### WATER COMMISSIONERS MEET

And Listen to Some Information Concerning Artesian Wells.

The Waterworks Commissioners met Monday afternoon at 3 o'clock in Secretary Hopkins' office, Chairman Flavell and Commissioners Messrs. Beattie, Brady, Mayor Ray, and Sept. Neillie being present.

Communications were read from Newmarket, Berlin, Woodstock, and Guelph Agricultural College, answering questions which Sept. Neillie had sent to the in regard to artesian wells. The Newmarket letter stated that they had two artesian wells three feet in 1887 and now have three more. They are from 145 feet to 260 feet in depth, and the total flow is 60,000 gallon, but by pumping the flow is increased. The cost of drilling is about \$2.35 to \$2.50 per foot. The drilling has been through mixed clay and no rock, and the water is used a great deal on farms.

The Berlin wells are pumping about 120,000 gallons every 24 hours. The character of ground is composed of clay and gravel.

The well at Guelph Agricultural College only pumps 50 gallons per minute and cost \$2 per foot for drilling. About 60,000 gallons are pumped daily. The ground is composed of limestone 65 feet from the surface, then sand rock, and would require 700,000 gallons per day.

It was decided to refer the letters to a special committee, and the Board gave some answers.

The Board then adjourned.

### Hints for the Front Lawn.

(St. Louis Globe-Democrat)

"As the snowdrifts subside the careful gardener will notice that they will leave a this, sticky coat of black soil on the grass plot. This must be removed at once, or it will destroy the turf. Every morning wash the lawn with castile soap, cleansing thoroughly. Do not shake the grass, as it will cause it to split at the ends and fall out. Dry carefully with a palm leaf fan. A good lawn is worth all the care you can bestow upon it.
