Thursday was an ideal day at Sturgeon Point. There was hardly a ripple on the lake, but it was by no means stifling hot on the shore.

The golf grounds by Judge O'Leary's cottage are in first class condition and very pretty with the grass still green before the heat of summer.

The other club's golf grounds, situated immediately behind the Point, are also in good condition.

Stop Those Headaches.

Headache and neuralgia are pronounced signs of blood poisoning. This poisoning of the blood comes from the waste matter of the body from left in the system, instead of being regularly carried off by the bowels, kidneys and skin.

Poor skin action also causes headache and neuralgia. Impurities cannot escape through the skin, so the blood must take them up and deposit them on the nerves.

If the bowels and skin are not riding the system of waste, the kidneys try to do so and are overworked.

There is just one way to cure headaches and neuralgia—to regulate bowels, kidneys and skin so that all the portions of the body will be properly carried off.

'Fruit-a-tives' keep blood pure and rich—relieve the stomach and kidneys—regulate the bowels; and invigorate the skin to healthy action.

'Fruit-a-tives' are a wonderful discovery, being a combination of fruit juices and tonics. 50c a box—six for \$2.50. At all dealers, or from 'Fruit-a-tives' Limited, Ottawa.

The trip from Lindsay to Cobocok is one of the most beautiful on the Kawartha Lakes, and should be well patronized this year by Lindsay and Fenelon Falls people.

Garden Party to Conference

Ladies Aid Tenders an Entertainment to Visiting Delegates

The Ladies Aid of Cambridge-st. church gave a garden party on Saturday afternoon in honor of the visiting ministers and laymen. The function took place at the home of Mrs. R. M. Beall, Adelaide-st., and was from four till six o'clock.

The conference adjourned shortly after four to allow all those who wished to go, and without exception, it is said, every body in town for the conference attended the garden party.

That the event was successful in every way is to be believed if the expressions of the ministers count for anything, and apparently it would be very bad form not to believe all they said at all events. The handsome place of Mr. and Mrs. Beall looked especially inviting to the hard worked laymen and clergy and the two hours' recreation gave also ones of pure enjoyment. The guests could not say enough in praise of all the arrangements.

Later in the evening votes of thanks were moved to all the ladies of the church who had anything to do with the entertainment of the visitors, as well as to the banks, who lent them money and the newspaper writers who wrote up the conference.

Closing Picnic Held on Friday Afternoon—League has Now One Hundred Members

The Gospel Temperance League held their closing excursion to Hut-ton's grove Friday afternoon under the most favorable skies. The weather was certainly smiling upon the event. The calls supplied by Mr. Workman, rolled along in merry time with the temperance songs sung by the children.

This closes the meetings until after the holidays. The opening meeting will be daily announced in the fall. The league closes with a membership of one hundred and the workers hope all the members will have a delightful summer.

