

# THE N. MOCKIN SHOE STORE PUSHERS!

Between seasons business becomes a little sluggish, and, like one's liver, requires a gentle pusher now and again. Nothing pushes trade along like a genuine offering of real bargain snaps. We find that, when offering a dollar and a half for a dollar, there are takers every time. Trade has been booming at this store, and we have done a great, good and satisfactory business this season, and we can afford to be liberal with our customers. So push along this way, and secure your share of our thanksgiving premiums.

- 30 pairs Men's Fine Dongola Calfers, regular price \$1.75, sizes 6 to 11, for..... 99c per pair
- 30 pairs Men's Fine Dongola Laced Boots, regular \$1.50, sizes 6 to 11, for..... 99c per pair
- 30 pairs Men's Fine Boston Calf Laced Boots, worth \$1.50, sizes 6 to 11, for..... 99c per pair

- 60 pairs Women's Fine Kangaroo Laced or Buttoned Boots—a splendid boot for everyday wear—cheap at \$1.25, push price..... 99c per pair

COME ALONG! Push along!! Get your size before they are pushed out!!!

# THE N. MOCKIN SHOE STORE LINDSAY'S GREATEST SHOE PUSHERS.

**ESTABLISHED 1889 THE BELLEVILLE BUSINESS COLLEGE, Limited, BELLEVILLE, ONT.**

Students have a larger earning power who take the following lines of preparation under our system of training. It has no superior.

**DEPARTMENTS.**

- I.—Comprising Book-keeping—Double and Single Entry in its various applications, Business Papers and Customs, Calculations, Business Writing, Business History and Geography.
- II.—Shorthand and Typewriting—Office and Court Work.
- III.—Telegraphing—Commercial and Railway Work.
- IV.—Civil Service Qualifications—Including, Precise Writing, Statistics, English and French Options, German.

This College is open throughout the year. Students may enter at any time. Send for Catalogue. Address: J. A. Tousaw or J. Frith Jeffers, Secretary, President.

**FARM LOANS.**

**MONEY TO LOAN on Mortgage or any term from 5 to 10 Years.**

at Lowest Current Rate of Interest, with privilege of repayment in instalments when required.

Expenses kept down to the lowest notch.

All business of this nature kept strictly private and confidential.

Come and see me if you want money and get my terms.

**J. H. SOOTHERAN**  
Land Agent, 91 Kent-st. Lindsay

**The Weekly Post.**

LINDSAY, FRIDAY, JAN. 30, 1903.

**THE DEMAND FOR CHEESE.**

The trade Bulletin of Montreal has the following to say concerning the prospects of the cheese trade in its issue of Jan. 16th:

A more remarkable season for continued steady buying at high prices has seldom if ever before been experienced in the cheese trade than that which set in last fall with values at 9-12c to 10c, and steadily moved up to 13c and 13-14c for finest, which is the present range. Thirteen cents for finest goods, both Eastern and Western, was made last week and this, some of the largest holders refusing to sell under 13-14c. There are not many cheeses unsold in this city, the great bulk being held for English account. There is every prospect of a scarcity of cheese on this side during the next four months, probably such as has never been known before; and induced by profitable prices factories will no doubt commence to turn out fadder goods unusually early this year, very likely in March. Dealers and exporters, had, therefore, better conserve their brain energies, and not waste them in concocting and sending out circulars, advising factious men not to make a box of fadder cheese; for if present prices continue, makers will put every gallon of milk they can secure into the money-making card. Last year the price of fadders commenced in April, contracts for which were entered into at 10-11c, to 10-12c for the current month's production. A strong feature of the situation is that English buyers have made their appearance on the New York market, and have bought about 3,000 boxes of cheese, all of which were below the quality of finest, costing 12-13c to 12-14c. When English buyers have to go on the New York market to supply their needs, where prices are higher than here, depend on it they are driven hard to fill their requirements. Finest large cheese in New York are firm at 13c to 14-15c, or just 1c per lb. higher than in this market. A few factories in Ontario are still making cheese, although in small quantities; but as they sell readily at big profits it would not be surprising if they continued making all winter. Of course, there will be a limit to the advance in prices, as they cannot go on soaring for ever as of late. Still, there is little doubt that a higher range of values will continue into spring, probably into May, when a break should be in order. It should be remembered, however, that they have enough to go around on the other side of the Atlantic, now that sanitary requirements have been considerably reduced by the high 1-2c and 8 penny cuts.

