood poison. Atrophy of liver.—Stupor and possibly convulsions may indicate wasting of the liver, induced by lack of exercise, over-feeding, and unbalanced rations. Breakdown.—Abdomen hangs down at rear from excess of fat, fatty degeneration, or disorder of the oviduct. Broken Bones.—Unless the fowl is very valuable treatment is avoided by killing in the table. Bronchitis.—Cold or catarrh may lead to inflammation of the throat, whistling or rattling breath, due to exposure to cold, foul air, draughts, irritating dust. Bumble-foot.—Cushion of the foot has a corn with abscess. Joints of leg may also be affected. Usual cause is narrow perches, alighting on hard floor from high perches, embedding of pebble in sole of foot. Canker.—Painful attempts at swallowing, white, grey, or yellow patches develop on the membrane lining the mouth or throat. Due to colds, catarrh, rough, exposure to cold, dampness, draughts, foulness. Catarrh.—A common cold may continue until breathing is hindered by the inflammation and mucous secretions collected in nostrils and mouth. There is droopiness, loss of appetite, ruffled feathers, wheezing. Chicken Pox.—Yellowish pimples on the head and underside of wings, loss of sight, weakness, paleness. Choking.—Shaking of the head, straining and jerking of the neck in trying to swallow. Cholera.—Diarrhoea, with yellow discharges, rough plumage, drooping wings, contracted neck, great thirst, pale comb, exhaustion; contagious. Colds.—Inflammation of the nostrils and throat from catching cold is shown by sneezing and running at the nostrils, due to exposure to chilling temperature, dampness, draughts. Congestion of the Liver.—Over-fatness and sluggishness sometimes accompany congestion of the liver, due to over-feeding, starchy rations, lack of exercise, and digestive disorders. Congestion of the Lungs.—Over-charging the blood vessels of the lungs, following a sudden or severe chilling, may occur in young chicks or moulting fowls. There is rapid, labored respiration, stupor, and purple color of comb and wattles. Constipation.—Stoppage of the bowels or clogging of the vent may result from digestive disorders, due oftentimes to lack of green food and failure to exercise. Consumption.—Wasting and weakening of the body may be accompanied by foetid diarrhoea. The breathing may be somewhat rasping, and there is paleness of the comb and wattles. Corns.—Hardened and thickened outside of the sole of the foot, due to narrow perches, alighting from high perches on hard floor, pressure of embedded pebble. Crop-bound.—Infection and enlargement of the crop from gorging or stoppage. Depraved Appetite.—Gorging with food, or swallowing substances unsuitable to the digestive tract, causing indigestion or stoppage. May result from lack of grit. Diarrhoea.—Looseness of the bowels caused by sudden chilling or digestive disorders. Diphtheria.—See croup. Dysentery.—Excessive and persistent diarrhoea, due usually to filthy food or drink or foul conditions. Eczema.—White pimples show on wattles, increases, increase in size, run together, discharge, and become crusted. Enteritis.—Inflamed condition of the mucous lining of the stomach and intestines, resulting from acute diarrhoea, and caused by poison internal parasites, over-eating, fermented food, condiments, filthy drinking water; especially liable to attack growing and moulting fowls. Eversion.—Protusion of the inflamed oviduct from the vent may result from straining in laying an egg, which is malformed, extra large, or broken within the oviduct or cloaca. Fatty Degeneration.—Fatty particles take the place of the cell tissue of internal organs. Fowls become heavy and sluggish. Frost-bite.—Freezing of comb and wattles shows in stiffness and purple color of the frozen part, which later turns black and drops off. Gapes.—Due to irritation of the windpipe by parasites. Bronchitis may cause gaping. Gastritis.—Loss of appetite, constipation, ruffled feathers, drooping wings, emaciation, exhaustion, due to inflammation or catarrh of the stomach. Hepatitis.—Loss of appetite, sluggishness, pale yellow skin over the abdomen and diarrhoea, may show inflammation of the liver. Inflamed Oviduct.—Irritation of the oviduct may cause straining, rubbing of the abdomen along the floor, ruffled plumage, stupor and paleness. Jaundice.—Excess of bile, resulting from excess of grain food may even cause a greenish stain to show through the walls of the abdomen. Leg Weakness.—Staggering gait, flapping of wings to aid in walking, moving along on the hocks, spitting while eating. Peritonitis.—Failure to eat, restlessness, abdominal pain and heat. Pip.—A dry scale forms in the tongue, due to breathing through the mouth because of other diseases. Pneumonia.—Panting for breath, crackling sound in the air cells of the lungs; effect of sudden exposure to cold and damp conditions. Poisoning.—Salt, nitrate of soda, arsenic, lead, copper, phosphorus, may poison fowls. Roup.—Discharges at nostrils and mouth, frothy or running eyes, well-ed head, offensive breath, carker spots, difficult breathing and swallowing, loss of sight, exhaustion, are some of the signs of this scourge, which attacks fowls, especially when they are subjected to exposure to extremes of heat and cold, dampness, foulness, filthiness and neglect. Tuberculosis.—Wasting fever, and sometimes diarrhoea are the exterior signs which may accompany the internal work of the tuberculosis bacillus. Vertigo.—Giddiness, staggering gait, walking in a circle, slight convulsions and throwing of the head up and back or to one side, are signs of a rush of blood to the brain, with possibly a slight hemorrhage; especially liable to effect old and very fatty fowls. Worms.—Internal parasites; prepare the way for several diseases.—Feathered Life.

