Pole Burned Down at Cameron and Threw Lindsay in Darkness

Lindsay was enveloped in darkness last night from about ten o'clock and there was considerable scurry for coal-oil lamps and candles in the different households throughout the town. There was also a good deal of guessing as to the cause thereof. Inquiry last Monday elicited the

fact that an insulator had become broken on a pole at Cameron and the high wind which had arisen had blown the wire against the crossarm, which ignited. The fire burned the cross-arm and, extending to the pole, burned down it also, the heat injuring the wire to such an extent as to render it useless for arther conveyance of the juice.

The break was repaired at an early hour this morning and there were no places of business inconvenienced a a result of the accident.

The company are to be congratulated upon the promptness with ed with surprisingly infrequent occasions of this kind, which goes to show how careful are the officers of the company to give the best service possible under all circumstances. Even Toronto has its troubles with Ni-

"It so happened," said Duffus, to our representative, "that I had box of Zam-Buk in my pocket, which I used for a sore on my lip, and when I had recovered from the first shock of the acident, I produced the baim, and had it applied freely the scalded parts. At the fime I applied it I was suffering acute agony but within a wonderfully short time Zam-Buk gave me ease. I was able to continue my journey, and upon reaching home I obtained more Zam-Buk and continued the treatment It acted wonderfully well and in a few days had the wound nicely healing, I don't know anything so fine as bealer of burns, scalds, cuts, and similar injuries which workers are so liable to; and in my opinion a box of Zam-Buk should be kept handy in every worker's home.

There is something different and superior about Zam-Buk. Time and again workers in all branches trade have proved its vast superiority over the advertised ointments and Basves of the day. No doubt the fact What Zam-Buk is made entirely from herbal esseces and extracts, while ordinary ointments contain more or tess animal fats and oils, goes a long edy to explain Zam-Buk's superiority.
