

The Lindsay Planing Mill

Having taken the business back into my own hands I am prepared to turn out the work as in former times, and ask the continuance of the patronage of my many customers, as has been during the past forty years I have been in business here.

All accounts, either due or owing Williams Bros., will be collected and paid by myself.

BUTTERMILK IS IN GREAT DEMAND GOOD FOOD AND COOL SUMMER DRINK

The buttermilk of to-day is quite a different article to what it was once. In days of old it was simply a by-product of butter and as such it was treated. If it was good, all right, if it was not, it did not matter. The pigs could have it.

AS A BEVERAGE
To-day it is a cultured drink and is made from pure milk and lactic acid bacteria, specially selected for its flavor, and developed under certain conditions of temperature.

in fact the greatest advocate of it is Prof. Mecknekoff of the Pasteur Institute, Paris. It is claimed by him that lactic acid germs are great scavengers of the system and that they will kill the old age germ which Prof. Mecknekoff claims to have discovered. Hence it will be seen that to live to a ripe old age one must drink buttermilk.

PROPER WAY TO DRINK
There is a right and a wrong way to drink this according to one authority on the subject, the proper way to drink buttermilk is to add a spoonful of sugar, according to taste, before drinking. This sugar, as soon as it reaches the blood heat in the stomach provides the food for a new brood of germs.

It is claimed that the young, active germ of this new brood are more vigorous in their attacking of the un-

desirable germs of the digestive tract.

DEMAND IS INCREASING
To show how the demand is increasing, only a few years ago, the chickens and the pigs got the most of the residuum of a churning, says the Philadelphia Press They get very little of it now, for the wise men of the hospitals have educated the public to a knowledge of its value. Not only in cases of serious stomach ailment, but for all persons of feeble or impaired digestion. The once despised product ranks with sweet milk, and outranks it both with those who find it palatable and crave it and with those for whom it is mechanically prescribed.

AN ACQUIRED TASTE
The taste for buttermilk is mostly acquired, but once one gets the habit it grows and sticks. Fack of the developed fondness for the cold, tart, acid beverage, is the agreeable consciousness that the drink, with the casein principle of milk eliminated, is a food salutary, wholesome and easily digested, and that the more one imbibes of it so much the better. Recent years have witnessed an enormous increase in the consumption of buttermilk. Department stores serve it with crackers, most saloons are compelled to keep it on tap, and many report a gratifying preference for it on the part of their patrons over beer.

DIFFICULT TO KEEP

IF YOU WANT AN EXQUISITE HOUSE GOWN

or something unusually dainty for evening wear, ask to see

Priestley's AMBROSE

It is a beautifully soft silk-and-wool cloth—and comes in all the most wanted shades for afternoon and evening wear.

"Priestley's Limited" stamped every 5 yards on the selvage of genuine "Priestley's" cloth. Look for the name.

One of the greatest difficulties encountered with buttermilk is the keeping of it in a nice consistency, and this is due to the fact that any over-ripeness, that is too great a development of germ life, separate the curdy matter from the whey, and the consumer finding the product different from other days, is apt to think it is not in a good condition.

Now, the product may become over-ripe during the delivery on hot days, or, if the consumer does not take care to keep the temperature down it may even occur after delivery.

KEEP ON ICE
Although this over-ripeness doesn't in any way alter its beneficial effects, it may oft-times render the product too acid for many people's taste.

In order to keep buttermilk in perfect condition it should be put on ice immediately on delivery and kept as cool as possible.

Talking to the manager of a large dairy this morning. The Telegram learned the interesting fact that sixty gallons have been sold in their establishment in one afternoon by the glass. This will show what a tremendous stride has been made by buttermilk as a summer beverage.

LESS MEDICINE
One is forced to believe that as a summer drink buttermilk is unrivalled. It aids the digestion and is of great value for all stomach troubles, and if people only drank more there would be considerably less medicine taken. In fact, great is buttermilk indeed, both as a nutritious food and a cooling summer drink.