Keep all the kitchen utensils in one place and a small one at that; it will save time and steps.

Atlanta, Ga., Jan. 6.—Mrs. Florence Maybrick, the American woman who was convicted in England of poisoning her husband and sentenced to life imprisonment, but who was released a few years ago and has since been on the lecture platform, is soon to be married to Charles L. Wagner, of Chicago, secretary of the Slaton Lyceum Bureau. Mrs. Maybrick has been lecturing under the auspices of this bureau and has been thrown into close contact with Secretary Wagner.

Wedding Bells Ring For Mrs. Maybrick

WOMAN WHO FIGURED IN FAMOUS TRIAL TO WED.

Atlanta, Ga., Jan. 6.—Mrs. Florence Maybrick, the American woman who was convicted in England of poisoning her husband and sentenced to life imprisonment, but who was released a few years ago and has since been on the lecture platform, is soon to be married to Charles L. Wagner, of Chicago, secretary of the Slaton Lyceum Bureau. Mrs. Maybrick has been lecturing under the auspices of this bureau and has been thrown into close contact with Secretary Wagner.

THE EARTHQUAKE.

We fret the earth with plough and stick The rolling seasons through, We dam the rivers at the source And make their courses new. We tunnel through the solid rock And pierce the mountain side, We chip away at isthmuses And continents divide. We sink our shafts deep down for gold Throughout her breadth and length, We build our towers high and deep And glory in our strength.

Then, as the sleeping dog endures No more the case and scuff, She yawns a bit and with a shrug She shakes the pygmies off. —McLanburgh Wilson, in New York Sun.

The Prices Ruling on the Lindsay Market

GRAIN AND PRODUCE QUOTATIONS FOR OUR READERS.

Owing to the state of the weather very little farm produce was on the market Wednesday, although Clerk Callaghan was kept somewhat busy at the scales weighing hay, etc. Wood also was to be had, there being several loads of hardwood and mixed wood standing in the square which caught the passerby's eye as they passed and kept the owners busy settling discussions and answering questions. Flour, best Manitoba, \$3.15 per cwt. Rolled Oats, \$2.65 per cwt. Fall wheat 87c. per bush. Spring wheat, 82c. per bush. Goose wheat, 82c. per bush. Buckwheat, 50c. per bush. Barley, 45c.-48c. per bush. Rye, 65c. per bush. White oats, 35c. per bush. Large peas, 90c. per bush. Small peas, 80c. per bush. Potatoes, 40c.-45c. per ton. New hay, \$10-\$11-\$12 per ton. Eggs, 28c., 30c. Butter, 28c. Sage, 5c. per bunch. Chickens, 45c. per pair. Hens, 60c. Ducks, \$1.00 per pair. Geese, 10c. per lb. Turkeys, 17c. per lb. Live hogs, \$6.00. Pork, 10c. lb. Beef cattle, 4c. t of 1-2c. per lb. Beef, retail, 12c. to 13c. per lb. Lamb, 9c. to 10c. per lb. New hay, \$10, \$11 and \$12 per ton. Apples, 75c. per bag. Cream, 15c. to 30c. Lard, 15c. per lb.

