Children Cry FOR FLETCHER'S ASTORIA

FRECKLES

This thought greatly occupied Mi- | wall. chael Strogoff. He said to himself, vaguely at first, that without neglecting anything of what was due to his Livonian. important mission it would perhaps be possible for him to be of some use to this brave girl, and this idea pleased him. Knowing how serious were the dangers which he, an energetic and vigorous man, would have personally to encounter through a country of which, however, the roads were familiar, he could not conceal from himself how infinitely greater they would prove to a young, unprotected girl. As she was going to Irkutsk, she would be obliged to follow the same road as himself; she would have to pass through the bands of invaders, as he was about to attempt doing himself. If, moreover, and according to all probability, she had at her disposal only the resources accessary for a journey said. taken under ordinary circumstances, how could she manage to accomplish it out saying a word to her for whom he under conditions which late events would render not only perilous, but ex- assuring her by even a gesture which

oute to Perm it is nearly impossible but that I shall fall in with her. Then pecting it, and as she appears to be as anxious as myself to reach Irkutsk she

" velal og am agna delev But one thought leads to another. Michael Strogoff had till now reasoned on the supposition of doing a kind action, of rendering a service, but now another idea flashed into his brain, and he question presented itself under mite a new aspect.

"The fact is," said he to himself. that I have much more need of her ed to be a courier to the czar. If, on the contrary, this young girl accompanies me. I shall appear in the eyes of all the Nicholas Korpanoff of my podorojna. Therefore'she must accompany me. Therefore I must find her again at any cost. It is not probable that since yesterday evening she has been able to get a carriage and leave Nijni

Novgorod. I must look for her. And may God guide me!" Michael left the great square of Nijni Novgorod, where the tumult produced by the carrying out of the prescribed measures had now reached its height. Recriminations from the banished strangers, shouts from the agents and Cossacks who were using them so brutally, all together made an indescribable uproar. The girl for whom he searched could not be there. It was now 9 o'clock in the morning. The steamboat did not start till 12. Michael Strogoff had therefore nearly

three hours to employ in searching for her whom he wished to make his traveling companion. He crossed the Volga again and hunted through the quarters on the other side, where the crowd was much less considerable. He visited every road. both in the high and low towns. He entered the churches, the natural retuge for all who weep, for all who suf-

fer. Nowhere did he meet with the young Livonian. "And yet," he repeated, "she could not have left Nijni Novgorod yet. We'li

have another look." Michael wandered about thus for two hours. He went on without stopping, feeling no fatigue, but obeying the potent instinct which allowed him no

room for thought. All was in vain. It then occurred to him that perhaps the girl had not heard of the order, though this was improbable enough, for such a thunderclap could not have burst without being heard by all. Evidently interested in knowing the smallest news from Siberia, how could she be ignorant of the measures taken by the governor-measures which concerned her so directly? But if she was ignorant of it she would come in an hour to the quay, and there some merciless agent would brutally refuse her a passage. At any cost he must see her beforehand and do what he could to en-

able her to avoid such a repulse. But all his endeavors were in vain, and he at length almost despaired of finding her again.

It was now 11 o'clock, and Michael, though under any other circumstances it would have been useless, thought of presenting his podorojna at the office of the head of police. The proclamation evidently did not concern him, since the emergency had been foreseen for him, but he wished to make sure that nothing would hinder his departure from the town.

Michael then returned to the other side of the Volga, to the quarter in which was the office of the head of po-

Every one was in a hurry, for the means of transport would be much sought after among this crowd of banished people, and those who did not set about it soon ran a great risk of not being able to leave the town in the prescribed time, which would expose them to some brutal treatment from

the governor's agents. Owing to the strength of his elbows, Michael Strogoff was able to cross the court. But to get into the office and up to the clerk's little window was a much more difficult business. However, a word into an inspector's ear and a few judiciously given rubles were Teacher of Teacher of the Teacher of the Land of the L Teacher's Courses, Elocution, The man, after taking him into the monestic Sciential Music, Fine waiting room, went to call the proper

Michael Strogoff would not be long in making everything right with the police and being free in his movements. While waiting he looked about him, and what did he see? There, fallen rather than seated on a bench, was a girl, a prey to silent despair, although her face could scarcely be seen, the profile glone being visible against the

Michael Strogoff could not be mistaken. He instantly recognized the young

Not knowing the governor's orders, she had come to the police office to get her pass signed. They had refused to sign it. No doubt she was authorized to go to Irkutsk, but the order was peremptory; it annulled all previous authorizations, and the routes to Siberia were closed to her. Michael, delighted at having found her again, approached She looked up for a moment, and her

face brightened on recognizing her traveling companion. She instinctively rose, and, like a drowning man who clutches at a spar, she was about to ask his help. At that moment the agent touched Michael on the shoulder. "The head of police will see you," he

"Good!" returned Michael, and withhad been searching all day, without renight compromise either her or him-"Well," said he, "if she takes the self, he followed the man through the

The young Livonian, seeing the only being to whom she could look for help disappear, fell back again on her bench. Three minutes had not passed before Michael Strogoff reappeared, accompanied by the agent. In his hand he held his podorojna, which threw open the roads to Siberia for him. He again approached the young Livonian, and, holding out his hand, "Sister," said he. She understood. She rose as if some sudden inspiration prevented her from

hesitating a moment. "Sister," repeated Michael Strogoff "we are authorized to continue our journey to Irkutsk. Will you come?" "I will follow you, brother," replied the girl, putting her hand into that of

Michael Strogoff, and together they left Michael Strogoff and the young Livonian had taken passage on board the Caucasus. Their embarkation was made without any difficulty. As is known, the podorojna, drawn up in the name of Nicholas Korpanoff, authorized this merchant to be accompanied on his journey to Siberia. They appeared. therefore, to be a prother and sister traveling under the protection of the her. imperial police. Both, seated together tioned her. He waited until she should

Kenzie at Kirkfield. Considerable work is now under way on Lake Simcoe, as well as several additional conservation dams, which are being built on Gull and Burnt Rivers.

During the past week the buoys in Stoney Lake have been placed and most of them painted.

DUG FROM SURFACE

That the two largest coal fields in the world have been discovered on Canadian soil is the belief of 'apt. Janes, a member of the Canadian exploration party aboard Capt. Bernier's Arctic. The fields, Capt. Janes says, are located in Baffin's Land, and the two are just 100 miles apart. In spite of their high altitude he declares they will be workable all the year round. The coal is so easily secured that it can be dug from the surface with a shovel.

"This northern part of Canada will be the greatest country in the world," said Capt. Janes, "I believe that the report, of the Arctic's last voyage when it is made known will be of great value."

Capt. Janes spent eight months prospecting alone. He was hundreds of miles from the ship during that period. His discoveries show that thousands of years ago Baffin's Land was a very different piece of country from what it is at the present time.

Twenty-five feet under the surface he discovered an immense forest in a state of perfect preservation. The trees, painting due east and west are laid as flat as a wheat field blown down by a cyclone. The timber, he declares, is in perfect shape. Even the cones from the tree tops are as

fresh as the day they fell. JUNIOR MATRICULATION **EXAMINATION RESULTS**
