Part of Plant of Frost Wire Fence Co., Hamilton. 22,000 sq. ft. of Paroid on these buildings

PAROID ROOFING

is one of the well-known BIRD NEPONSET PRODUCTS; tested and tried for many years in all climates. Paroid gives lasting service because it is made right-from the felt, which is the base, to the fixtures which hold it on. Paroid presents a smooth, pliable surface which cold will not crack, nor heat cause it to run. It requires no superficial coating of sand or gravel. In Paroid there is nothing to crumble away or work

loose and no depressions where water or snow can lodge. Read what the manufacturers say:

OUR OFFER—When you see Paroid on your roof—if it is not satisfactory tell us and we will send you a cheque for the cost of the roofing and the cost of applying it. If any Bird Neponset Product ever proves defective in manufacture we will replace it. If a broader guarantee than this could be made we would make it.

Lindsay's New Open Air Rink

one to think of winter pastimes. Already, snow-shoeing, sleigh-driving and coasting have been much in evidence in the town. Within the near future skating will be in rage on the street there at present. It was a constructed and managed by one of would suffer in the matter if the the enterprising young men of the council granted the Board's prayer. town.

is called, is situated on Dr. Pogue's | grant the request, but the members property, just east of his residence, seemed willing that the hospital on Kent-st west. It is being run on should receive the land and the mat the same principle as the large open air rinks in the city of Toronto. A ly. waiting-room has been provided and comfortably fitted up for both ladies and gentlemen, and already a good foundation has been laid for the ice, which will have an area of ten thousand square feet.

The Athletic Association of the Collegiate Institute have made arrangements, whereby they are securing the exclusive skating princleges on Monday, Wednesday and Friday afternoons from four to six o'clock, England with the 1880 team, and was and on Saturday mornings from ten here also in 1882, 1884, and 1886. Born to twelve o'clock. Some of these will be devoted to hockey and some to skating only. The stu- eighteen he met with marked sucdents at the Collegiate are manifes- cess for Victoria against Lord Harris's ting great interest in the project and it is expected that a large number of During his first three visits to Engthem will take advantage of this | land he was a great bowler, but in splendid opportunity of having all 1886, having in the meantime come on rink of their own as we, as the prive best he had nearly every good quality lege of skating at all hours when it is open to the general public.

similar priveleges on Tuesday and Thursday afternoons from four to six addition to his other gifts he had a o'clock, as well as certain hours in the evenings on the other days in the week before the rink is open to the days.

The rink will be open to the pubhours and every afternoon at the usual skating hours.

The advantages of skating in the open air are so evident to every one that this rink ought to prove a boon to the lovers of skating in the town. Open-air rinks elsewhere have gained great popularity amongst all those who desire to participate in the healthy, vigorous exercise of out-of.door skating. We predict the same popularity for Glenholm Skating Rink and commend Dr. Pogue for his enter prise in providing for the young people of the town a means of amusement and pleasure which will prove beneficial in every way to those who make use of ft.

Hospital Wants More Property

Mr. J. D. Flavelle appeared before the Council last evening in reference to the dedication by the town to the Board of Governors of the Ross Memorial Hospital that portion of the road leading from the West side of Henry-st. to the boundary. Mr. Jas. Ross last visited Lindsay he expressed a desire to secure more land for the purpose of a tennis court The Board of Governors took action in the matter and secured several lots adjoining, which would be effectedf They were willing to buy the lots rather than prejudice the Council

in its action on the request made. The Agricultural Society was anxious to secure more property and erty runs down to James-st. and the acquisition of the land referred The coming of cold weather causes to would give the institution that square. There was no driveway from James-st. to the boundary.

Mr. Carew was in accord with Mr. Flavelle's remarks. There wasn't a new open-air rink which is being gravel pit years ago and no one

There are certain legal formalities The Glenholm Skating Rink, as it necessary before a council could ter will be finally disposed of short-

George Palmer, One of Australia's Greatest Bowlers

The death has taken place in Australia of George Palmer, who was one of the finest Colonial bowlers ever seen on a cricket field. He came to on February 22, 1861, he was in his fiftieth year. No bowler ever won fame at an earlier age. As a lad of eleven at Melbourne, and was soon regarded as second only to Spofford. very much as a batsman, he was not chances. He removed every bit of all the straw and rough fodder they up to his previous standard. At his that a bowler of his style could possess. His delivery was the easiest

and most natural that can be recalled Arrangements are also being made -it seemed part of himself-and he aned year stable and the stable of the stable marked in combination with remarkable spin a good variety of pace. No one ever bowled a better "yorker." In more telling leg-break than any bowler of his speed. Looking back upon is career in England as a whole, he must be placed with Spofford and general public, and also on Satur- Charles Turner. Many famous batsmen have declared that they never met a bowler who could be more difficult on a perfect wicket, his resources lic every evening at the usual skating being so varied. For the great team of 1882 he took 138 wickets, and 1884 132 wickets.

He Takes Sport Seriously and Reads

Up in Advance The Frenchman cut on a sporting expedition is, says a writer in the Country Gentleman, like a schoolboy out for a holiday. He is enthusiastic over all he does, and is most anxious to look and act the part he is playing. "Le sport" is a serious business, and must be undertaken in as serious a spirit as a holiday will permit. And so the Frenchman follows whatever sport he takes up according to the proper rules and regulations.

The average French sportsman announces himself and his business long before he has spoken to you, for he invariably dresses the part. He has read up the subject in advance, and in Ontario, Kingston, Renices and he knows what to do and how to do The first item is dress; every sport has its proper uniform, and no Frenchman worthy the name would think of starting out in inappropriate

Most anglers attire themselves in gaiters or wading boots, and carry a mackintosh and a sou'-wester hat even though they may be going to the tiniest stream in the finest of weather. They carry a weird assortment of rods and bait-cans and landing-nets, and have a habit of leaving some of their property behind. Having arrived at their favorite spot, they laboriously unlimber, and carefully arrange their paraphernalia around them. They will chatter gaily to any one with them, and if you are a friend will relate all their sporting adventures. If the fish refuse to bite they will contentedly go to sleep on the bank. Then, if they have caught nothing, they will, guilelessly as a child, purchase some fish in order to show their wives. Of course, there are other anglers as well, men who know as much about the sport as any Englishman; but the traveller in France will see about twenty of the former to one of the

CANADA THE PRODUCER.

J. J. Hill Believos the States will Scon be Importing Our Wheat and Flour

James J .Hill; perhaps the best authority on farming and railroading on this continent, has stated that withing will be compelled to import wheat and flour. He quotes statistics to show that the ratio of the population is increasing much faster than the production of foodstuffs, and draws the conclusion that in a very few years the United States will be importing. He also states that Canada will be the great producing country feet off the parlor table this instant!" of the 20th century, and that much of the grain and flour which the United States will import will be secured in want you to know that there is but the Canadian West. In this connection it is interesting to notice that from 100,000 to 200,000 American far-"And who is that, sir, may I ask?" mers are crossing into the Canadian West every year and securing land