CAMERON.

(Correspondence Free Press.) Jan. 4th.—School re-opened to-day with a big attendance under the management of Miss Martha Langford. To-day being election day our village assumed quite a lively appearance and each seat was strongly contested. Mr. and Miss E. Gibbs, of Peterboro, spent a few days last week at Mr. H. Perrin's. Mr. B. Eyres and Miss A. Graham, of Lindsay, visited at Mr. H. Eyres over Sunday. Mrs. Hall and two children, of Campbellford, have returned home, after a short visit with her parents, Mr. and Mrs. M. Maybee. Mr. E. McNabb, Miss P. Perrin and Miss L. Rowan have resumed their studies at the L.C.I. Miss Annie McNabb, of Toronto, was a guest for a few days of her brother, Mr. John McNabb. Mr. A. Townsend and two daughters, of Burnt River, paid a flying visit on Saturday to Mr. W. Townsend.

GOUGH'S STORE DRAWING BIG CROWDS.

No one could pass the clothing store of B. J. Gough this week without being struck with the thought that something special was going on inside. The front of the store is covered with green signs, with eighteen inch letters of white, that tell their own story. There is something in the effect that suggests that idea of something doing, and to-day the rush inside proved the good foundation for such suggestion. The store, despite all general slackness of trade, and talk of the dull season, was busy indeed, and there is little doubt but that the rush will continue for the next three weeks, increasing in volume of trade rather than decreasing. The heavy stock inside is marked down in many cases below cost and assuredly there is a feast of bargains in all lines. Having confidence in the revival of good times, Mr. Gough purchased a large stock for the winter and spring trade. Much of this he is determined to clear out, believing that he will be better off in a business way by losing a little on the lines than attempting to break his rule of not carrying over any stock to the next season. Those who need winter goods would certainly do well to call and inspect Gough's big stock of fashionable goods of quality and share in the big offering of big bargains.

BIRTHS, MARRIAGES AND DEATH FOR DECEMBER.

For the month of December, the official returns for Lindsay show: Births, 11; marriages, 12; deaths, 15.

HEATON AND LEMIEUX ARE CONFIDENT OF SUCCESS

Henniker Heaton Gives Lemieux Credit

CHEAP CABLES CERTAIN

Australia Will be Represented at All Red Route Conference

(Special to The Free Press.) London, Jan. 6.—At Melbourne the prospects of the consummation of the all-red route have been greatly improved by the conference yesterday between Dr. Coultter and Mr. Fisher, the Federal Premier, with Mr. Thomas, the Postmaster-General. It is expected the latter will agree that Australia shall be represented at the proposed meeting of officials representing all the Governments interested to work out the details of the scheme. Mr. Coultter reported that the British and New Zealand Ministries will adopt a favorable attitude. Mr. Thomas personally supports the scheme cordially and the conference will be resumed on the thirteenth. Shown an Ottawa message to the effect that the Canadian and British Governments are considering a scheme for the establishment of a near date of two pence per word cablegrams, Mr. Henniker Heaton said Mr. Lemieux was a great imperialist. "His presence here this winter gave an impetus to the movement for penny-a-word cables impossible of attainment otherwise. He left with the statement that he was quite satisfied regarding the results of his negotiations and that it would come. He would be back in the spring to conclude them in what he hoped would be a satisfactory manner. "I am perfectly certain Mr. Lemieux will adopt one of two courses. He will either propose to the cable companies to reduce their rates so as to place cabling within the means of the mass of the people or in the event of their declining to meet him he will propose to construct with the aid of the British Government and the Governments of Australasia state-owned cable or cables capable of carrying from ten to twenty million words a year at a cost of two pence per word. The moment Parliament meets Sir Edward Sassoon, who is chairman of the telegraph committee of the Commons, will summon a meeting in support of Mr. Lemieux. There is every reason to believe we shall have the support of Mr. Lloyd-George. Meanwhile I may say Mr. Lemieux has the strongest assurances of financial support from Australia."

