SINGERS

RSE CLIPPERS

(To the Editor of The Post.) Sir,-In view of the fact that the

town Water Commissioners have for some time past experienced considerable difficulty in supplying sufficient filtered water for the town's rapidly increasing needs, and also from the fact that numerous complaints have been made by citizens of the unwholesame quality of the water supplied them during the winter and early spring, it has occurred to the writer that something should be done to improve the quality of the LEATHER MITTS water pumped through the mains for domestic use, in order to avert the probability or even posibility of a serious epidemic. As to the purity of the present water supply from the Sougog, (the analytic tests to the contrary, notwithstanding), it requires more than the proverbal "grain of salt" for the average citizen to realize it to the full when Slakeing his thirst on a hot July day. Now, just a word or two as to the

emedy. Believing that an all-wise Providence has provided an abundance of the "sparkling pure" element, in almost, if not every section of this fair Ontario, I am persuaded that the geographical position of the town of Lindsay will be no exception to the rule. The writer has actual knowledge of a town some miles to the west of us, where a waterworks system for fire and domestic use was established a few years ago. A suprly of water from a somewhat rapid bout 10.30 e'clock Wednesday stream passing through the centre broke out in a cooper shop at- of the town was available for the hed to the bank barn owned by purpose, but the Council of that day, in their wisdom, spent a little money D. Dunoon, whose residence is on in sinking a test well close beside the toria-ave, north, just outside the above-mentioned stream. At the n boundary. The flames spread derth of 160 feet a flow was struck dly to some adjoining outbride that rose to the surface, but as the calibre of the ripe was small, sufficient water was not obtained. Howaber of head of cattle were cond, but the animals were tiberated ever, the Council gained courage by bemters of the family, and some their success, and a second and larger well was sunk some 20 dt. from the alarm was sent in from the first one. The same flow at 160 ft. Morning, Asa. Evening, Ban. Noon, rist box and the brigade made was met, but the drilling went on Hiru. Forenoon, Gozen.
