STARVING IN LINDSAY.

Men and Women Who are in Need—Liberal Offer.

There are scores of people in Lindsay and vicinity who are starving in the midst of plenty. This is not because they are in need of food, but because they cannot digest the food they eat.

To help these unfortunates our leading druggists have recently received a large supply of Mi-o-na, the most recent discovery for the cure of stomach troubles.

Mi-o-na is an unusual combination of remedies for the stomach and digestive organs that heretofore have been little known in this country. It soothes and heals the irritated mucous membrane of the stomach, stimulates the solar plexus and strengthens the nervous system.

One little tablet out of a 50 cent box of Mi-o-na before meals, and you can eat what you like and when you like. You will have no more headaches, back-aches, heart-burn, or indigestion. Mi-o-na will give you perfect health and strength.

If you cannot obtain Mi-o-na of your druggist, it will be sent by mail postpaid, on receipt of price. Write us for advice on your case from a leading stomach specialist which will be sent free. The R. T. Booth Company, Ithaca, N.Y.

PROF. JACKSON HONORED.

Presented With a Gold Topped Cane Last Week by Choir.

One of those pleasing functions which go a long way to unite leader and followers together in stronger bonds of love and friendship took place last week, when the emembers of Cambridge-st. Methodist choir presented Prof. W. H. Jackson, choir leader and organist, with a beautiful gold-headed cane, handsomely engraved, accompanied by the following very suitable address;

Dear Mr. Jackson,—We, the members of the Cambridge-st. Methodist choir, feel that we cannot allow this opportunity to pass without expressing to you in some tangible way our warm appreciation of your uniting efforts in our behalf. Your faithfulness to duty, your sympathy, your readiness to help have been appreciated by us and are manifest in the marked improvement in the condition of the choir.

In parting with you we ask you to accept this cane as a slight token of our esteem and good will. We wish for you greater success in the future than has ever crowned past efforts, and that Heaven's riches, and choicest benediction may rest upon you through life.

Wishing you a glad and prosperous New Year.—Signed, the members of the Cambridge-st. Methodist choir. Lindsay, Dec. 28, 1905.

Mr. Jackson's term among the choir members has gained him many warm friends and in his severance from their work the choir lose a valuable leader. Mr. Jackson made a short, but feeling reply, thanking the choir for their kindness shown to him and for their earnest help in choir work and wishing them one and all the season's greetings.

Protection of Wild Life.

(Washington Post).

Is there any way of accounting for the propensity manifested by a large number of people to kill something for the sake of killing it? It is not inherited from our savage ancestors. They tortured and killed their enemies, but never slew wild animals except for use and never more than were needed. Civilized man, so-called, however, goes out into the woods and fields with murder in his heart and call's it sport. Nothing is cunning enough to keep out of his way, nothing so innocent, harmless or beautiful as to escape his thirst for slaughter, and very little that swims flies or runs is too small for him to hunt down.

READ AND YOU WILL LEARN

That the leading medical writers and teachers of all the several schools of practice endorse and recommend, in the strongest terms possible, each and every ingredient entering into the composition of Dr. Pierce's Golden Medical Discovery for the cure of weak stomach, dyspepsia, catarrh of stomach, "liver complaint," torpid liver, or billousness, chronic bowel affections, and all catarrhal diseases of whatever region, name or nature. It is also a specific remedy for all such chronic or long standing cases of catarrhal affections and their resultants, as bronchial, throat and lung diseases (except consumption) accompanied with severe coughs. It is not so good for acute colds and coughs, but for lingering, or chronic cases it is especially efficacious in producing perfect cures. It contains Black Cherry bark, Golden Seal root, Bloodroot, Stone root, Mandrake root and Queen's root—all of which are highly praised as remedies for all the above mentioned affections by such eminent medical writers and teachers as Prof. Bartholow, of Jefferson Med. College; Prof. Hare, of the Univ. of Pa.; Prof. Finley Ellingwood, M. D., of Bennett Med. College, Chicago; Prof. John King, M. D., late of Cincinnati; Prof. John M. Scudder, M. D., late of Cincinnati; Prof. Edwin M. Hale, M. D., of Hahnemann Med. College, Chicago, and scores of others equally eminent in their several schools of practice.

The "Golden Medical Discovery" is the only medicine put up for sale through druggists for like purposes, that has any such *professional* endorsement—worth more than any number of ordinary testimonials. Open publicity of its formula on the bottle wrapper is the best possible guaranty of its merits. A glance at this published formula will show that "Golden Medical Discovery" contains no poisonous or harmful agents and no alcohol—chemically pure, triple-refined glycerine being used instead. Glycerine is entirely unobjectionable and besides is a most useful ingredient in the cure of all stomach as well as bronchial, throat and lung affections. There is the highest medical authority for its use in all such cases. The "Discovery" is a concentrated glyceric extract of native, medicinal roots and is safe and reliable.

