## ATTRACTED CROWD

There was great interest shown in the exhibit of the Seymour Power Co. Power for the farm, as the lisplay was called, was self explanatory and it was the aim of the :ompany to show in how many ways and to what advantage electrical power could be used on the farm. Electric motors were shown at wor running a chopper, a feed cutter, meat and bone grinder, a pump, pulper, and a cream separator and in fact proving that it was practicable for the farmer to run nearly every machine on the farm by electricity. A Sharpless Mechanical Milker electrically operated drew hundreds, and the man in charge planned to milk one of the animals on exhibit Saturday afternoon. The makers claim a large saving of time and lahor over hand milking and that the machine will not injure the cow in any way. The exhibit is practically the same as shown by the Hydro-Elextric in other parts of the pro vince. The Seymour Power Co. are showing it in all sections of the province where their lines extend.
