This is the work .- Kingston Standard. scase even in England, and the domestic servant problem is getting almost as difficult to solve there as It is on the western continent.

In New York, according to the statement of the commissioner of Aicenses, 100,000 more servants can find work. In every other city in the Union similar conditions prevail. In Canada it is nearly as bad. It is not because women dislike home work in itself; it is rather because of the conditions in connection with it that they prefer other employment. In factory a girl has definite hours for work; she has her evenings to herself; she has in many vocations a Saturday afternoon holiday and she has all of Sunday. The work of the noon to-day for Haliburton.

The domestic servant question is servant is never ending even under attending domestic service would be is not adopted, it looks very much as if sooner or later many women will have to do their own house-

CASH RAILWAY SYSTEM INSTALLEL

The firm of J. Sutcliffe and Sons has had installed in their store new cash railway of the Gipe system. It was operated for the first time on Saturday and gave splendid satisfaction. There are eleven stations throughout the store and two The office apartments have also been

lines have been installed upstairs.

The Lindsay Planing

Having taken the business back into my own hands I am prepared to turn out the work as in former times, and ask the continuance of the patronage of my many customers, as has been during the past forty years I have been in business here.

All accounts, either due or owing Williams Bros., will be collected and paid by myself.

GEO. INGLE

MOTHERS AND HEARTLESS SONS

Kingston Standard

We think it was the London Free Press that recently published a letter from a poor mother, asking if her son could not be made to support her. It is a pitiable thing that any such letter should ever have had to be written; it is still more pitiable to have to say that there are children who are so heartless and brutal that they refuse to support their parents when they are in need.

ute, however, it is very generally number of children. If a woman lowed to continue longer than next recognized.

session. The son or daughter able to do so, should be made to support indigent parents.

But is there not in this a larger question, the question of the duty of the State to all mothers of children. If the mother of a family of children is left in destitute circumstances, the State should assume the care of all trought up a family of children, is surely entitled to recognition from the State. Every child that reaches At common law a child is not the age of manhood or womanhood bound to support its parents and no is worth many hundreds of dollars promise on the part of the child to to the country, and the mother, of pay for necessaries furnished to the those children, more than any one parent will be implied from the mere else, is entitled to a pension - the existence of the relation. ZAM-BUK HAS HEALED IT!

Mrs. Wilson, 110 Wickson Ave., Toronto, says: " About four years ago a sore spot appeared on the right side of my face. This spot increased in size until it became about half an inch in diameter and very painful. I went to a doctor, but the ointment he gave me did not have any good effect. The sore continued to discharge freely, and was most painful. I had it cauterized, tried poultices and all kinds of salves, but it was no good, and I continued to suffer from it for four years!

"A sample of Zam-Buk was one day given to me, and I used it. Although the quantity was so small, it seemed to do me some good, so I purchase a further supply.

"Each box did me more and mose good, and, to my delight, before I had been using Zam-Buk three weeks, I saw that it was going to heal the sore. In less than a month it was healed! "I know & lady in the east of the

city, whose husband suffered for years with an open sore on his leg. On my recommendation, Zam-Buk was tried in that case. The other day, when I saw her, she told me that it had healed the sore completely.

"My daughter, who lives in Lethbridge, Alta., has also used Zam-Buk

Children Cry FOR FLETCHER'S CASTORIA

HOW TO FIGHT CATERPILLAR PLAGUE

Examiner: Most of us remember the beastly plague of caterpillars we had a few years ago, what damage they did, how they devoured our fruit trees, how they devoured the leaves of the street trees, how covered the pavements and crushed in slimy messes under feet, how they fell down the backs of our necks, how they crawled over our persons, and how in sum they helped us to realize the bitterness and inconveniences of the plagues that fell upon the people of the land of Pharaoh, who hardened his heart so often. The city had to take the matter in hand, and large sums of were spent in fighting the

caterpillars; prevention is the best remedy. The tent caterpillar (clisiocampa Americana) begins its life (if there is any beginning of its circle of reproduction) in the form of a moth of brownish color, which, in the month of July lays its eggs in the form of bands or "bracelets," around two and a quarter sections of land, twigs of trees, covered with a sort and has it in shares. Milton Staples, of varnish to protect the eggs. These his third son, and Mr. Anderson, are eggs hatch out in the spring, just as engaged in the merchantile business the buds are opening. The larvae at here. They have a fine general store once begin to spin their web and are doing fine trade. The whole which they are protected; and during family have done remarkably well the day they emerge, in thousands to feed upon the leaves. When full grown The spring has been unusually wet they are from an inch and a quarter into caterpillars and so the cycnle of I forgot to mention Mr. James reproduction is completed and main-

As with everything else, so with

Prevention consists in destroying the chrystalis where it can be found under the ledges of fences, etc., or destroying the eggs and finally in destroying the caterpillars in their tents. This can be done by cutting off teeth. Painless extraction asset the twigs, if the tents are on Office nearly opposite Simus twigs, or by crushing the worms in Lindsay. the tents if in the crutch of large branches. Destroying by means of a torch is not certain; unless the tent is broken the flames cannot enter. The gauzy texture of the tent keeps out flames-on the principle of the Davy safety lamp. If we do not destroy the caterpillars as completely as possible, we shall have more trou- branches. ble next year, as we have more worms this year than last year.

ALWAYS RAINS ON MAY 17th.

May 17th should be marked on the McLAUGHLIN, PEEL According to a Queen's avenue lady, BARRISTERS, SOLICITORS and who has reached her 93rd year, it has rained in the city of London for the past 55 years on that date. The infor- R. J. McLaughtin, K.C., A. M. mation is gleaned from diaries which this lady has kept year after year for nearly theigreater part of her life. The condition of the weather each | minion Land Survey day is a feature of these daily entries and going back through the pages every year it is found that there has al- Phone 267. ways been rain on May 17. Sometimes it has merely been a shower, while at other times it has lasted all day. Of MONEY TO LOAN AL ten a thunder storm comes on this date, but no matter in what fashion or for what length of time, the fact remains that it has rained for 55 con secut ve May 17th's. This is a record no other day in the year can equal. Whether it is a co-incidence or merely a day set aside by old Jup. Pluv., on which to demonstrate his rain producing abilities, is a matter of conjecture. The moral is, carry your umbrella on May 17 and hold your Sunday Hopkins, Weeks School picnic on the 18th. -London