**KEEP THE BOYS AT SCHOOL.**

(New York Commercial)

It is much to be feared that, as a direct result of the marked and very positive tendency among the young men of these times towards business careers, a lot of bunglers and incompetents may be found in the commercial world of the next generation. Almost everywhere boys are being rushed through the primary and intermediate grades of school with little thoroughness and only the smallest measure of general information, in order the quicker to get them to "doing something." There is observable among them a very general ambition—most commendable in itself—to get into places where they may earn money. The pay-roll is the great goal for far too many of our American boys to-day, and in the larger cities of the country especially, where all the good things of life that money brings are the more constantly in evidence and therefore the more tempting, far too many parents encourage their boys to quit school and studies early and get out "into the hustle."

A tour of inspection through the counting-rooms and manufacturing buildings of the big town would disclose scores and hundreds of bright, active boys from twelve to fifteen years old already started on what all of them believe, of course, to be "business careers"—an age far too young to get into the work-a-day world. They would much better be kept at home, and their "business careers" cannot be laid without solid foundations, and in the years to come this lack of early education and training will rise up to plague them at every turn. There are schools that offer to "finish off" boys and girls "for business" in three, six and eight months. It can't be done. That sort of "schooling" breeds only graduate bunglers and irresponsible men who know something—and it always has places for them. There are instances, of course, where domestic necessities force boys out into the pay-roll at too tender an age. But they are exceptional. Keep your boys at school! No "captain of industry" ever yet climbed up on the ladder of ignorance.

**SPECIFIC FOR BLOOD POISONING**

(Montreal Herald.)

The efficacy of an injection of formalin as a cure for blood poisoning has been demonstrated at Bellevue Hospital, New York, and some prominent physicians believe a discovery has been made which tends to rob blood poisoning of its terrors. It will also prove most valuable in other maladies that usually have a fatal result.

Dr. Barrows, the originator of the method, after a long search for an agent by which the bacteria might be destroyed, thought of formalin, and a careful study convinced him it might be employed efficaciously, with no harm to the patient, if the solution were sufficiently weak. The first patient was a negro 26 years of age, and who seemed to be at the point of death. She was semi-comatose and was muttering incoherently. Her respiration ranged from 10 to 15, and her temperature was 103 degrees. It is understood that a person in such a condition had never been known to recover. Dr. Barrows injected into one of the large veins of the right arm about a litre of formalin solution, of the strength of one part of formalin to five thousand parts of water.

The result was such as to make the physicians marvel. The temperature fell almost immediately, and the pulse showed an almost instantaneous improvement. This continued, and at 9 o'clock next morning, six and a half hours after the injection, the temperature had fallen from 103 to 101, and the pulse had fallen from 160 to 108. Under continued treatment the woman convalesced and in about two weeks was perfectly well.

Another New York physician, reading the reports of Dr. Barrows' success, consulted with him about a case he had in charge which was considered practically hopeless. The same treatment was tried and the patient is reported to be making most satisfactory progress. Needless to say, the discovery has created a decided sensation in the medical world, and further experiments will be watched with interest.

**CANADA'S PROSPERITY.**

To those who are continually advocating radical readjustments of Canada's trade policy, the following figures of Canada's enormous trade under the present trade policy should be, at least, instructive:

The trade returns of the Dominion for the six months ending December 31st last show a marvellous growth in the trade of the country. The aggregate trade of the Dominion for

the six months was \$281,342,201, compared with \$218,231,600 for the same time last year, or an increase of \$63,110,602. The trade of the past six months is about eleven millions greater than for the whole of the year 1901. This increase is pretty well divided between imports and exports. The deficit for the six months in 1901 and 1902 are:

Imports—	1901.	1902.
Dutiable goods.....	\$56,936,189	\$56,936,189
Free goods.....	38,619,513	38,619,513
Coin and bullion.....	2,839,121	2,839,121
Duty collected.....	\$99,662,849	\$99,662,849
Exports—	1901.	1902.
Dutiable goods.....	\$64,582,101	\$64,582,101
Free goods.....	38,619,513	38,619,513
Coin and bullion.....	2,839,121	2,839,121
Duty collected.....	\$106,040,735	\$106,040,735
Exports—	1901.	1902.
Domestic.....	\$113,708,760	\$113,708,760
Foreign.....	10,471,862	10,471,862
Coin and bullion.....	1,500,272	1,500,272
Domestic.....	\$125,540,094	\$125,540,094
Foreign.....	7,396,534	7,396,534
Coin and bullion.....	284,721	284,721
Exports—	\$133,221,349	\$133,221,349

The exports show a decrease in the produce of the mine of about three million dollars, and a decrease of one million in the fisheries. On the other hand the forest wealth shows an increase of over three million, and manufactures nearly one million better than for the same time in 1901. There is an increase in the duty collected of over \$2,135,473.

