Lack of System one of the Chief Causes of Loss. EVERY FARMER SHOULD KEEP A

Some Good Advice Given by an Author-

SIMPLE SETT OF BOOKS.

ity on Such Matters. In order to pay, farming should be conducted in the same way as other business enterprises A suitable return should be received, not only for the money invested in the land, the labor and cares of management. Every farmer should, by a simple system of bookkeeping, keep a careful chees on his receipts and expenditures, so as to know exactly which of his farming operations are yielding him a profit, which are conductat at a loss, and which are causing him merely to "mark time." A little tiguting of this sert may reveal to him a number of little leaks which imperceptibly drain away the profits that should reward his labor. In these days of fieres competition it is only by keeping down the cost of production and preventing all waste that farming can be made successful. Some sources of loss are here given which will read-Hy suggest others. Lack of System.

One of the chief leaks on many farms is the less of time and ensigy because the management is not carried out on any definite system. A study of any old and sneugasful business will show that success has Street returning to the city on systematic way of doing things. System may be carried too far so as to become merely mechanical, but as a general proposition it may said that after a well defined plan of action has been determined should be rigidly carried out. more knowledge is gained, or new ideas acquired, it will be necessary to make changes in the routine, but no change should be made without due deliberation. All work should be carefully planned in advance, and all tools and implements gotten ready so that there may be no delay when operations actually begin. Use of Time Tables.

All men employed on the farm should have well-defined duties to perform, so that their time may be used to the best advantage. A good system provides for the feeding stock at regular hours each day. When stock are fed and watered at regular hours they become accustomed to the regularity of feeding, and thrive much better than if fed at different hours on each succeed-

Care of Implements. A very common source of loss is found in the neglect of expensive farm implements and tools. These are left lying in the fields where they have been used, subject to all the inclemencies of the weather. which are more destructive than actual use. Small tools are frequently lost and large implements rust and | Moore for the Bank of Montreal, Mr. | left lately for the township of Anrot. There should be a place on every farm where implements may be kept under cover, and none should be left outside when not in use. A workshop should be provided in connection with the toolhouse, so that during rainy days or other slack periods implements may be painted and necessary repairs made. Much time is lost by farmers during busy seasons, such as seeding, having and harvest, because a boit or some other small part has been lost, and a trip to blacksmith shop or foundry is necessary to replace it. This waste of valuable time might be prevented by a little forethought or examination of the implement before it was required for use. In many cases implements are purchased which the farmer could well do with-

Keeping Unnecessary Stock. This is another frequent cause of loss. If a farmer has more horses than are required to carry on the work of the farm, he should sell those he does not need, if a figure at all reasonable can be otained. The milk or butter to pay a good profit on her keep should be disposed of, and her place filled by another, A for wooks use of the scales and Babcock tester will asually furnish some surprising results in this di-

Improper Feeding of Stock. To secure maximum profits it is necessary that stock should be fed intelligently for the object in view. Rations should be carefully comproportion of albamineids and carbohydrates, or as it is called, a proper nutritive ratic. Animals should an animal comes, the greater becomes the cost of growth. Again, money is lost by failing to provide green crops for feeding during the summer droughts" incident to this country. Horses in many cases are given all the hay they care to eata practice not only wasteful but injurious to the animals as well.

Waste of Manure. In the older settled portions of Canada the restoration or maintenance of soil fertility is already an it is, then, that all the manure made on the farm should be saved, and used in the best possible condition, without loss from leaching, firefang-

Inferior Seed. In many cases a total or partial failure of a certain crop is due to the purchase of a cheap or inferior ing. grade of seed. Such seed is usually badly mixed with foreign seeds, so that the farm becomes overrun with weeds which not only replace useful crops, but sutail a vast amount of labor to get rid of. The division of a farm into small or irregular fields and other unciltivated spots.

Neglect of Fences and Buildings. want of a nail the horse was lost,' steam. | require power of the cold wave.

dollar or two spent for lumber or nails will often result in a large saving of feed and increased comfort to the stock during the winter months.

Neglect of a leaky roof is often responsible for heavy losses of grain or fodder and in the timbers of the buildings; many a good frame has been ruined by a leaky roof.