A booklet of extracts from eminent medical authorities, endorsing its ingredients mailed free on request. Address Dr. R. V. Pierce, Buffalo, N. Y.

PULLMAN CAR IS DOOMED.

THE COLUMBIA MARVEL WILL NOW HAVE ITS INNINGS.

The New Sleeper is a Wonder—How it is Operated.

The Pullman Company turns out between 700 and 800 sleeping, dining and combination cars annually. Railroads are forced to haul these cars over nearly 200,000 miles of track and pay big rentals for the "privilege." The rentals alone amount to about $350,000 a year. The road that does not carry a Pullman is severely handicapped. The company pays 8 per cent. on a capital of $74,000,000. For nearly 40 years the roads have been in abject slavery to the Chicago concern. All rivals have been swallowed up. Patents have been annulled, competition has been suppressed. To-day, however, the Pullman trust is practically without a patent, all having expired. Any road is at liberty to build its own sleepers, and a few systems have made a success of it.

There is now—after years of litigation—another Richmond in the field, a palace car as far ahead of the Pullman as the Deutschland is ahead of the clipper ship of half a century ago. It is patriotically named the Columbia, and is in operation between New York and Philadelphia. For several years it was used on Canadian roads, but now that its standing has been settled by the courts and the national government has allowed all patents, it has become an institution of the United States. A contract was made a few days ago for twenty cars with one of the leading railroad systems of the country.

SEEING IS BELIEVING.

At Jersey City you enter a beautifully decorated parlor car containing some 25 comfortable grass chairs on a green and white carpet. The windows are broad, high and numerous. The chairs are portable. A lavatory at one end is so spacious that four women can make their toilets at the same time. At the other end are most ample accommodations for men. The kitchen, buffet, cold storage, linen closets, etc., are generous. But there is not the remotest hint, sign or suggestion of a place to sleep. You bought a berth check, but there is no berth. You are assigned to this car. It looks queer. You begin soon to wonder where you are to rest your head.

"Want to go to bed, sir?" The solitest of porters is Mason, a graduate of Amherst College, black as the ace of spades, chief demonstrator of the Columbia under the tutelage of R. L. Spencer and J. H. Plummer. "Which car?" you ask. "Right here, sir. Allow me to move your chair." A space as long as a berth and as wide is cleared on one side of the car, and two trap doors are lifted to a vertical position, forming a section from the top to the bottom of the vehicle. Mason has equipped himself with a hand brace about three and a half feet in length. A wrench instead of a bit forming the business end, attached to a countersunk nut and borne away. It from the depths — a couple of chamber beneath the floor—rise two exquisite beds, ready made for the occupants; white sheets, big clean pillows, white blankets, felt mattresses as light as snowflakes, and steel springs under all.

WATCH IN HAND

you and 20 seconds the two berths are ready, the section enclosed with curtains. The chairs? I had almost forgotten to say that two are placed on their sides in the steel chamber vacated by the berths, where they remain until the section is returned to its hiding place. When all the berths are made up there is not a chair in sight. It takes the average Pullman porter from 20 to 30 minutes to make up the old-style Pullman berth. And what do you get? A board called a blanket, weighing about 36 pounds (in imagination), made of horse blanket material and of a color guaranteed to show no dirt; two little dabs of cotton called pillows.

Did you order a brass bed on the Columbia? Mason gives his brace a few turns, when, Phoenix-like from the ashes—that is, from the track, rises a dainty little affair ready for conveying you into the arms of Morpheus. My soul! Think of the advanced Harlem flats! Screw your bed out of the floor at night, screw it back into the morning! When all trains are operated by electricity, Mason will press a button and bring up berths and brass beds in less than 40 seconds.

Steel chambers under the car are strong, and perfectly ventilated, delightfully warmed, dust-proof, cinder-proof and moth-proof. The fresh air streaking through cleans the bedding. The stowage in these receptacles of all bedding, and the absence of weighty compartments in the top of the car lower the centre of gravity to the point of safety. The Columbia will never topple over. The Pullman rolls down embankments and often lands bottom upward. Mr. Plummer says he is willing to go into a collision with the Columbia as his battleship, and will cut through a whole train of Pullmans.

You enter the Columbia, finding it a parlor-chair car. Suddenly it is converted into a sleeping car, and as suddenly casts off the aspect of the dormitory and becomes a dining car. Forty men can smoke in it hour after hour without offending the non-smoker. By some peculiar trick of ventilation the smoke disappears through the roof.

The Cramps are thinking of adopting the device of under-floor receptacles for the ships of the navy. As all new vessels are electrically equipped an officer will be able to operate his berth by pressing a button. The disappearing bed will greatly enlarge his quarters. No more folding beds, couch-beds, etc. No more stationary bunks.—New York Press.

