PLEURO-PNEUMONIA AND BRONCHITIS

Brought Mrs. Baker to Death's Door. Father Morrissey's No. 10 Saved Her.

Of the many hundreds of cures wrought by Father Morrissey's No. 10 (Lung Tonic) few are more remarkable than the saving of the life of Mrs. John S. Baker, of 164 Rockland Road (North End), St. John, N.B. She wrote on Oct. 16, 1909:

"I wish to express my gratitude that I am living to-day, saved from the grave by Father Morrissey's No. 10 (Lung Tonic). This time last year I had pleuro-pneumonia and bronchitis, and had been given up to die, and had my lungs tapped in the City Hospital, and never expected to walk again; I was continually getting worse every day. I came home from the hospital, and everyone was watching for me to die. I tried everything but there seemed to be no cure for me.

"I began taking Father Morrissey's No. 10, and the second day I could eat without pain. I used 22 bottles of No. 10, as I was run down right into consumption, and for six months was just a shadow until I began to use it, and now I am in good health, and surprised most of my neighbors by gaining so quickly. I feel it my duty to publish it everywhere I can, as with all I can say I cannot recommend it too highly—it was a life saver to me, and I am very thankful to recommend it, as it is worth all it is said."

Father Morrissey's No. 10 is very different from the many preparations that simply relieve a cough. No. 10 relieves the cause of the cough, restores the membranes of throat and lungs to a healthy condition, and tones up the whole system, giving strength to resist future attacks.

Will Town Own The Gas Mains. A citizen in conversation with the Post on Friday on the power question wanted to know if the gas mains on the streets of the town would be included with the local power plant in case the town decided to purchase the same. There are some two miles of gas mains on the streets. There is a four inch main on either side of Kent-st and a three inch main on the side street.

It was pointed out by the gentleman referred to that experts were occasionally visiting this district with a view to boring for oil and Lindsay might, at any time have a proposition from syndicate offering to supply the citizens with gas. In that case, it was held, could be put to good use in case a proposition of this nature was favorably considered.

HON. ADAM BECK AT PETERBORO

Peterboro, May 16.—Hon. Adam Beck, chairman of the Hydro-Electric Commission, arrived in the city today, on the invitation of the City Council to confer on the power question. He was met by the City Council committee, and escorted to the Government steamer, the Bessie Butler, and with the City Council and prominent citizens, was taken down the river. Leaving the steamer, the party were taken over the lock, and then motored to Lake field, where Mr. Beck addressed a meeting of the village council and citizens, referring to the power possibilities on the river and the relations of the commission to the distribution of developed power. He said the commission would make further examination and report on the river power, and also upon Burleigh Falls power, which he understood Peterboro might secure. In case the city did not develop this power companies are willing to do so, and supply power to the commission, who would distribute to the municipalities on the usual conditions, and also to farmers within commercial reach of the transmission lines.

HOUSE BURNED IN EMILY TOWNSHIP

Omamee, May, 15.—On Friday afternoon at 2 o'clock, the house of Mr. John T. Switzer, of the 6th. con. of Emily was burned to the ground, and almost everything in the house was destroyed. The cause is thought to be a spark falling upon the roof of the house, and owing to the extreme dryness of the weather, the fire gained rapid headway before help could be summoned. The property was insured for twelve hundred dollars, which partially covers the loss. Fortunately for the family, there is an old vacant house on the premises into which they will move for the present.

NEWCASTLE MAN HAS DISAPPEARED

Newcastle, May 14.—Reginald Coulson, eldest son of Mr. Jos. Coulson, manager of the Bell Telephone agency here, aged 23 years and unmarried, disappeared yesterday morning before daylight under mysterious circumstances. Having closed the office about 10 o'clock Friday evening he passed into his dwelling in the rear of the office, and after sitting down with his father in the dining-room for a few minutes, complained of feeling tired and retired saying he was going to bed. The father retired as usual, but becoming restless about midnight he arose, and going downstairs was surprised to find the back door wide open, an unusual occurrence. About the same time he saw through a window a buggy drive by southward. Reginald's non-appearance at breakfast was explained by his custom of going out for a morning walk, nor were there any fears aroused until the morning had advanced and his collar and tie and other parts of his dress were found in his room. Inquiries were made in every direction, but with no response up to the present.

HYMENEAL HUARD-HOULIHAN.

Examined: A very pretty wedding was solemnized in Lindsay Wednesday morning when Mr. Jos. Huard, of Peterboro, was united in the holy bonds of matrimony to Miss Mary Houlihan, of Lindsay. The ceremony was performed by Rev. Father Casey, in St. Mary's church at 7.30 a.m., after which a dainty wedding breakfast was served at the home of the bride's parents, Miss Clara Herlihey acted as bridesmaid and Mr. M. Fox acted in the capacity of groomsmen.