The Rambles of a Post Man

Visits Omeme and Tells of His Impressions

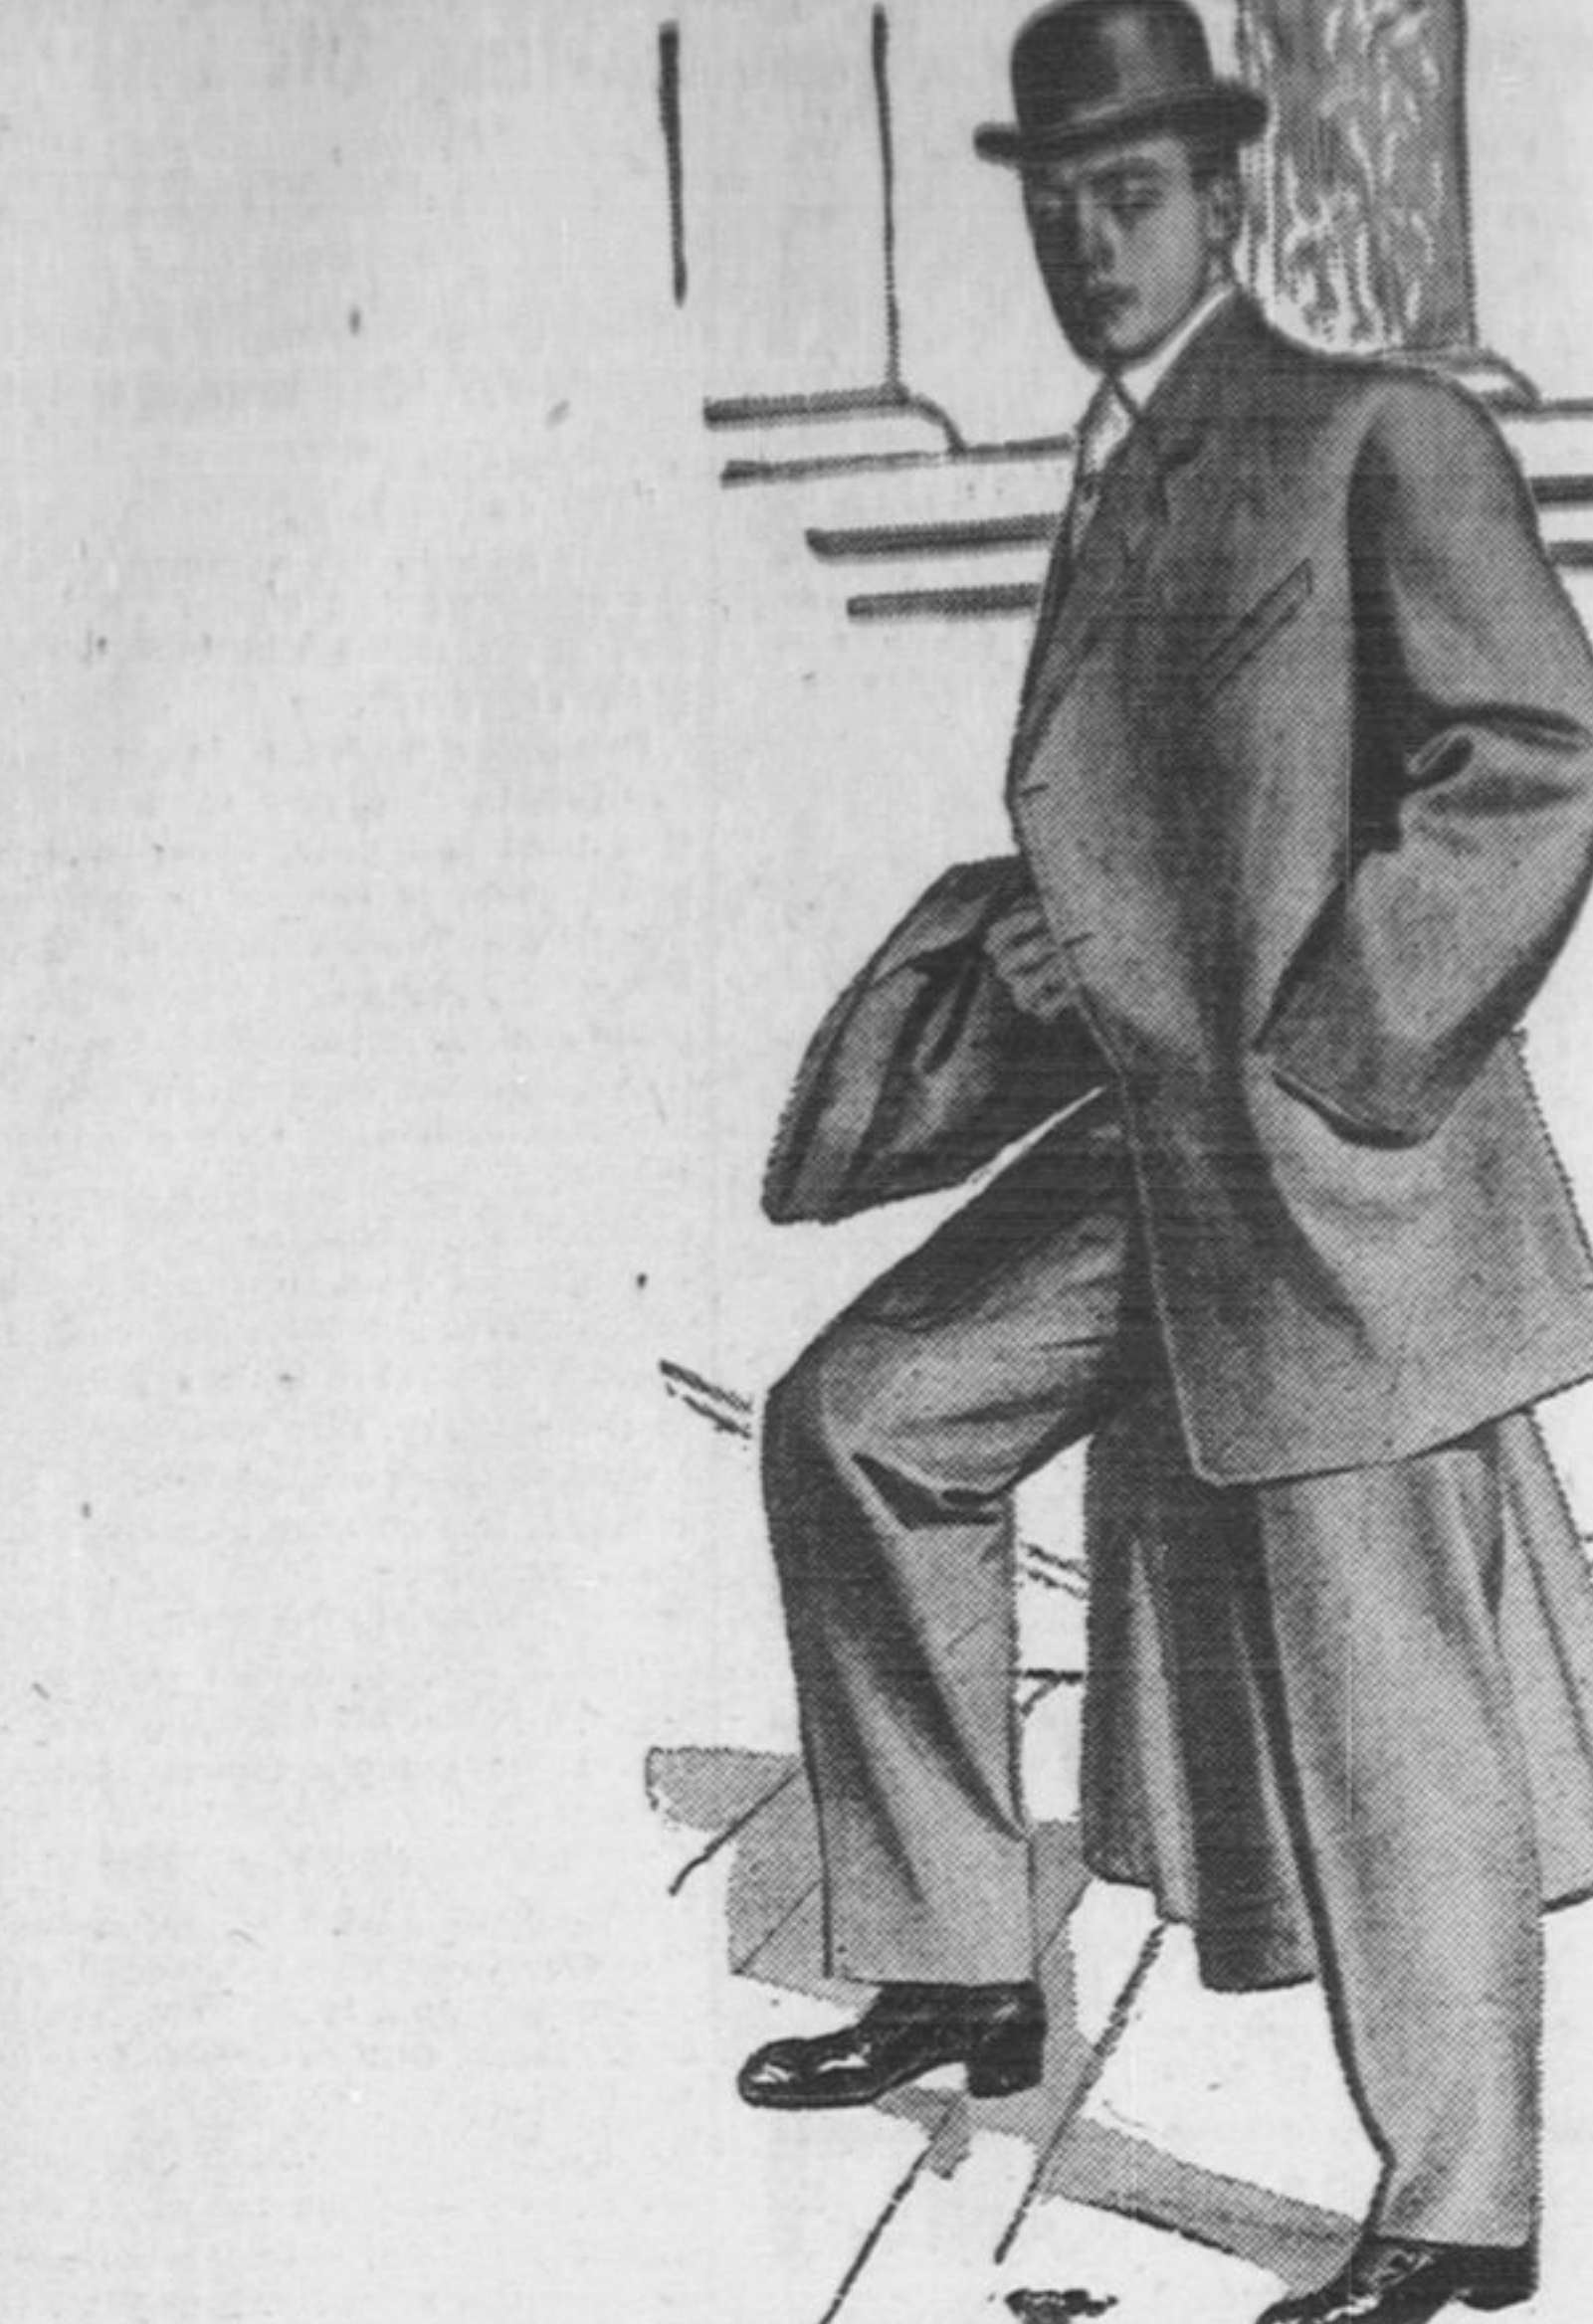

During the rambles of a representative of The Evening Post, a hurried visit was made to Omeme and several scenes of industrial activity inspected. The first impression upon entering the village from the G. T. R. railway station suggests that rural atmosphere, fair, easy going country village where all is more like Long-fellow's 'Blacksmith' with measured beats and slow, but under the friendly escort of Mr. Thornton, quite a different aspect of the Omeme character came into prominence, and no small amount of interest was evinced by the ever aggressive citizens.

In the forth coming elections and its effect upon their general industries for not without good reason do they watch the commercial state of the Dominion.

One of the most noted is the tannery, of Mr. J. Lamb, where a large staff of workers are constantly employed, turning out some of the best quality of harness leather that is produced in the Dominion. Mr. Lamb has made a special study of that class of work for over fifty years and has earned for himself a reputation and a good market for every pound of leather he can produce. It is