Lack of Knowledge. Nearly all the leaks previously mentioned may be set down to carelessness, but many farmers also lose because some of them think that nothing can be learned from others, and that a new idea is necessarily nonsouse No matter how good farmer a man may be, he can still gain ideas from others that wil prove of value to him The experience of the Experiment Stations and of successful farmers should be carestock and implements, but also for fully seanned for "pointers." How many farmers there are who do not subscribe to a paper devoted to farming; these men are certainly losing

money by false economy. In this age of progress it is ideas that count a single idea gained from a paper will often, when put into practice, pin championship of St. Mary's Club, represent a gain of many times the subscription price. The local paper should also be supported, and each farmer should do all he can to as sist the editor of the agricultural newspaper and the local paper to produce as good a sheet as possible. and to extend the circulation of

F. W. HODSON, Live Stock Commissioner THE SPRING ASSIZES

Three Civil Cases and One Oriminal Charge Dealt With,

The spring assises opened on Monday afternoon at 1 o'clock, and ed of in quick order, Mr. Justice been largely due to a methodical and 6 o'clock train. The Grand Jury did not complete their labors till this morning, however, and thus the witnesses and jurymen were entitled to two day's pay, Mr. D. O'Connell, barrister of Peterboro, acted as Crown

> Bayes vs. Lambert, was an action for assault arising from a quarrel between two farmers in the town- ers' barns painted. Heretofore the ship of Thorah, in the County of average farmer has been contented Ontario. When the pase was called the parties got together and settled. Mr. Thos. Stewart and Mr. C. E. Weeks, of Woodville, for the plaintiff. Mr. Wm. Steers and Mr. A. J. Reid, The game resulted in an easy victory of Cannington, for the defendants.

Edwards vs. the Bank of Montreal and James Bogue.-This was an action brought for negligence in leaving a gate dividing Bank premises from the highway leaning against the fence on the east side of William-st., from which it fell or was pulled by the plaintiff, a little boy of five years of age, on himself. The Judge dismissed the action as against the Bank, holding there was no negligence proven as to them, Bogue being an independent contractor. The jury found a verdict for the plaintiff for \$150, for which judgment was entered with County Court costs against Bogue. Mr. Wm. Steers for the plaintiff, Mr. F. A.

H. O'Leary, K. C., for James Bogue. Travis vs. Hale.-In this case a verdict for \$1 and costs were given against both defendants for slander. with leave being reserved to defendant to move to have the judgment vacated against the husband on the ground that he was not responsible. Mr. W. F. McCullough, of Toronte counses for plaintiff, and Mr. F.

McDiarmid for defendant. Criminal Cases. King vs. Muir .-- Malcom Muir,

Another Accident at Sylvester Weskr. Another accident happened at the Sylvester Works a lew days ago, the victim being Mr. Ed. McKendry, son of Mr. Wm. McKendry, of Fencion cow which does not yield enough | Falls. The unfortunate young man caught his finger between two blocks while operating a machine, bruising it badly, but no bones were broken Mr McK-ndry will be off duty for a

> week or so. Our Smallpox Patient.

Mr. Geo. A. Metherell the smallpox patient, is jolly and comfortable in his tent on the gravel pit lot. He has been well enough any day to pounded in orser to secure a proper attend to his ordinary business, and some of the town physicians feel convinced that he only has an attack be selected for early maturity and of chicken pock, but as Dr. Hodgson, fed so as to be ready for market at of Toronto, pronounced it smallpox, an early age. The nearer maturity he will be kept secluded for the legal period.

Bowling Tournament. The bowling competition which has been in progress during the past week at St. Mary's Club rooms was concluded on the 11th. Of the 30 who entered the following are the names of the eight who stand highest on the score list: Jas. Dwyer, 529; Jos. Scully, 523; Thos. Brady, important question. How desirable Podger, 500; Chas. Podger, 491; 516; L. V. O'Conmor, 510; Robert Louis Primeau, 491; P. J. Hurley, 486. These will play threen ends each for the championship in the finals this evening. Those who are in the finals (at the other end, of the list) will play one end each for a consolation prize. The three pin tournament will begin to-morrow ever-
