The Dominion Alliance has successfully assisted 442 municipalities out of 822 to win local option, and a majority vote was polled in 120 others. Next January will see more added to the 442, as a hundred campaigns are in progress.

It is claimed that towns and cities decline when local option is in force, but look at Midland and Orillia.

A lesson may be drawn from Isaiah, "Take up the stumbling block out of the way of the people." God is leading on the battle and He never loses. This question should be brought into the church because legalized liquor traffic is the greatest stumbling block of modern times. The barroom is always tearing down and not upbuilding. We should lift the curse from the way of the coming generation for the liquor traffic cannot be legalized without sin. God says abhor that which is evil, and certainly the bar-room is evil All the evangelfcal churches have put on record that liquor is contrary to the will of God, and Christianity. Liquor is the great economic obstructor as the sudden boom in many places under local option will prove. Orillia had issued about one million dollars worth of building permits last year, and the Government sent a commission to investigate the condition of the hotels, and the accommodation offered. It reported the accommodation was better in every instance, If there is more liquor drunk under local option, then why doo't the liquor dealers want it? Local option is the weapon to take in hand ard clear away the stumbling block from the path of our boys.
