

CHAIRS

...for any room in the house...
for people with all sorts of chair-whims.

Priced to sell to people who would "wait awhile" if the prices were not extremely low. Come in and have a look.

Anderson & Nugent

The Canada Life Assurance Co.

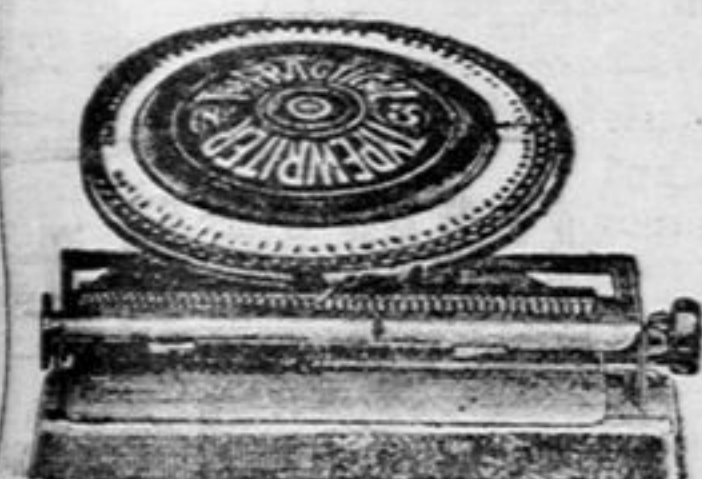

FACTS WORTH KNOWING

THE MORTALITY of the year was again more favorable than the expectation, and this, with a continued LOW EXPENSE RATIO, contributed to the earning of a record surplus.

W. R. WIDDESS

District Manager, Lindsay

PRACTICAL TYPEWRITER

This is one of the best premiums any boy or girl could wish to win—Remember this is not a toy, but is capable of writing from 30 to 40 words a minute. These typewriters given free for selling from 25 to 150 packages of our pretty post cards at 10c per package, according to size of machine wanted. Write for full particulars.

DOMINION SPECIALTY CO., Lindsay, Ont

"This chair looked too shabby to keep, but I made it look like new in odd moments with a small tin of

SHERWIN-WILLIAMS FLOORLAC

—a durable floor varnish combined with unfading pigment stains— That is what many housewives say after using this finish. S-W Floorlac is made in imitation of natural wood effects—Light and Dark Oak, Light and Dark Mahogany, Walnut, Cherry, Green and Clear. Floorlac is made to withstand the hard wear floors are subject to. It gives a good tough finish which does not show scratches or heel marks readily; when water is spilled on it no harm is done. Can be used on old or new floors—for old floors a coat of Floorlac Ground is required before applying Floorlac in the desired color. On new floors it is applied direct and preserves the natural grain of the wood.

Floorlac also gives excellent results on furniture and inside woodwork where a stain and varnish rather than a paint is required. Sold in 1/4 Pt. 1/2 Pt. Pt. Qt. 1/2 Gal. and Gal. cans, full Imperial Measure. Ask us for a color card, we can also show you panels finished with Floorlac.

CHILDREN ARE AT KINGS WHARF

The five McMillan children, which were taken in charge a few days ago by the local agent of the Children's Aid Society, and who were afterwards taken away by their father, are at present with their grandmother at King's Wharf. The Society had left the children at the home of Mrs. Lyewood, who had been employed to care for and board children, when they were taken by the father. It might be stated that she is not a relative of Mr. McMillan. The Society is proceeding with the case, with a view to securing the children.

BAD ACCIDENT AT THE FALLS

Fenelon Falls, May 7.—On Wednesday afternoon Mr. Edward McKinnon was the victim of a serious and painful accident while driving Mr. Geo. Martin's team. It appears that he had been out with a load of lumber for Mr. Martin's new cottage, and when returning with the empty wagon the horses took fright when at the railway crossing, and making a bolt threw Mr. Wilkinson from his seat to the ground, where one of the wheels of the vehicle passed over him, fracturing the bone of an arm above the elbow. He also sustained several severe cuts and bruises about the face. Mr. Simmons conveyed him home in his auto, and medical aid was at once secured. At latest reports he was resting easily and progressing as well as could be expected.