How to be Safe.

(Toronto News.)

A Hamilton man went to church last Sunday, and in his absence burglars stole $100 from his home. Moral: Take all your money to church, and give it to the missionaries.

The Public Appreciate

As was shown last week. The way they bough[t] store was really splendid. Two shops full from. We are going to make a special sa[le] starting to-morrow morning. We have an immense st[ock] choose from. Come and get your Hockey B[oots] here, you will make a saving of at least 15 per cent. We have a large assortment of beautiful Slippers for Men, Women and Children.

JUST THE THING FOR A X[MAS] PR[ESENT]

Trunks, Suit Cases and Valises at a 20 per cent. discount.

NOTE THIS:

TERMS STRICTLY CASH.

P. J. HURLEY,

LINDSAY'S GREATEST SHOE HOUSE.

ABYSSINIA.

An Enterprising King and a Wealthy

Mr. Wild-Blundell, who has returned to England from an eighteen months' expedition in Abyssinia, has given some picturesque details of his travels [illegible] ney.

During the entire period he was alone except for his escort of sixteen armed Abyssinians and Gallas, and for four months was in a country hitherto unknown to white men.

Thirty miles [illegible] supplies.

The greater part of the time was spent in the neighborhood of Lake Tsana, the source of the Blue Nile in Abyssinia, where it bears the Shoan.

Mr. Blundell speaks highly of the magnificent country, with very fine tribes and splendid cultivation, mostly in the hands of the Gallas. Along the tribal lines of the Nile, right down as far as the Soudan, all the way there is supposed a mining population engaged in washing gold.

There is an enormous quantity of gold in this region in which thousands of natives work the ground employed by them being the same as that in use on the West coast of Africa.

An Italian company is working gold, and there are also English concessions in connection with which English engineers are being sent out to Abyssinia.

Mr. Blundell spent nearly five months in the Abyssinian capital as the guest of Sir John Harrington, the British Minister, and was received on several occasions by the Emperor, who greatly assisted him in investigating the chronicles and manuscripts of the palace.

An Incentive to Aiming High.

(Stratford Beacon.)

The promotion of John Burns to a seat in the British Cabinet, with the title of Right Honorable, a distinction that many Lords would gladly surrender their hereditary titles to attain, should prove an incentive to the working classes to aim high. It has long been the proud boast of the Americans that any lad born in the United States, no matter how lowly his origin, might aspire to the Presidency. It has now been established, in the selection of Mr. John Burns, a London workingman, for Cabinet honors, that even a son of the "submerged tenth" can aspire to the Premiership of Great Britain—a position of even greater honor and power than that of the United States Presidency.

All of which goes to prove the fact that a constitutional monarchy is in no way behind a republic in opening its doors to merit. King Edward, in accepting John Burns as a counsellor, has exhibited the true spirit of the British monarchy. No wonder he is popular with the masses, and that his person is safe wherever he goes.

Faith

You cannot be expected to have faith in Shiloh's Consumption Cure, the Lung Tonic, as a cure for Colds, Coughs and all diseases of the air passages, if you have not tried it. We have faith in it, and we guarantee it. If it doesn't cure you it costs you nothing. If it does it costs you 25c. That's fair. Try it to-day.

Shiloh has cured many thousands of the most obstinate cases, and we do not hesitate to say that it will cure any Cold, Cough, Throat or Lung trouble. If we did not believe this we would not guarantee it. Shiloh has had an unbroken record of success for thirty years. It has stood every possible test without failure. Further

Proof

is found in the many testimonials of those who have tried Shiloh and been cured. Mrs. Archie Taylor, Asaph, Pa., writes:—"I bought a bottle of Shiloh's Consumption Cure and found it very beneficial. I have two children, and they had a terrible cough. I gave them everything I could think of, but they got no better, until one evening my husband brought a bottle of Shiloh. We gave it to the children when they went to bed, and they slept all night. It cured them completely. I shall always keep it in the house."

SHILOH

25c. with guarantee wherever medicine is sold.

DOMESTIC HINTS OF VALUE

ARE WORTHY OF BEING TESTED HOUSEKEEPERS

Some Are Timely and Should be Preserved for Reference.

Pure wheat starch is the best of all cheap powders for the skin.

Tea boiled with water, and strained, is a mild astringent lotion for lessening hair falling.

Don't water house plants too often in cold weather. A mistake in giving too little water is not so bad as giving too much.

To soften the hands and keep them in good condition rub with olive oil before washing, wash in tepid water with good soap, then dry well.

[illegible] where there is extensive discoloration [illegible] bent cotton may be soaked in oil and applied.

If you would get rid of rheumatism do [illegible] perspiration without [illegible] ling. If you would get rid of gout make your liver as active as possible.

