Mrs. Carroll, of Lindsay was the guest of her sister, Mrs. T. Sadler, last week.

OMEMEE ARMORY IS IN RUINS

Continued from page 1. wall has separated from the sides making the situation a dangerous one, as the remaining walls threatened to fall at any time.

The structure is a total loss, and the villagers could not realize that a fire would bring such destruction to a building of this character. A class of instruction was held in the armory last night, but this was dismissed early in the evening and the lights turned out. The fire is believed to have been caused by an overheated furnace, the armory being heated by hot air. This is only supposition however.

An Appreciation

Mr Fannon's visit is over and we wish to take this opportunity to thank the public generally for the liberal patronage afforded us during his visit. Mr Fannon was exactly as stated, the instructor from the optical college, Toronto, and his visit was simply along the line of higher education. During the past 14 years wonderful advance has been made in matters pertaining to the eyes and spectacles for them and it was simply to keep abreast of the times that we had Mr. Fannon visit us. We have been doing optical business in Lindsay for about 15 years, and last year was the best we ever had, and we greatly appreciate the fact that our efforts to provide the best in glasses that science can produce has met with such hearty approval. His visit was not along the line of teaching us any new methods of Sight Testing, as any optician doing business should know all the good tests before he puts out his sight, but more along the line of light and color as these effect the eye etc. His lecture regarding color blindness will be a means of our being in a position to help every roadster and everyone else so affected. Again thanking the public for so generous a support of our efforts, we remain, yours for the best in spectacles.

R. L. MORGAN Druggist & Optician