For the month of December there was an increase in the imports over December, 1901, of about one million and a half, and in the exports of about five million dollars, while the duty increased by \$432,000.

**EDITORIAL NOTES.**

If Mr. Foster is proving a success as manager of a trust company, he should think twice about throwing up the job to enter politics. It is not to be supposed that he can attend to both at once and earn the salary paid him by the shareholders and devote his time, or a large portion of it, to the service of the Tory party.

Toronto Star: That Chicago jury will presently be casting about for a punishment to fit the crime of the forty-five coal dealers charged with conspiracy. How would it do to set each of the condemned, lightly clad in Panama hat, negligee shirt, blazer, duck trousers, and canvas shoes, beside a street car stove and let him freeze to death?

A Scotch paper says the Scotch steel and iron firms have had a remarkably good year, many of the big concerns breaking their own records in production. Prices and the general air of confidence for the wages have been good and there is future. That is a different story from those told by the New York papers. They paint Britain as suffering severe depression.

The conductor in charge of the electric car which collided with Roosevelt's carriage at Pittsfield, Mass., has been sentenced to six months in jail and fined \$500. Does anybody think that had it been a common citizen's carriage that was run down, there would have been any such sentence? Talk about citizens of the United States being free and equal! It's pure nonsense.

Montreal Herald: The members of the Canadian Manufacturers' Association are said to be anything but unanimous in their views on tariff revision. To the surprise of the men whose motto is "adequate protection," there are some members inescapably enough to be content with the tariff as it is. After all, between the multitude of its own councillors, Parliament will probably have to revise the tariff to please itself.

**Armed Peace impoverishing Europe.**

(Montreal Witness.)

The armed peace of Europe was the theme of Baron d'Estournelles de Constant's speech in the French Chamber of Deputies Monday, in the course of a debate on the budget. It was this armed peace, he said, which had absorbed fifty-four per cent. of the resources and that was responsible for the yearly deficits in nearly all the European countries. Mr. Andrew Carnegie only a little while ago warned the European powers that the United States must inevitably beat them in the race for commercial supremacy, because she is not weighted down with vast armaments. Baron de Constant reinforces this, and further shows how the big standing armies threaten to bring about a state of general bankruptcy. France, with a present population of 38,641,000, supports an effective standing army of 580,540 during peace time, and has a national fund debt of \$6,000,000,000, or the heaviest debt ever yet incurred by any nation. Great Britain during the Boer war supported an army of 450,000 and 104,913 marines and seamen, and there is Germany with an army on a peace footing of 585,266; Austria, with an army of 361,693; Russia, with 800,000, and Italy, with 185,000 on a peace footing, to mention only the biggest examples out of many. Italy also keeps up a large navy, with a consequence that her public debt is now \$3,000,000,000, compared with Great Britain's national debt of \$3,525,000,000. These debts have been more or less incurred for wars or armaments. In the case of Great Britain the assets far larger in proportion than the assets of most of the other nations. Still, what a burden this jealousy and hatred of each other has been for centuries, and Baron de Constant may well sigh for a policy of sincere peace and fruitful understanding such as was outlined at The Hague Conference.

Price 25 Cents

**CURE SICK HEADACHE.**

**The Free Library.**

Collingwood will receive \$12,500 from Mr. Carnegie for a Public Library building. The original gift was \$10,000, but as in the case of Lindsay, the tenders exceeded that sum, and on the matter being explained the great philanthropist agreed to increase the amount. Wouldn't that be the easiest way out of the difficulty in which the Lindsay Board find themselves? The class of building that will cost \$12,500 and \$13,000 if the original plans are followed, but at the price of material when Mr. Carnegie framed his scheme the building cost probably have been as planned could probably have been put up for the sum offered. The wave of prosperity that has been sweeping over Lindsay has made Mr. Carnegie's steel shares much more valuable, and he can better afford to give us \$12,000 now than \$10,000 then. Besides, why be squeamish? If we take \$12,000 we can make no valid objection offered to our taking \$12,000 or all we can get.

**A BRITISH VICTORY.**

Coerced United States Into Acceptance of Alaskan Arbitration.

New York, Jan. 27.—Matthew F. Tigue wires The Journal from Washington a despatch that is luminous and Venezuela-Alaskan questions. He says: The State Department has come to an agreement with Great Britain in the German-Venezuelan crisis by which Germany has been forced to abandon its fight against

**King's Evil**

That is Scrofula. No disease is older. No disease is really responsible for a larger mortality. Consumption is commonly its outgrowth. There is no excuse for neglecting it, it makes its presence known by so many signs, such as glandular tumors, cutaneous eruptions, inflamed eyelids, sore ears, rickets, catarrh, wasting and general debility.