The prevalence of scarlet fever, measles and mumps among the children of New York should warn parents to be careful in exposing their youngsters to the chances of infection.

The good housewife who likes to make the house bright and comfortable knows the value of flowers both on the table and placed around the room, and will try never to be without them.

To brighten patent leather shoes or boots take a piece of soft cloth, dip in a little spirits of turpentine, and rub over the leather. This will remove the dull look patent leather gets after wearing for some time.

Don't forget, if you need hot water for sudden sickness in the night, that four quarts of water over many burners will heat enough water than four quarts in one vessel to more than make up for the extra flames.

Widows wear mourning for two years at least; that is the conventional period. Crape is not often used now except as a trimming, and it is left off after the first year. The cap and the veil are worn for a year and a day; lawn collars and cuffs for a year.

Do not use too much force in polishing—a gentle brushing with a soft brush is better than the vigorous work of the bootblack. Never allow a thick crust of blacking on your shoes. Wash it off occasionally and apply a little castor oil; then polish over in an hour or two.

LINES IN MEMORY OF JUDGE DEAN.

By an Old Friend.

Rugged was thy nature,
Strong and true thy way;
Virile, manly, proud, sustaining,
Stern with vigor uncomplaining,
Through thy life's long day.

Gentle was thy sweetness,
Manly was thy mien;
Filled with heart's golden treasure,
Truth and honor in full measure,
Bravely to be seen.

Human were thy frailties,
Buoyant still thy mood;
Bearing bravely others' burdens,
Heedless yet of unsought guerdons,
Careless where they stood.

Loving was thy life,
Throughout each changeful year;
As husband, father, comrade, friend,
Before whose manhood man may bend
And drop a silent tear.

Righteous was thy soul,
With visions strong and bright;
Nor marr'd by littleness nor care,
But life itself a holy prayer
In the Eternal light.

—F. B., in Christian Guardian.

DO YOU BELIEVE IN PROPHECIES?

What May Befall in 1906.

Here are Spangler's prophecies for 1906;

The dissolution of Russia.

The overthrow of Turkey.

The assassination of the Czar of Russia.

The prevention of three wars by President Roosevelt.

A protracted race-war in the South.

Destructive spring floods in the United States.

A destructive eruption of Mount Vesuvius.

The activity of Mount Pelee and Popocatepetl.

Volcanic eruptions in all parts of the world.

The eruption of many volcanoes now supposed to be extinct.

Great loss of life at sea by storms.

Destruction of two western cities by cyclones.

Earthquakes in all parts of the world.

Destructive earthquakes in California and the Philippines.

Rebellion in Spain.

Great disturbances all over Europe.

Spangler says further that the summer of 1906 will be hot and sultry throughout the temperate zone, with extensive death rate.

That Christ will make his spirit felt among the peoples of the United States and England, in which countries there are to be fervent religious and potent political movements which are to overcome in a great degree the present spirit of graft and commercialism.

That the United States will continue as a world power and the leader of other nations.

That Pennsylvania is to have an administration of the people and that discoveries of corruption will be made which will drive some of the guilty to suicide.

That God will wreak terrible vengeance upon the Russians for the massacre of the Jews.

The Old-Time Winter.

There is the grand old winter,
The winter of long ago,
When round the loud and leaping fire
We heaped the hissing hickory high-er,
While up the storm northern way
There gleamed by night and shone by day
A wilderness of snow?

Those were the good old winters
That man can never forget,
When all day long the sawmills hummed,
When all night long the fiddles strummed,
When 'neath the moon the men and maids
Went tumbling down the snowy glades,
When'er the sleighs upset.

Those were the good old winters
Whose spring days echoed all
The happy days of flannel frocks
Of spinning-wheels and home-made socks,
Of "forty-fives" and heel-and-toe,
Put n-ha, "Around-you-go!"
And "Swing your partners, all!"

Where is the grand old winter,
With its noisy chopping bee,
Its kissing games and happy greetings
An' a hull six weeks of protracted meetings,
His pigeon shinney on the pool,
His taking the girls to singing school,
It's gone away from me.

Where is the old-time Christmas?
It's said a four-eden.
When after a sleigh ride they gare a body
A steaming bowl of good hot toddy;
When whisky was fifteen cents a quart,
An' your head was on good terms with your heart,
And you had a stomach, too.

Where are those good old winters?
In history they rest.
"Behold," He said, "I make all things new."
I'm glad He kept His word, ain't you?
For, after everything's said and done,
We wouldn't go back to the old—not one!
For everything's for the best.

—The Knox in Hamilton Herald.

BOYS and GIRLS

would you like to earn $1000 per year.

You can do so by becoming an expert **Stenographer or Book-Keeper.** These are the stepping stones to the best positions in the business world. We can prepare you for a good position and best of all will secure the posit on for you as soon as you are prepared.