Obituary JOHN BLAIR.

There passed away this morning at his home 107 Lindsay-st., Mr. John Blair at the age of seventy-three years. The late Mr. Blair had only been out from Ireland a short time, and up to within a few days ago, had been quite active, but since then his illness gradually got worse. The funeral will be held from the residence on Sunday next.

J. W. GARVIN. Mrs. J. W. Garvin, of Peterboro, who recently moved to Toronto, succumbed suddenly to heart disease last evening at Grace Hospital.

Mrs. (Dr.) Chas. R. Sneath, Broadview Avenue, and Mrs. J. Riechist, Palmerston Ave., Toronto, are sisters of deceased, and Mr. Joseph Appelbe, Windsor, is her eldest brother. Mrs. Garvin was brought up in Barrie, where she distinguished herself in early life as a student and teacher. After her marriage she resided in Welland, Woodstock and Peterboro. In her immediate family she is survived by her husband and two adopted children. The burial will take place on Monday forenoon at Barrie.

Meaning of Reciprocity. One of our correspondents says that many people do not know the meaning of reciprocity. A grocery traveller on his regular rounds asked a customer not long ago, what he thought of reciprocity, and the grocer promptly replied that Sojda was taking so well with his customers that he wouldn't think of changing to any other brand of tea.

\$3,600 in Cash Prizes for Farmers Tell Us How You Did It

You may win a prize by doing so

SUPPOSE your friend Bob Wilson, on the next concession, "pulled up" at your front gate on the way back from market and asked about that silo or barn foundation you built, you would be glad to tell him, wouldn't you? And it wouldn't take you long, either, would it? And, as a matter of fact, you'd find as much pleasure telling him as he would in listening— isn't that right? First you would take him over to view the silo or barn foundation. Then you would start to describe it—its dimensions—the kind of aggregate used—the proportions of cement used—number of men employed—number of hours' working time required—method of mixing—kind of forms used—method of reinforcing, if any—and finally, what the job cost. So that by the time you finished, neighbor Wilson would have a pretty accurate idea of how to go about building the particular piece of work which you described. Now couldn't you do the same for us, with this difference—that you stand a good chance of getting well paid for your time? In Prize "D" of our contest, open to the farmers of Canada, we offer \$100.00 to the farmer in each Province who will furnish us with the best and most complete description of how any particular piece of concrete work shown by photograph sent in was done. The size of the work described makes no difference. The only important thing to remember is that the work must be done in 1911 and "CANADA" Cement used. In writing your description, don't be too particular about grammar or spelling or punctuation. Leave that to literary folk. Tell it to us as you would tell it to your neighbor. What we want are the facts, plainly and clearly told. Sounds simple, doesn't it? And it is simple. And surely it is well worth your while when you think of the reward in view. Now sit right down, take your pen or pencil—all out the at-

tached coupon—or a post-card if it's handier—and write for the circular which fully describes the conditions of this, the first contest of the kind ever held in Canada.

Every dealer who handles "CANADA" Cement will also be given a supply of these circulars—and you can get one from the dealer in your town, if that seems more convenient than writing for it.

Contest will close on November 15th, 1911—all photos and descriptions must be sent in by that date, to be eligible for one of these prizes. Awards will be made as soon as possible thereafter. The decisions will be made by a disinterested committee, the following gentlemen having consented to act for us, as the jury of award: Prof. Peter Gillespie, Lecturer in Theory of Construction, University of Toronto; Prof. W. H. Day, Professor of Physics, Ontario Agricultural College, Guelph; and Ivan S. Macdonald, Editor of "Construction."

Having decided to compete for one of the prizes, your first step should be to get all the information you can on the subject of concrete construction on the farm. Fortunately, most of the wonderfully complete books, are contained in our Do With Concrete. A large number of Canadian farmers have already sent for and obtained copies of this free book. Have you got your copy yet? If not, you'd better send for one to-day. Whether you are a contestant for one of our prizes or not, you really ought to have this book in your library. For it contains a vast amount of information and hints that are invaluable to the farmer.

Canada Cement Company, Limited, Montreal

STEPS TAKEN TO RE-ORGANIZE SYLVESTER MANUFACTURING CO.

