LINDSAY, FRIDAY, JUNE 27th, 13.

BRITISH GOVERNMENT'S RECORD

The London Chronicle in reviewing the achievements of the Liberal Government of Great Britain during the seven years it has been in power says:

"Surveying its work since 1906 one is amazed at the number and importance of its achievements. We proceed to enumerate the more salient of them:

"Pacification of South Africa by the grant of responsible self-government to the Transvaal and the Orange River Colony.

"Reduction of the income tax on earned incomes to 9d. in the £; sugar duty reduced from 4s. 2d. to 1s. 10d. per cwt.; tea duty reduced from 6d. to 5d. per lb. A total reduction on food taxes of £4,830,000 in a normal year.

"The net reduction of debt effected by this Government since 1906 amounts to £72,700,000. Excluding the sum paid for the purchase of the telephones, the net reduction would be £82,700,000.

"Shops Act, which secures one half-holiday a week to every shop assistant, and provides that proper intervals shall be allowed for meals.

"Old Age Pensions Act. An incidental effect of this Act has been a large reduction in pauperism. Comparing 1906 with 1912, it is seen that in the number of persons 70 years of age and over in receipt of Poor-law relief in England and Wales, there has been a reduction of 20 per cent. in indoor pauperism, and no less than 95 per cent. in outdoor pauperism. In fact outdoor aged pauperism has practically ceased.

"The relief to the Poor-rate from this cause exceeds £1,000,000 a year.

"Passage of the National Insurance Act, which embraces within its scope over 13,000,000 persons.

"Trade Boards Act for the regulation of wages in various trades where sweating conditions formerly obtained. This Act has been an unqualified success.

"Miners' Minimum Wage Act.—A measure for setting up joint district boards in the various coal-fields to determine the minimum rates of wages for workmen employed underground."

CONCRETE CROSSING

WAS A DANDY

Convincing proof of the virtues of concrete as a pavior has been furnished in the crossing on Kent-st running from the Bank of Commerce to Gregory's store. A number of men have been engaged for two days trying to tear it up in order to permit of an extension being made to the asphaltic concrete roadway. The crossing has been so well constructed that it successfully resisted the heavy blows from an iron hammer, and it was only by persistent efforts that pieces of it were dislodged. The crossing was laid down in 1912 by Mr. John O'Reilly, and at that time a member of the Council and Chairman of Board of Works.

A CARD

We, the undersigned, hereby agree to sell a package of five standard size 5c. boxes of Silver Tip Silent Matches for twenty cents. Quality guaranteed. BAKER & BALDWIN.

TRIP TO UPPER TRENT CANAL BASIN

Peterboro Times: A party composed of Supt. McClellan, E. G. Paterson, and W. H. Denham, representing the Trent Valley Power Association, and Mr. J. H. Burnham went north recently to explore the water reservoirs of the Trent Canal. They went as far as the entrance to Lake Bushkung in the County of Haliburton. Apparently there is a large body of water which even in this dry season afford means of a steady flow for the rest of the season. Last year there was a tremendous flow of water in the spring, which was not well conserved, and there was low water when least expected, out this year there has been an improvement. The new dams which are being placed in position are concrete and tight and do not allow of the waste of water which used to go on continually under the dams. Although handling water especially where logs come out is a delicate matter still it can be done and when the logs are all gone it will be a matter of almost mathematical certainty to produce a steady flow throughout the season. The party went to Buckhorn and saw the new dam at Scott's Mills controlling the Mississauga Creek which drains a large area in the interior. In the smaller streams far back the water is as clear as if it came from the mountain snow. The party then by motor went across Squaw river and Nogie's Creek to Bobcaygeon, where it was seen that Sturgeon Lake was full. The party then cut across to Fenelon Falls, where the waters of Cameron Lake were also up to high water mark. Then they journeyed north to Kinnmount, from which they set out the following morning at a very early hour and visited Minden. The waters of Gull River were flowing at the ordinary level. Horseshoe Lake was full, as was 12 Mile Lake, although the latter gave signs of exhaustion. Above these lakes and on each side are Hall Lake, Geneese Lake and several others, but as they would have to be visited by portage and canoe it would require several days more. The party was assured, however, that these lakes were well supplied.