PARIS PROPHETESS PREDICTS 1909 WILL BE YEAR OF BLOOD

FORESHADOWS ALL SORTS OF DISASTERS TO NATIONS OTHER THAN LA BELLE FRANCE—ENGLAND TO SUFFER—DESTRUCTIVE FIRES—ROYAL DEATHS.

The Year 1909 Will be a Bloody Year.

Such is the prediction of Madame de Thebes, the famous Parisian Prophetess, who is credited with predicting the assassinations of President McKinley, President Carnot and the King of Italy; the Spanish-American war and the "Frisco" quake. Mme. de Thebes has made the following predictions: I predict that the year 1909 will be a "red year." It will "en under the influence of the planet Mars. Never has menace of war been more terrible for the civilized world than the one that bears the coming year. All over the world there will be battles and effusions of blood. This, it seems to me is inevitable. France will be mixed in a great conflagration and will enter into a new era of adventure and developments. The period of the greatest danger will be between August 1909 and February 1910. It will be a year of victories for France. It is especially against her that the dangers are turning, but she will conquer all her enemies. We will conquer on land, but on sea we shall be unfortunate. It will be a year of storms without precedent at sea. The peril that will set fire to the whole of Europe will arise out of a question dealing with Africa, but not out of the one dealing with Morocco. The meteorologists have not yet recovered from their astonishment caused by the accuracy of my predictions on the temperature of 1903. I forecast that we shall have a hard and long winter, which will be remarkable by very mild days followed immediately by very bad ones. The spring will be particularly cold with sudden changes of temperature that will cause a good many deaths. It will be a remarkable season for epidemics. Destructive Fires. The year will abound in destructive fires. I can see nights rendered all red by flames. A town in the south of France will be flooded. A town in the west of the United States will be reduced to cinders. It will be a bad year for love and speculation. It will rather favorably to conquerors, soldiers, statesmen and builders. Few men will be happy in love next year. The most extraordinary scandal of the year will take place in Paris because of the hatred of two women. Beware of women with red hair in 1909! Beware of intrigue and of women who seek to revenge themselves.

England to Suffer.

England will suffer serious checks in her colonial expansion. It will be a year of great danger for the King of England. The Austrian emperor will die and his successor will render to his country its former place among the nations. On the other side of the ocean, in America, I see a year of catoclysms. Nature itself will be hostile to the new world. There will be inundations, few storms, cyclones and earthquakes. I have the vision of a cyclone that will devastate the south of the United States. The American Latins are preparing themselves to induce revenge on the American Anglo-Saxons. The countries of South America will resist the attempts of the United States to intervene in their own affairs and will inflict a number of humiliations and defeats to the great republic of the north. Russia will see the renewal of her revolutionary troubles, but if she remains faithful to France and rejects the influence of Berlin, she will come out unmoested. It will be a fatal year for old men among the crowned heads of Europe; the event that will create the greatest sensation will be the downfall of a new realm in the south-east of Europe. Royal Deaths. There will be two deaths in the royal family of Italy, and two deaths in the Vatican. There will be much excitement and a great conflict concerning the Papal throne. The year 1909 will see vast emigration of young marriageable girls from England to Canada. They will go in full convoys towards the provinces of the Northwest. Becoming discontented with the severe climate and the fatigues of the settler's life, they will emigrate in large groups to one of the American states of the north, where they will be arrested by custom officers as aliens. During their detention they will be delivered, taken away and married to organized bands of rich cowboys, ranchmen and miners. Thus will end what might have become an international complication.

PERSONAL MENTION.

(Daily Free Press, Jan. 6th.) —Mr. E. H. Hines, of Haliburton, was in town to-day. —Mrs. Earl, of Wilberforce, called on town friends yesterday. —Mr. A. O'Loughlin to-day received a telegram announcing the death of his aunt, Mrs. Wrightson, of Port Hope. Mr. O'Loughlin leaves this evening to attend the funeral, which

takes place tomorrow (Thursday) morning. —Mr. R. W. Williams, of Winnipeg, is a guest at the Simpson house. —Mr. Jos. Irwin, of Plumas, Man., is a guest at the Pym house. —Mr. Wm. Kennedy, of Bobcaygeon Superintendent of Public Works, was in town to-day. —Mr. George Dettman, of Kinmount, hotelkeeper, was in town to-day on business.
