

They Don't Drip Oil

The neatest woman that ever lived would consider a Sharples Dairy Tubular Cream Separator an ornament in her kitchen. That's because Tubulars are neat—have no oil cups, oil holes or oil tubes to drip. You don't need an oil can for Tubulars.

Tubulars Are Neat

To oil the Dairy Tubular simply lift the gear case lid once a week and pour a spoonful of oil right down among the gears. The oil stays there. The lubrication is perfect and never forgotten. There is no dripping on the floor. Both men and women appreciate that—and the many other exclusive fine points about Tubulars—fine points other separators don't have. Tubulars double dairy profits and cut the work in half. Come in and see the Tubular—examine it inside and out—next time you're in town. Welcome to look at every piece—and the pieces are few because the Tubular is mighty simple.

Old Separators taken in exchange. We sell the Sharples Mechanical Milker.