quite an extensive plant of all up-to-date machinery, and within four months after the hide is taken from the bullock, Mr. Lamb guarantees to turn out the best side of leather a harness maker would wish to handle and as an evidence of his faith in the continuance of his business he has over 600 tons of bark ready for tanning purposes.

A little further on, standing out conspicuously, is that indispensable in all farming centres—a cheese factory. The present owner, Mr. Teaford, is just starting his first year and gives every sign of making his undertaking a thorough success. A few alterations in the arrangements of the plant are under way and preparations for an increase in business. The present output is from 80 to 100 cheeses a week, and with the same process of manufacture, could be found for fifty a market could be found for it, provided that amount, for it is produced by G. J. Cameron, dairymonger, to be of first quality, and has the distinction of a ready sale in the English market.

The comb flour mills and electric plant shows that Omeme is keeping step in the rank of time. For that business current is generated by the bubbling waters of the 'Pigeon' stream, and it is to be hoped ere long that some industrial factor will give motion, as it does in so many other Canadian towns, to the rolling wheels of tramcars and the ceaseless hum of

Don't let quacks and fakirs rob you of your hard-earned dollars. NO NAMES USED WITHOUT WRITTEN CONSENT. THREATENED WITH PARALYSIS. Peter E. Summers, of Kalamazoo, Mich. I was troubled with Nervous Debility for many years. I lay it to indigestion and excesses in early youth. I became very despondent and didn't care whether I worked or not. I imagined everybody's imaginative dreams at night, and I was back of my head, hands and feet were cold, tired in the morning, poor appetite, fingers were shaky, eyes blurred, hair fell out, etc. I tried many first-class medicines and tried many first-class physicians, wore an electric belt for three months, went to St. Charles for baths, but received little benefit. While at St. Charles I was induced to consult Dr. Kennedy & Kennedy, though I had lost all faith in doctors. Like a drowning man I commenced the New Method Treatment and it saved my life. The improvement was like magic—I could feel the vigor going through the nerves. I was cured mentally and physically. I have sent them many patients and will continue to do so.
