cent. increase in seven years. Jacan has gold, silver, copper, lead, tin and mercury in abundance, bemen, were all kept busy answering | sides coal and iron.

Japan has every kind of manufacturing-cotton goods, telescopes, microscopes, watches, knives, spoons, electric machinery, matches, clocks, woollen goods and a host of other lines. In 1870 manufacturing in Ja gan was almost nil; now she has over 8000 factories of various kinds. Japan has railroads gridironing the empire, electric light plants in nearly all the cities and telegraph lines all

over the country. Japan did not have a single battleship in 1895, while now she has six from the western ports at 1 cent joy a very large patronage, and buyof the first class and many war vesers as a rule flock to the spot where they can buy the best goods sels of inferior classes.

Japan has facilities for making everything necessary for the construction and equipment of railroads except locomotives. Japan runs her railroads with na-

tive labor entirely, from the general superintendent down, including the train dispatchers. Jacan has over 3000 miles of rail-

way and 1500 miles of telegraph lines in operation. Twenty-live years ago not a mile of this system existed. Japan is mining over 2000 tons of coal per day, nearly 1,000,0000 tons yearly, and the supply is of fine quality, apparently inexhaustible. Twenty-five years ago the output was only 300 tons per day. Jaran has 201 cotton mills, with

887,000 spindles. Including cotton growing, this industry employs 1,000,000 people. The average cotton production is 360 pounds to the acre, against 250 pounds in our southern States.

Japan does weaving in 660,408 dwellings or establishments, containing 924,123 looms and employing 1,042,866 persons. The weaving is done in colton, silk and silk and cotton mixed. Japan has 573,000 men in its regular army, beside an immense number in the reserves and militia,

A Good Word for Chamberlain's Gough Remedy.

"In December, 1900, I had a setere cold and was so hoarse that I could not speak above a whisper,' says Allen Davis, of Freestone, N.Y. "I tried several remedies but got no relief until I used Chamberlain's Cough Ramedy, one bottle of which cured me. I will always speak a good word for that medicine." For sale by alll druggists.

New Rule for Boiling Eggs.

(Philadelphia Record.) Cooks are often accused of want of method, but the Aunt Dinah in Howard Paul's new egg story is not open to any such reproach. Invariably, when she cut the eggs in the saucepan she began singing "Rock tof 'Ages," and sang through two verses, "Aunt | not be produced. not three verses in that hymn?" "Dar received such widespread and unquali-Dinah," asked Mr. Paul, "are there not three verses in that I sings only two when fied endorsement. No other medicine at \$7.50 a ton in Lindsay and the walls. A desirable farm. I wants 'em soft an' three when I has such a record of cures of female dealers said they made no money at a ply to want's 'em hard."

A LECTURE ON "GERMANY." March,

REV. J. W. WALLACE, MINISTER OF ST. ANDREW'S.

Who Visited the Land of the Kaiser Last Summer, Gives Some of His Impressions.

Rev. J. W. Waliace, B.P. pastor St. Andrew's church, gave a second interesting lecture on "Germany." the schoolroom on Thursday evening, 24th inst., to a goodly number of

In opening Mr. Wallace said that, having spoken on the same subject before, he would try and not repeat himself. The military system of Germany is probably one of the firest thorough in the world, and their soldiers, if not the bost, at least one of the best drilled, also their infantry most efficiently equipped. All men most serve a certain time in the ermy. The pay of soldiers is only about six cents per day. The Germans are very proud of their soldiers and military glory. The people do not engage very much in physical enforced military service is irksome. yet it has by the compulsory exerciso done a great deal to maintain the physical standard. The splendid ARCUMINIS ADDUCED BY THE army music and patriotic songs also the close connection of Royalty with the military people do a great deal to engender love of the native | Opening of the Canal would Reduce | it is claimed that one operator can for their army. The military spirit is irculcated even in the small boys.

dence, and uses his power to further the interests of his people. The empire is divided into 23 states, each of which is ruled by a king, and the whole by an Emperor. The Reichstag is composed of 397 members eiected by the people, each member must have two-thirds of the number of votes cast belore he can be elected. There are 15 different parties in the Reichstag to-day. The Bundestath partly corresponds to our Senate or Cabinel; members are not elected but appointed by the kings of the different States according to ways chosen from the representatives from Prussia. The laws really come from the Emperor with the advice of the Bundesrath, but the Reichstag, although they have no power to make laws, may veto those made by the Bundesrath.

rehy, but in many respects it is

imost absolute. The emperor is a

DEPUTATION FROM LINDSAY.

Tons of Coal Consumed in Vic-- toria County.