Children of J. W. McGinn, Woodstock, Ont., had scrofula sores so bad they could not attend school for three months. When different kinds of medicines had been used to no purpose whatever, these sufferers were cured, according to Mr. McGinn's voluntary testimonial, by

**Hood's Sarsaparilla**

which has effected the most wonderful, radical and permanent cures of scrofula in old and young.

**GOOD BLOOD**

is the Secret of Health, Vigor and Happiness.

Good blood—rich, red blood—is the greatest enemy disease can have. It stimulates every organ to throw off any ailment that may attack it. Good blood is the only positive cure for such complaints as anaemia, nervousness, neuritis, skip eruptions, indigestion, rheumatism, etc., because these diseases cannot exist where the blood is good. The secret of good blood—rich, red, life-giving blood—is Dr. Williams' Pink Pills. Where these pills are used it means life, health and vigor. Mr. Robert Lee, a well known resident of New Westminster, B. C., says: "Before I began using Dr. Williams' Pink Pills my blood was in a very impure condition, and as a result, itchy pimples broke out all over my body. My appetite was tickle and I was easily tired. I tried several medicines, but they did not help me. Then my wife urged me to try Dr. Williams' Pink Pills. I got half-dozen boxes, and used the time I had used them I was fully restored to health, and my skin was smooth and clear. The pills are the best medicine I know of for purifying the blood." Sold by all medicine dealers or sent post paid at 50c per box or six boxes for \$2.50, by writing direct to the Dr. Williams' Medicine Co., Brockville, Ont. Do not take a substitute, or something said to be "just as good." The "just as good" medicines never cured anyone.

**UNRECOGNIZABLE.**

Remains of Fireman Matthews and Brakeman Everist Recovered From the G.T.R. Wreck at Newtonville.

Port Hope, Jan. 27.—What is left of the bodies of Fireman Thomas Matthews and Brakeman Benjamin Everist, the victims of the collision on the Grand Trunk last Wednesday night, was found by the searching party yesterday. The charred remains of Matthews were discovered in the morning and were absolutely unrecognizable. The top part of the body was burned almost to a crisp, and the left arm had been evidently torn off. The back of the skull and the skull were found, but only on the legs was there any flesh. He was identified by the trousers and the smouldering remnants of a woollen vest he wore. His father and two brothers have been diligently searching night and day for the body since the wreck.

The badly charred remains of Brakeman Everist were dug from beneath the wreck last evening by the wrecking crew, and were brought here, where they are laid beside those of the other victim. His left arm had been torn off.

The wreckage is not yet all cleared away, but the line is open for regular traffic.

**Wife Beater Gets Six Months.**

Brookville, Jan. 27.—Judge McDonald yesterday imposed sentence of six months with hard labor in the Central Prison on Patrick Travis for maltreating his wife. While his trial was pending he had arranged for a separation, granting his wife \$1,000 and \$100 annuity. Had it not been for this he would have been sentenced for three years instead of six months. The parties reside in Spencerville, Ont.

**Leslie's Weekly** sounds a note of alarm against paternalistic legislation, which it fears is running mad. There is not a doubt of it. The United States are even worse than Canada in that respect, and we are bad enough. No matter what scheme is incubated laws are sought, and many of them of a character that should never have place in a liberty-loving land. Leslie's Weekly says: "Some of us are not industrious, but too many of us are not. Congress should set its hand against any law that proposes to put the industrious and the lazy on an equal footing, and it will be strange indeed if a Congress elected by free men should take any other view of the matter. That is very good. But how else are we to be protected? That is especially designed to handicap some for the advantage of others. It is the great source of pollution of the fountain of liberty, and our neighbors are due to pay a bitter penalty for their idolatrous course in regard to it."

**Housekeepers.**

We are in a position to supply your wants with the best goods obtainable from foreign and domestic wholesale firms. We mention a few lines that are now selling freely.

**FISH**—Here you will find every kind—fresh, salt, smoked and canned. We guarantee the quality to be the best known to the trade. Lowest prices on small lots or quantities.

**PICKLES**—In addition to the old standard lines we handle many new relishes that have taken a strong hold on the public fancy. A taste of these acts as a filip to a jaded appetite and they should be on every table.

**BREAKFAST FOODS**—We handle all the popular lines and can tell you something about the virtues of each. Some of these lines are attaining a very large sale strictly on their merits. They are aids to health and are economical as well.