MURDERER HANGED IN NOVA SCOTIA

(Special to The Post.)

SYDNEY, N.S., May 9.—Frank Haynes executed the murder of B. S. Atkinson on the scaffold yesterday afternoon at 5.41. The hangman, followed by the two ministers, preceded Haynes who walked firmly to the scaffold. Standing in the centre of the trap and with the noose placed around his neck Haynes asked for the doctor who placed a morphine tablet in the prisoner's mouth. His words to the doctor were his last.

Haynes made a full written confession of his crime in the presence of Jailer Karn and Captain Fuller.

Pioneer Railway Builder Dead.

BROCKVILLE, May 9.—John G. Steacy, a railway contractor of continental reputation, died at his home here yesterday, aged 77. In early life Mr. Steacy was associated with his father in the erection of passenger stations and engine shops along the line of the Grand Trunk Railway. He was the senior partner in the firm of the J. G. Steacy Co. which built the first fifty miles of the European & North American Railroad, running out of St. John, N.B.

NEW ONTARIO A GREAT HERITAGE

Continued from page seven

FIELD CROP PRODUCTION. New Ontario produces over 40 per cent of all the field crops of Ontario. We glory in the productiveness of the western wheat lands, yet our own province of Ontario produces over 26 million dollars more in field crops than the two largest producing provinces of the west. We have agricultural lands double and treble in area in New Ontario than we have in other cultivation in Old Ontario.

AREA OF NEW ONTARIO Do not judge New Ontario by a hurried trip through certain parts by railway, a total trip of a few hundred miles, while there are thousands of miles of Ontario to the west. There are large areas where it would be a crime to put down a settler to make a living. There are fine waterfalls, rocks and much fine land also.

TEMISKAMING DISTRICT I will speak of Temiskaming mostly tonight because that is most in the public eye. We have heard of the vast area of fine land in the great clay belt. There are other huge sections of fine land, but only fractions so far have been taken up. Good land extends a thousand miles in length and over a hundred miles in width. Mr. Hearst then told of an extensive explorative trip he had taken through New Ontario last year. He described the different stretches of land he passed through, good land, rock and timber. He travelled over four thousand miles in the trip.

THE CLAY BELT. In the clay belt the speaker said, "we have better agricultural land than in the prairies. The depth of land is wonderful. Soil taken from a well sixty feet tested rich very productive."

REMARKS CRITICIZED Professor Fernow condemns some of my remarks. He has not had even a fair chance to see the country. He took a two day trip through it on the railway at twenty or thirty miles an hour and his vision was limited on account of a snow storm that was raging. (As will be remembered, Professor Fernow condemned Haliburton County not long ago.)

NEW ONTARIO MINES.

Over twenty thousand men are employed in New Ontario mines with a pay roll of thirteen million dollars.

The production of metals is enormous. The gold camp of Porcupine bids fair to make Ontario more famous than the silver mines of Colorado. Don't let this make you go out and buy stock because there are as many people mining the pockets of the people of Ontario as there are working her mines.

The staple mines like iron, etc. are the real wealth producers to the people of this province. More men are employed by this class of mine with a larger pay roll than any of the others, and this is what is important to the people of Ontario.

PRODUCTION OUTLOOK

Hon. Mr. Hearst spoke of the high productiveness and outlook of the copper mines. One seventh of the world's silver is produced in Ontario, and seventy-five per cent. of all the nickel in the world is produced in Ontario.

TIMBER INDUSTRY

Over fifty millions of dollars have come to the public treasury through Ontario timber since confederation. The industry is going ahead in huge strides, having gone ahead over four hundred per cent. in the last few years. Our province produces one half of all the timber produced in Canada. In the past there has been a good deal of waste of timber, but now we are trying to conserve the timber for the best interests of the country in the future. If a land is not suitable for settlement, settlers are kept out and the land treated with a view to the proper results from the timber. We protect the forests from fire by a huge army of fire rangers. Mr. Hearst then named the different huge areas of provincial parks where the timber was being kept.

AVAILABLE WATER POWER.

The speaker spoke of the thousands of water powers in Ontario. Some in New Ontario are almost as large or powerful as Niagara. New Ontario will be the great manufacturing centre of not only Canada, but of the North American continent.

