# Uministration Of an Oath

hay are the Forms Recognized in the Canadian Courts

There are nearly as many forms of nistration of the oath in the of law as there are religions. interesting contribution is the al report of the inspector of leoffices, Osgoode Hall. The comlaw requires the administration that particular form of oath the person himself declares to binding on his conscience, while is always allowed to adopt the onies of his own religion. t however, be according to some ous ceremony or other.

## Eutopia For The Fair Sex

A Little Village in England a Haven for the Agriculturist

Forty years ago the name of Victoria Woodhull was well known in the United States. Its owner was one of the group of American women first aroused agitation against laws that deprived their sex, of adequate part in discharging the fairs of the nation. Victoria, was nominated for the presidency. She did not win, or come near it. No one thought she would. But the novelty of seeing a woman's name on a ticket furnished a sensation and this resourceful women. Beaten there ness, and she and her sister. known as "Tenny Chaffin," Lady Cooke, of London, Hingland, went to New York, and started the brokerage firm of Woodhull & Chaflin. This, too, was a novel enterprise for women. But, far from being experimenters, the two sisters showed themselves uncommonly shrewd business women, and soon built up a big trade. Then they branched the publishing business, with Woodhull & Chaffin Journal." They also became contributors to the most important publications in Eng-

A host of suitors sought to win sisters. Mrs. Woodhull married in 1879, John Bidolph Martin, an English banker, member ol one of the oldest firms of Lombard street. Mr. Martin always backed the campaigns of his wife with heartiness, and in the battle for women's rights which has made greater strides England than anywhere else, she has had a leading part. At the death of Mr. Martin, his millions went to his wite, as well as the beautiful estate at Norton Parv, in Worcestershire. With this inheritance Mrs. Martin is striving to transform the killage of Bredon's Norton into a centre of culture, equipped with all the conveniences of modern civilization. When she and her daughter came into possession of the estate they found it, like many English agricultural vilfages, in a dilapidated condition. The school was mismanaged, and the villagers were much cut off from communication with the outside world. as though they had been in the middle of Africa.

The two women saw the need of attracting a better class of cultivators of the soil, and devoted wealth and energy to the proposition. The handsome old manor house was restored and turned into a woman's agricultural college. Competent teachers were put in charge, and already the better class of women studying agriculture there had grown to the number of fifty. The estate has been partitioned off into small lots, ranging in size from five to twenty acres. These will be allotted according to merit, the more thrifty and skilled to get the bigger farms.

An interesting thing about the school is its club feature. Tired wemen from London can run down and spend a few days in the old country house. At the same time they never lose touch with the remainder of the world, for telephone connects them with their London interests. The library is one of the largest and best selected in England, and virtually every magazine published in the English tongue is to be found there.
