He was taken to birds owing to the cold, wet spring. the Department of Inland revenue. A number of samples secured at different points throughout the Dominion have been analyzed. In some cases it was found that bay rum labeled "superior bay rum" contained no less than thirty-three and a third per cent of alcohol. Much of the bay rum contains a mixture of alcohol and wood alcohol. Some of the samples of Florida water were found to be made entirely of methyl alcohol, although no mention was made against 11,386,215, or 338,400 more for this on the label. Many of the samples, while not condemned, are marked as "doubtful."