Coming down the Gull River waters Gull River was found to be flowing fairly well into Balsam Lake, as was also Burnt River, which is a small river some ten or twelve miles to the east flowing into Cameron Lake from the village of Haliburton side. The northern source of the Trent is in Dorset township, which is some fifteen miles farther on than the party went.

The only way to see in what condition the Trent waters are from time to time is to visit them. The improvement of late years and facilities for the handling of the water has been very great, and as the logs disappear and concrete dams are built, will be greater. When it is understood that the flow of the Trent through Peterboro is as high in the spring as 450,000 cubic feet a minute, which continues with small variations till possibly the 1st of May, afterwards falls by reason of being held back to from 130,000 to 110,000 cubic feet, it will be realized how much it may be done to increase the average flow.

As the use of power increases the question of supply of power becomes a paramount one for the Trent district, and it will require all the energies of the people and the government to work it out successfully. The water is there, fortunately. It is a question of energy and push. Here tofore, especially in the earlier stages, the Trent Canal, like a great many other things, was made just a means to an end, but if a success is to be made of it, it must be by means of cutting out politics as far as possible and putting in brains instead. This whole district would have been left millions of dollars better off from waste alone if "the interests" had not had such complete control over, if the people had put a little common sense into the matter as well.

A NEW SWINDLE

IN SUBDIVISIONS

Berlin, June 19.—The Berliner Tageblatt reports from St. Petersburg a remarkable swindling affair which, however, is not without its humorous side. A group of sufficiently plausible sharps circulated notices to the effect that the authorities, desirous to establish a new town in the plains near Nakhitchevan, on the Don were prepared to give anyone a free title to 1,000 square yards of land on condition that the settlers fenced in their allotments immediately and un-

dertook to commence building within a reasonable time.

Thousands of people rushed to the spot, where they were received by the swindlers, who assisted them in staking out their plots, and sold them, at high prices, large quantities of material for fencing.

On the following day the men had disappeared, but in their places there arrived a detachment of police, headed by the town prefect, from Nakhitchevan, and the disappointed settlers not only found themselves under arrest for occupying land without legal authority, but lost all their fences and building material, which were promptly confiscated.

Disease Attacks The Caterpillar

June 16.—An enemy in the form of a destructive disease has declared war, with good effect so far, on the caterpillars, which are a plague in large sections of Ontario and Quebec, and millions of the insects are dying of it, according to Dr. Gordon Hewitt, chief entomologist at the Ottawa experimental farm.

From investigations made by Dr. Hewitt, and his staff, the disease is general all over the district, and not merely confined to certain areas. So destructive is the disease that it looks at present as if there will not be such a bad plague of caterpillars next year as there has been this year and last.

SUFFRAGETTES BLAMED.

English Train Narrowly Escaped Being Wrecked in Tunnel.

LONDON, June 24.—What is suspected to have been a militant suffragette attempt to wreck an express train from London to Plymouth in a tunnel near Devonport on Saturday, is reported to-day. A motor belonging to the London & Southwestern Railway, while proceeding through the tunnel along the rails, came in contact with a heavy obstacle. The motor-man made a search and discovered to heavy sleepers wedged between the rails, which the express train was due to pass. The sleepers were removed just as the long train thundered through the tunnel.

Mrs. Beatrice H. Saunders, the financial secretary of the Women's Social and Political Union, who, with five other officials of the militant suffragette organization, was sentenced to 15 months' imprisonment on June 17, for conspiring to commit malicious damage to property, was released on license last evening because of ill-health, owing to her refusal to take food.

THE DANGER OF ANAEMIA

Consumption May Follow Unless Its Ravages Are Checked

There is danger to every girl and every woman who falls a victim to anaemia—that is bloodlessness. They become listless, feel too weak, too wretched and too helpless to take prompt steps to stop the trouble. Too often, through neglect, they fall into a worse condition, forgetting that anaemia frequently leads on to consumption. If you are anaemic in the least degree you should lose no time in beginning treatment, to increase and enrich the blood supply. To do this there is no other medicine so good as Dr. Williams' Pink Pills.

