Detective Duncan Investigation Is Started In Toronto.

Toronto, Sept. 23-The investigation by the city police commissioners as to the alleged laxity of Inspector of Detectives Walter Duncan in handling the papers of the Farmers Bank case promises to be much more far-reaching than was originally supposed. Evidence was taken at the initial sitting yesterday which went to show that there had been more or less general dissatisfaction and lack of confidence on the force itself with Inspector Duncan's handling of police mat-

Certain officers went so far as say that the inspector's veracity was frequently called in question on the force, and that he had more than once endeavored to shift blame for alleged indiscretions of his own other members of the force. A number of newspaper men were called to testify that the inspector had given them access to the papers in question, while the trend of all the evidence was to the effect that a friendly understanding existed between the inspector and Percy Haverson, a repor- sung. ter on The World, through which the latter was accorded privileges denied to other newspaper men. The hearing resumes to-day.

The covenant pledges Orangemen not to recognize the Irish Parliament, to disregard its laws and to refuse payment of taxes to the Dublin treasury. The utmost loyalty to King George is expressed.

It is understood that the council will also plan a provisional government, to assume control in Ulster the day home rule becomes effective.

The covenant says resistance to home rule will be passive "as long as possible."

Fishermen for Pacific Coast,

Ottawa, Sept. 24.-Sir Geo. Doughty, M.P. for Grimsby, Eng., is in Ottawa to interview Hon. J. D. Hazen, Minister of Marine, in behalf of a scheme to establish a colony of old country fishermen on the Pacific coast. The idea was originated by Earl Grey, the intention being to have the colony form the nucleus of a naval reserve.

The necessity of preserving order in the interests of trade is the principal reason advanced.

The Manchester Guardian and other Liberal papers oppose the project bitterly. The Guardian says:

"The Foreign Office, although not ordinarily over-solicitous about the trade interests, knows well how to quote them for is own ends."

Since the signing of the Anglo-Russian convention of 1907 for the maintenance of Persia's independence and integrity, and incidentally for the division of the country into British and Russian spheres of influence there has been a steady growth of this influence and a corresponding shrinkage of independence in Persia. The exact division of territory will not be easy. The Russian papers claim Teheran. If t'e Emperor gets the capital, Great Britain's share will be decidedly the smaller value.

Some of the Liberal papers bewail the disappearance of Persia as a buffer state and foresee a great increase in the British militry establishment when the British-Russian boundary is drawn across the middle of what is now Persia.

Nowhere is the outcome of the conference between Sir Edward Grey and M. Sazanoff awaited with greater interest than in the capitals of the Balkan states as it is believed that they have a vital bearing on the crisis in the near east, the gravity of which unless the powers induce Turkey immediately to introduce reforms in Macedonia, all are agreed upon. The representatives in London of

Bulgaria, Servia, Greece and Montenegro are watching closely the progress of the convention which began in London Saturday and will be continued at Balmoral Castle to-day.

There is no confirmation here of the reported alliance of the four Balkan states to make common cause against Turkey, but it is acknowledged that a rapprochement exists for their proexported from Guatemala has been tection.

Must Abandon Canal?

Niagara Falls, Ont., Sept. 23 .- "I do not believe that the first vessel will pass through the Panama Canal on Oct. 15, 1913," said Henry Lovering, a mining engineer of Cape Gracias. Nicaragua, who is visiting U.S. Consul Edward Trimmer. "I don't believe that any vessel will ever pass through the canal." "Why not?" he said. "Well, the engineers have not been able to find

bottom in the Culebra cut and they have gone down 200 feet. You remember what happened about two weeks ago - that fall of millions of cubic yards of earth? That bears me out. I believe Stevens & Shontz knew that a canal at Panama was impossible, that's why they quit. There's no better engineer in the country than Col. Goelthals. He was sent to Panama to dig the canal, and he is doing great work against tremendous odds. Army officers are not supposed to express their opinion. They do as they are told. The engineers who were sent down to make the preliminary survey some twenty years ago, reported that the Panama route was not feasible. They favored the Nicaragua route, despite the fact that the Panama route is about three miles longer."

Baby Floated Down Stream. St. Catharines, Sept. 23 .- The infant child of Mrs. A. Reed, Winchester avenue, had a thrilling experience

Saturday morning and narrowly escaped with its life. It was securely strapped in the baby carriage, which started rolling down an incline leading to a bridge over the hydraulic raceway. There are no side supports on the bride, and the carriage went over the edge into the water. In some manner it became free from the carriage, which sank, and the baby floated down stream. The mother saw the child, jumped into the water and ressued it after it had been carried seventy feet. Both were helped out by some canal employes. The mother collapsed when she reached home.