DEVELOPMENT OF COUNTRY

Nothing will cement the east and west together like the settlement and development of this great north country. We will have a united Canada, a dominating influence in the English speaking world.

Mr. Hearst spoke of what he was aiming to do in developing this country. Roads are being built in advance of the settler to make his lot as easy as possible, and to induce settlement.

We aim to induce industries that use different woods to locate in this country, so the settlers can sell the wood they take of their land. Huge paper and pulp mills are being established throughout the north land. The settler in Northern Ontario has large advantages over the settler in the West as they can immediately get a revenue from their timber and do not have to wait to break land and sow crops before they can get a revenue.

The numbers of new settlers are increasing by leaps and bounds.

RAILWAY FACILITIES

So far we have comparatively little railway facilities. Most of the railways go through barren land. Next year the National Transcontinental will be in operation through thousands of miles of fine country. Two other lines will also traverse fine land, the Algoma Central and the Canadian Northern. Northern Ontario has increased 114 per cent in the last three years in population which is faster than every other province in Canada except one.

UNIMAGINABLE RESOURCES

We have a country of unimaginable resources and possibilities. We produce the very best. Our ideals are the highest. We are determined to make our country one of the best in the world, and if we are true to our possibilities, we will fill Canada with a glory of achievement unsurpassed.

VOTE OF THANKS

Mr. Wm. Flavelle moved the vote of thanks to the speaker. The address was much appreciated, and gave those present a much greater conception of the possibilities of this great country.

Mr. C. E. Weeks seconded the motion, and referred to the high class addresses delivered during the season by the Canadian Club, and Hon. Mr. Hearst's address was best of all. It was a fascinating story of the bigness and progress of this new land. The committee who nominated the officers for next term knew what they were about. The Club wished they would continue the fine type of speakers they had had during the past year.

Judge McMillan in a few well chosen witty remarks, put the motion, which was passed amid loud applause.

RHEUMA FOR ALL FORMS OF RHEUMATISM

Right away—the first day you start to take RHEUMA—the Uric Acid poison begins to dissolve and leave the sore joints and muscles. Its action is little less than magical. 50 cents a bottle—guaranteed.

Judge Barhorst of Ft. Loraine Ohio, says: "After treatment by three doctors without result, I was cured of a very bad case of Rheumatism, by using two bottles of RHEUMA." E. Szegedy.

REAL ESTATE AGENTS MUST TELL TRUTH

Ottawa, May 7.—A bill to prevent the publication of untrue statements in advertisements, particularly in real estate for sale, was introduced in the Commons by Hon. C. J. Doherty, Minister of Justice, this afternoon. It is an amendment to the Criminal Code, and provides that anyone who knowingly publishes any false statement in any advertisement for promoting the sale of property is guilty of an indictable offence, and liable to a penalty of \$200, or six months' imprisonment, or both.

Mr. Doherty said that there had come into existence very widespread abuses in connection with the advertising of property for sale, particularly in regard to the advertising of real property, in some parts of the country.

"For the Food is the Life."

WHEN YOU ARE ILL

With any disease due to impure blood such as Eczema, Scrofula, Scurvy, Bad Legs, Abscesses, Ulcers, Glandular Swellings, Boils, Pimples, Sores of any kind, Piles, Blood Poison, Rheumatism, Gout, etc., don't waste your time and money on doctors and medicines which cannot get below the surface of the skin. What you want is a medicine that will thoroughly free the blood of its poisonous matter which alone is the true cause of all your suffering. Clarke's Blood Mixture is just such a medicine. It is composed of ingredients which quickly expel from the blood all impurities, from whatever cause arising, and by rendering it clean and pure can be relied on to effect a lasting cure.

Over 50 years' success. Pleasant to take.

Clarke's Blood Mixture

CURES ALL SKIN & BLOOD DISEASES.

STREETLIGHTING IMPROVEMENTS

Dep. Reeve Warren's Proposition for Better Light

Last night Dep. Reeve Warren, chairman of Light Committee, presented his report to the council re a more satisfactory distribution of lights throughout the town. The chairman recommended that three magnetite lights be installed on William-st. south (staggered) at the corner of Glenelg, Melbourne and Durham-sts., at a cost of \$125; an arc light at the corner of Melbourne and St. Lawrence-sts.; an arc corner of William and Pottinger-sts.; two Tungstens on Elgin-st., between Victoria and Albert-sts.; changing of light on St. Paul-st. north.