From Friday's Post. Last evening the Council Chamber was crowded to the doors, the occasion being the meeting called by the Board of Trade for the purpose of considering the proposition to be submitted regarding the organization of the Sylvester Mfg. Co. On the suggestion of the President of the Board of Trade, Mr. F. W. Sutcliffe, the meeting was turned into a citizen's meeting, and His Worship Mayor Beal was asked to preside. The feature of the meeting was the excellent address of Mr. McComb, the systematizer who went into the affairs of the company, and who presented a statement of the conditions as he had found them after A MOST THOROUGH INVESTIGATION.

which proved a revelation to the large majority of those present who were not aware that Lindsay had in their midst an industry with such splendid possibilities and so well equipped for successfully handling increased business which will assuredly come its way if it is placed on a good, sound basis.

The result of this meeting was the determination of the citizens to do what they could to assist in reorganizing the concern, and a good strong committee was selected to cooperate with the gentleman directly interested in the proposition. MR. FIELDING. Mr. Fielding was the first speaker. He said all knew the object of the meeting. It was for the purpose of considering the future prospects of the Sylvester Manufacturing Co. The speaker, after referring briefly to some of the difficulties encountered by those interested in the reorganization of the concern, stated that in his opinion the proposition to be submitted at the meeting was the best yet considered. The assets of the Company were good, as was also the future, if the concern was placed on a good basis. There was no difficulty inherent in the business itself.

In January this year plans were made by the Company for the re-financing of their business through Toronto parties, and the season's manufacture was begun, but unfortunately the party who undertook this work was shortly afterwards taken ill and was unable to carry out his original plan, and about four weeks ago when it was seen that the syndicate formed in January would be unable to place the Company on a sound financial basis, work was practically suspended, a manufacturing systematizer was employed to go over the affairs of the Company and devise a plan for re-organization. A MANUFACTURING SYSTEMATIZER. Mr. McComb, the manufacturing systematizer, who looked into the affairs of the Company, made a rattling address which inspired the meeting with confidence and enthusiasm. Mr. McComb said that in April he was asked to come and examine into the physical and financial condition of the Sylvester Mfg. Co. On coming he was surprised to learn of the condition of affairs prevailing. In all his experience in his official capacity with manufacturing concerns, there was no Company which occupied so unique a position as did the Sylvester Co., in liquid assets it had three dollars in assets for every dollar in liabilities.

The Sylvester Co., it was found out was unable to raise money, but strange so say it was in a better financial condition than many other industries that were borrowing more money than was sufficient to put the local Company in good standing. Before advising Mr. Sylvester as to his future course, Mr. McComb said he found it necessary to go carefully into the affairs of the Company in all its details. Afterwards Mr. McComb informed the Board of Trade that it was absolutely necessary to put the proposition, as was formulated, before the people. Mr. McComb said he was not in Lindsay as a promoter, or for individual or selfish motives. He was here as a systematizing engineer, and in the interests of a plan for the organization of the Company on a strong basis in order to have it remain in Lindsay. It was a proposition to be dealt with by the town. Mr. McComb stated that he had

made a most thorough examination of the affairs of the Company, covering a period of four weeks, so he came before the meeting with a full realization that it was necessary for the citizens to take the initial steps towards reorganization if they wished the industry to remain here.

Mr. McComb next took up the appraisal of the Sylvester Co. and submitted a most convincing statement for the consideration of the meeting.

The determination was made on the net basis and every questionable item in assets was eliminated and all contingent liabilities included with the discounts, so that the figures to be used as a basis for the reorganization are most conservative in the showing made.

The bank credit and debit are treated separately, and the pledged collateral amounts to \$31,455.00 to secure \$24,249.00 borrowed, and these are not included in the assets below.

The plant and machinery is valued by experts is \$83,550.00, subject to lien of town of Lindsay, now \$3500.

The liquid or commercial accounting is as follows: Assets—Inventory raw and finished goods, goods in process \$ 56790.00 Books, accounts and bills receivable 31920.00 Cash in process of collection 11000.00

Total 99710.00 Liabilities—All liabilities, accounts and bills payable 29294.00

Surplus 70416.00 It is astonishing that the Company has in live liquid assets so large a surplus. In fact, these assets are over three times the liabilities. This makes a most promising basis for the proposed local reorganization.

The situation, said Mr. McComb was astounding, and there was no reason why the Company should not be rolling in money.

Mr. McComb next referred to the Sylvester Mfg. Co.'s dealings with the banks, explaining that phase of the situation to the satisfaction of his audience. They were not going to organize an insolvent concern, as the local Company was perfectly solvent. Every person who had been approached in connection with the proposition were astounded at the conditions prevailing. How to deal with them was the next question, and Mr. McComb stated he had gone west to find out if there was anything inher-

ently wrong in that direction. He learned that there was nothing wrong with the drill manufactured—it was as good as any in the country. He had interviewed the Canadian manager of the great John Dere Mfg. Co., Mr. Hutchinson, who informed him that the Sylvester drill was their only competitor in the great west. Furthermore, in a letter he had been privy-