Review the following report of the remarks made by Lindsay's representatives at the meeting of the Royal Transportation Commission hold in ferent grades of yarn. Peterboic on Thursday :

Mr. Thos. Stewart, of Lindsay, was called to give evidence. The main object of the decutation from that town was to impress the importance of the completion of the canal in the interests of Canada and of many institutions concerned. He read statepopulation, and the Promier is al- ments from Mr. Flavelle, regresenting a milling company, and Dundas & Fiavelle Bros., from R. Sylvester, representing the Sylvester Manufacturing Co., from Robt. Kennedy, president of the Kennedy, Davis Milling Co., and from woollen manufacturers, who stated that the present freight rates made it impossible for them to use Northwest wool, while others claimed great benefit in the reduction of rates, would from the completion of the canal.

Mr. R. B. Rogers cointed out that his instructions were to give the remainder of the canal a depth of 8 feet, 4 inches. The locks already built could be easily changed by the construction of a small addition.

Mr. Fiavelle stated that he had been going on the basis that the canal would not have that depth. The saving effected by its completion would therefore be largely aug-Mr. Bertram observed that

manner in which the Cereal Boys first attend common school, very fittle doubt. One of the most

ten exam- he had greater faith in the value of ness in the Northwest. He could readily understand that the canal, if operated, would reduce the freight rates, and hence, while he would not that the breaking of shipment was not desired, there would be quite benefit in the reduction of freight rates.

Mr. Robert Kennedy said he had not prepared any concise statement with regard to local business. The Rathbun Co. was interested in navigation, and what was very important was that there should be facility for bringing traw material to different factories along the Trent Valley system. If the latter were opened it would effect the rates to the benefit of the shipper, and eventually to consumer, and Mr. Kennedy stated, that the reduction in cases would be fully onethird. There were industries such as the manufacture of lime, which required just such encouragement as better facilities for shipping. He was satisfied that the country was in need of the canal. In reply to Mr. Reford, who asked: "Do you coal in Lindsay?" Mr. Kennedy reglied, "We use 10,000 tons of coal per year in Lindsay for general and domestic purposes." He was of opinion that it would be possible to bring Mrs. Anderson, Jacksonville, coal into Lindsay from Oswego at a saving of 50 cents a ton. There was a vary large quantity adjacent to the canal, would be im-

Mr. A. H. Ryder gave evidence with reference to the Excelsior business. "DEAR MRS. PINKHAM: - There are Many enquiries were received from but few wives and mothers who have the Old Country in regard to this not at times endured agonies and such product of basswood, used for packing and upholstering, but on account such women knew the value of Lydia of railroad charges, a market at any distance could not be reached.

Mr. F. C. Taylor said he had one opinion, and that was that the canal should be immediately completed. Mr. J. H. Sootheran stated that if the Commission were so inclined.

Mr. Jas. Graham, representing Victoria County Council, said he spoke what it would be if there was water transcortation.

Mr. Bertram-"It only costs a dollar from the bridge to Lindsay." LINE OF THE PARTY OF THE PARTY

WEAVING IS REVOLUTIONIZED.

TIMES THE QUANTITY.

low Will This Affect Operators in the Weaving Trade?-150 Yards Per Day, the Product of One Loom. (American Engineer.)

Following close on the introduction

the turbine steam engine, which has done away with the waste gower involved in the reciprocating motion, there is an announcement of a rotary loom that is said to turn out five times as umch cloth as the looms now in use. The driving of the shuttle back and forth between the work thoroughly and agreeably | the alternately lifted threads of the warp has been the principle of all traced. The rotary loom introduces a new grinciple, the idea of which was derived from the knitting machines now in general use. While the ordinary loom turns out from 25 to 30 yards a day, it is claimed that the rotary 'loom can turn out 150 yards, -With the new loom there is no stopping to fill the shuttle. It occupies less floor space, is comparatively noiseless, simpler in construction and more easily operated. The attempt to require each weaver to operate two of the old looms led to a strike in the New England mills, but the Cost of the 12,000 or More attend to five of the new circular looms. The patent for this invenmachine has already been built and Another claim for the new invention and weaves it can produce, and the many ways in which it can blend dif-

> It may not be satisfactory for the cotton interests to contemplate a revolution in their industry. But if the claims for the new loom are reasonably sustained it will effect a complete transformation. Better work, more varied in pattern, many times the speed, and requir- very lowest rates of interest. ng far less skilled attendance, are achievements that would change the aspect of this country. Stuart Mill doubted whether laboursaving machinery had ever shortened the daily toil of a human being and it would be over-sanguine to anticipate any such result pfrom the perfecting of a new process of weavwithin the reach of th eaverage citi- Prices moderate. zen. The object of all changes and all economic legislation is to increase the personal results and rewards of effort. As a promise of a manifold increase in the groductive power of labour in woollen and cotton mills the new device will be regarded with deer interest.