Dep. Reeve Smale said the whole matter of extending lights should be undertaken carefully. The council could not undertake to light all the town brightly. No one would like to see the outskirts brightened up more than he would. The council must cut their garment according to their cloth. The council could scatter the arc lights and intersperse with small lights. It was a mighty serious matter to move hastily, as an arc light was equivalent to adding \$1000 to the bonded indebtedness of the town.

Ald. Nicholls felt that the council should take one night for each ward and go over the streets thoroughly. There were many corners where there were no lights, but people were paying for them. The committee gave the Chairman authority to substitute Tungstens for arcs at the head of William-st., and also the head of Victoria avenue. Chairman Warren referred to the need of a light at the corner of St. Lawrence and Melbourne-sts. Mr. John O'Reilly who was present, pointed out that a light was needed there. Certain improvements were being made in that section, so that proper lighting was still more necessary. An incandescent would not answer as well as an arc light, as that section of the town to the southeast could be served by an arc.

DIED

BRISBIN—At her home, 15 Thorold avenue, Toronto, on May 10th, 1914, Isabella Macquire, wife of the late Daniel Brisbin of Picton.

Service will be held at her late home, 15 Thorold avenue, on Monday, 7.30 p. m. Burial at Picton, on Tuesday on the arrival of 9.30 a. m. C.N.R. train.

BLANCHARD—At 183 Sherbourne-st., on May 9, 1914, Josetta Blanchard, widow of the late Alexander Blanchard, formerly of Sutton, Ontario, and mother of Mrs. J. A. Gillogly and Dr. Blanchard, of Lindsay, aged 77 years.

CAUGHT ON BRIDGE AND KILLED

Sad Fatality at Campbellford Wednesday

Campbellford, May 9.—Caught in the middle of the P.T.R. bridge, George Staton, an employee of the Weston Shoe Company here, was hurled to his death in the Trent River today by being struck by a freight train. The body had not been recovered tonight. Mr. Staton, who had only recently come here from Toronto, was walking over the track from the factory to his boarding house to save a few minutes' time. He had got well on the bridge when the train rushed along and struck him before it could stop, throwing him into the river 30 feet below. The body was not seen after, although several people saw the accident.

The Trent River below the bridge is shallow, but the current is very rapid, and the body has no doubt been carried far down the stream. There will be an inquest. Staton leaves a wife and family in Toronto.

GRAIN SHIPMENTS AT PT. McNICOLL

Following the announcement that the C.P.R. had again cancelled the contract for the new station at Havelock, a deputation consisting of Jas. Thompson, M.P.P., Reeve Kindred and S. S. Joyce, journeyed to Montreal and were fortunate in securing an interview with General Manager MacTier of the C. P. R. on matters relating to the future of Havelock generally. There has been no change in the plans of the station, Mr. MacTier said, and it is the intention of the C. P. R. to build the station early next year, and when built will contain offices for the Asst. Supt., despatchers and the necessary staff. The General Manager also informed the deputation that the Port McNicol business was increasing rapidly, the grain shipments having increased from 5,000,000 bushels in 1912-13 to 9,000,000 in 1913-14, and that Havelock would always be the divisional point.

BORN

MacKENZIE—On Saturday, May 9, at Blenheim, Ont., to Mr. and Mrs. D. A. MacKenzie, a daughter.

McMAHON—In Lindsay on Thursday May 7, 1914, to Mr. and Mrs. Jos. McMahon, Simcoe-st., a son.

TORRANCE—In Lindsay, on Thursday May 7th 1914 to Mr. and Mrs. Harry Torrance, Elgin-st., a son.

PINEAPPLES

Are now at their best and we buy only the best Selected Pines. Leave your preserving order now and we assure you of satisfaction at low prices.

See our Kent-st. window display of fruits and vegetables. It shows the high class quality of our goods.

We carry a full line of Garden and Vegetable Seeds.

We have just received a car of

Delaware Potatoes

grown in Manvers. We can confidently recommend them for seed or for the table.