Every dose helps make rich, red blood, which drives out disease and brings again the bloom of health to pale and sallow cheeks. There are thousands of women and growing girls in Canada who owe their present good health to the timely use of Dr. Williams' Pink Pills. Among those who have been restored to health by this great medicine is Miss Rose Neville, Mount Forest, Ont., who says: "Dr. Williams' Pink Pills performed almost a miracle in my case. I was a victim of anaemia, in what my friends considered a dangerous form. I was very pale, always tired out, suffered from severe headaches, and had no appetite. I was taking doctor's medicine for a long time—in fact I tried two doctors—but instead of improving I seemed to be growing worse. My parents were at a loss to know what to do for me and thought I would not recover. Then a friend advised Dr. Williams' Pink Pills and I had only taken them a few weeks when I began to feel better. This greatly encouraged me and I continued taking the Pills for some time longer, and found my health again as good as ever it had been. In fact I am stronger than ever I was before. I have advised the use of Dr. Williams' Pink Pills to other girls who have found the results equally beneficial."

Sold by all medicine dealers or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

FATALLY HURT IN C.P.R. WRECK

NORTH BAY, Ont., June 24.—Two were fatally injured and four were hurt in a wreck last night on the Kippewa branch of the C.P.R. running from Timiskaming to Mattawa. The two who, it is thought, will succumb to their injuries are the two older daughters of Henry Morell, M.P.P. for Nipissing. The others reported to be injured are the younger Miss Morell, Miss Lillian Payette of North Bay, Alois Hennessy, shoe traveler, and Chief of Police Milroy of Mattawa. The injured were all taken to the hospital at Mattawa, and are being cared for there.

The wreck happened nineteen miles north of Mattawa, and was caused by a derailment. The railway runs through a wild, rocky country along the bank of the Ottawa River. The right of way in many places is cut out of the side of the mountain, with the river tumbling far below. It is used largely by tourists and lumbermen. The Misses Morell were returning from the convent at Villemarie to attend their father's wedding, set for Monday next. The elder girl is 13 years of age. Miss Payette was also on her way home from the convent to visit her parents.

Kinetophone is Edison's Latest

In his wonderful invention, the kinetophone, Thomas A. Edison has given us pictures that not only move, but talk. The kinetophone is a combination of the moving picture machine and the phonograph, and its effects are weirdly realistic. The machine is so constructed that the sounds of the voices of the actors in the picture drama are reproduced in the most natural way. When the figures appear to be walking to the front of the stage their voices get louder as they get nearer to the audience and softer as they retreat. When a plate is smashed the noise of breaking crockery is distinctly heard. The notes of the piano or violin are reproduced when an actor plays on one of these instruments, the expression and time being clearly marked. Whistling, singing, opening and shutting of doors, stage thunder, etc., all are heard.

Talking pictures are also to be seen in a similar invention, the kinoplastikon, at the Scala Theatre, London. The effects here are most wonderful. Dancers come from the wings, perform and sing, and retire to the wings again, and after applause comes and bow their acknowledgments to the audience in the most natural manner. What is more, the stage is not in darkness, but is perfectly light, and there is no screen. The illusion of living people singing and dancing as in a real theatre is thus almost complete, for the figures do almost everything that a living artist can do.

EMINENT SURGEON DIES.

Sir Jonathan Hutchinson Dies in London, Aged 85. LONDON, June 24.—Sir Jonathan Hutchinson, the eminent surgeon, is dead.

Sir Jonathan Hutchinson, emeritus professor of surgery London Hospital College, was born at Selby July 23, 1828, the second son of Jonathan Hutchinson and Elizabeth Massey. Educated at Selby, York, and St. Bartholomew's Hospital, London, he became president of the Royal College of Surgeons in 1889-90. He was Hunterian professor at the Royal College of Surgeons, a member of the Royal Commission on Smallpox Hospitals in 1884, and on Vaccination in 1890-96.

