

The distracting headaches from which so many women suffer make life a daily purgatory. If men suffered with headache as women do, business would be almost at a standstill. Does not the fact that women only suffer from these severe headaches suggest that there must be a womanly cause for them?

When the womanly organism is diseased, headache, backache, nervousness and sleeplessness are consequences which are sure to follow.

\$500 Reward for Women Who Cannot be Cured.

Backed up by over a third of a century of remarkable and uniform cures, a record such as no other remedy for the diseases and weaknesses peculiar to women ever attained, the proprietors and makers of Dr. Pierce's Favorite Prescription now feel fully warranted in offering to pay \$500 in legal money of the United States, for any case of Leucorrhea, Female Weakness, Prolapsus, or Falling of Womb which they cannot cure. All they ask is a fair and reasonable trial of their means of cure. WORLD'S DISPENSARY MEDICAL ASSO-

CIATION, Proprietors. Buffalo, N. Y. "I took two bottles of your 'Favorite Prescrip-tion' and two of the 'Golden Medical Discovery' and am feeling well," writes Mrs. Dan Mc-and am feeling well," writes Mrs. Dan Mc-kenzie, of Lorway Mines, Cape Breton Co., Nova Scotia. "I had uterine trouble, pain in the side and headache. After taking your medicines I got well. You may publish this or use it in any way you think best, as I cannot speak too highly of Dr. Pierce and his medicines."

FREE. Dr. Pierce's Common Sense Medical Adviser is sent free on receipt of stamps to pay expense of customs and mailing only. Send 31 one-cent stamps for the book in paper covers, or 50 stamps for the cloth bound volume. Address Dr. R. V. Pierce, Buffalo, N. Y.

## WHAT GOOD ROADS WILL DO

EVERY RESIDENT OF THE COM-MUNITY DERIVES BENEFIT.

An Increase in Population Always A. Fisher, Follows their Construction.

(Municipal World.) The advantages of good roads seem almost endless. An enumeration of them alone would fill a volume. Some

of them are: They reduce the isolation of farm

They enable the farmer or his iamily to attend the church, the school, public meetings, social gatherings, with greater comfort and regulari-

They facilitate the distribution of

They enable a farmer to get a daily paper.

They enable the farmer to keep in oloser touch with market prices. They reduce the cost of taking

farm produce to market. Farm produce reaches the market In better condition, particularly fruit, vegetables, and perishable stuff.

In dairying districts, the cost of hauling milk is much reduced it can be harded with much greater convenience, and reaches the cheese or butter factory in bitter condition.

profit by the more prosperous condition that good roads create.

### Saturday's Market

There was a fair attendance of and flesh in every dose. sellors at the Market last Saturday, taking the bad roads into account. Prices inside ruled as follows: Butter 18c. to 20c., eggs 20c. ito 25c., ducks 60c. to 75c. per pair, chickens 50c. to 70c. per pair, goese 10c. per Ib., turkeys 12s., lard 13c. Outside considerable beef and pork was offered, and some potatoes. Beef sold at a6.50 to \$7.50, perk, dressed, at \$7. A few loads of clover hay sold during the day at \$8, but timethy weld us to sto.

LINDSAY RINKS MADE A RECORD SCORE IN PETERBORO.

They Overcame a Lead of 24 Points and Captured the Peterboro-Lind. say Cup by 5 Shots.

March 11, the ricks that went to Peterboro to play for the Peterboro-Lindsay Cup managed to defeat the Peterboro rinks on their own ice by twenty-nine shots. This gives Lindsay the Cup again for this season by the narrow margin of five shots. The players report that the Peterboro ice was in great shape and the contest to be of the most friendly nature. Early in the game the Lindsay rinks took the lead, and it looked at one time as if they were going to have a complete walkover, but the Peterboro players got down to play and reduced the Lindsay lead, until at one time they were nearly on even terms; but gradually our men pulled away again from their opponents. The excitement at the close, - when there were only a few ends to play and Lindsay had a lead off twentyfour or five, and the result depended altogether upon these ends, - was very great. Mr. Flavelle finished first, twelve up. . The other three rinks combined were then thirteen up and one end to glay. This end yielded them four shots, and the contest

ended in Lindsay's favor. FULL SCORE. Peterboro. Lindsay H. LeBrun, R. Harsbone, T. S. Bradburn F. Crandell. G. Halton, R. H Cuthbert, Hamilton sk D Flavelle sk 18

# IMPORTANT

MUST BE USED. Strong and Well-Fitting Boxes Needed

For The Trade. Department of Agriculture, Commissioner's Branch,

Ottawa, March 3, 1904. At the dairy conventions recently held, Mr. J. A. Ruddick, Chief of the Dairy Division, Ottawa, made a strong appeal for better cheese boxes. Boxes are, said he, necessary to protect the cheese from injury in transportation, to facilitate their hendling, and to permit there being piles several tiers deep in a warehouse without being crushed out of shape. Without the boxes the cheese could not be delivered in Great Britain in a presentable condition. Now, if it be desirable to have cheese in boxes at all, it is surely important that the box should be strong enough to reach its destination in a sound condition. A great many shipments of cheese are landed on the other side with twenty-five per cent. of the boxes broken. Indeed, some reports from the inspectors show a a larger percentage. This simply means that one quarter of the money paid for the boxes has been spent to no purpose. And that is not all, for the broken boxes in a shipment, while detracting from the actual value of the cheese which they once contained, make the whole lot less attractive to the purchaser.

What are the Reasons for this unsatisfactory state of affairs? In the first piace we have increased the weight of our cheese, and at the same time reduced the strength of the bex by using thinner veneer and an inferior quality of elm. It is evident also that there are many box makers who have never properly learned their trade, as a large proportion of the boxes are only half

put together. The increasing cost and scarcity of olm, and the demand of cheese maruf cturers for a cheap box, have induced the veneer cutters to reduce the thickness of the vencer, until much of that now offered for sale is entirely too flimsy for the purpose. It should never be cut less than full five to the inch. A great deal of it is six, or some even seven, to the inch.

Another fault in the veneer is that the log is often not boiled sufficiently to soften the wood; consequently the veneer knife shatters it while cutting, and gives it a tendency to salit casily. Another result that the salts of the wood are not | reach of men without capital. of insufficient boiling or steaming is extracted; consequently boxes made from such stock mould very easily. tried to persuade me to accept the thin veneer, some claiming that it