He was created a Knight in 1908, and had the degrees of F.R.C.S., M.D., LL.D., and F.R.S. Not only did he occupy a prominent position as a consulting surgeon, but he was the author of a number of important publications.

Forgot His Own Name.

One of the most distinguished orators of the House of Lords confessed that he once forgot his real name. Lord Rathmore, who was raised to the peerage in 1895, has no doubt become accustomed to the title by now. In the early days of his grandeur, however, he was nonplussed when a French railway official suddenly required his name. He could remember that he used to be called Plunket, but had to consult his card case in order to learn his new designation.—London Chronicle.

Might be Right

Archbishop Ryan was visiting a small parish in a mining district one day for the purpose of administering confirmation, and asked one nervous little girl what matrimony was. "It is a state of terrible torment which those who enter are compelled to undergo for a time to prepare them for a brighter and better world," she said. "No, no," remonstrated her rector; "that isn't matrimony; that's the definition of purgatory." "Leave her alone," said the archbishop; "maybe she is right. What do you and I know about it?"—London Opinion.

Not Too Early To select your 2 Pc. Mid-Summer Suit. Every day the assortment is broken more—get yours to-day. Plain grey homespuns and Halifax tweeds in neat airline stripes of grey and white and blue and white combinations, coats half lined, or all lined with fine light lustre, patch pockets on coat and trousers, finished with belt loops and permanent cuffs. Very special values at...\$10.00 and \$12.00. Fancy Flannel Outing Pants, at \$2.00, \$2.50 and \$3.50 pair. White Duck Pants, \$1.00, \$1.25, \$1.50 pair. Cream Serge Outing Pants at \$4.50 & \$5.00. Watch for "The Major" Collar this week on sale at 2 for 25c. DUNDAS & FLAVELLES LTD Clothing Department

BRANCHES AND CONNECTIONS THROUGHOUT CANADA. LOCAL OFFICES: LINDSAY — JANETVILLE. PETER KENNEDY — Manager.

NEW WAYS TO SWAT THE FLY. According to Leslie's, there are adequate methods of fighting the house fly.—Pyrethrum powder burnt in a house stifles a fly until you can sweep him up and put him where he belongs. A little of this burnt in the rooms in the morning—after which the rooms should be aired—will make the house exempt from flies all day. Twenty drops of carbolic acid dropped on a hot shovel, or on any piece of warm iron create a vapor that lays flies low. The common mignonette plant grown in jars and placed in a room makes things unpleasant for flies. A handy thing is the white clover. It is strange, but flies hate the odor in a vase and you will notice that the flies have business in the other direction. This clover should be renewed every day or so for when it becomes dry it irritates the nostrils. A cheap and effective poison, not dangerous to human life, is bichromate of potash in solution. One drachm dissolved in two ounces of sweetened water and placed in shallow dishes will call the long roll for any number of the pests. Another remedy that for all purposes has few equals is a solution of formalin, or formaldehyde in water. A spoonful of this liquid in a quarter of a pint of water left exposed in a room will make the flies scarce in a very short time. Flies are sensitive to light; keep the window curtains drawn, all except one little slit, and they will gravitate toward it. Then you can easily drive them outside.

CHILDREN CRY FOR FLETCHER'S CASTORIA. CAMBRAY (Special to The Post.) The Cambrey branch of the Woman's Institute has opened a fund for the improvement of the Eden cemetery. If the friends, and those holding lots and graves will kindly contribute one dollar or more, or as much as convenient, it will be applied at once to making the grounds as attractive as possible, with the money received. Please leave or send contributions to the undersigned on or before July 13, 1913. Mrs. Frank Wood, Mrs. Wm. B. Feit.

MAN JAILED FOR SLAYING A BIRD. Cobourg, June 23.—Hugh Patterson, who yesterday shot and killed Harold Webb, 12 years, at Fenelon Northumberland County, was arrested today on a charge of manslaughter and brought to the court here. The coroner's jury found Webb was shot by Patterson, but the verdict also stated that Patterson had pointed his gun at Webb with intent to kill. Patterson will have a hearing before the magistrate here tomorrow morning. Miss May Murtha, of Rochester, home on a visit to her parents.
