

We Paid \$100,000

For Ligozone—Yet We Give You a 50c. Bottle Free.

This Company, after testing Ligozone for two years in the most difficult cases, paid \$100,000 for the rights. That is by far the highest price ever paid for similar rights on any scientific discovery. We publish this fact to show you the value of Ligozone. Men of our class will pay a price like that for a product of remarkable worth to humanity.

Kills Inside Germs

The reason for that price is this: Ligozone alone can kill germs in the body without killing the tissues, and nothing else in the world is good for the human body. Ligozone is a germicide so certain that we publish an offer of \$1,000 for a germ that it cannot kill.

Germ Diseases

These are the known germ diseases. All that medicine can do for these troubles is to help Nature overcome the germs, and such results are indirect and uncertain. Ligozone kills the germs, wherever they are, and the results are inevitable: by destroying the cause of the trouble, it invariably ends the disease, and forever.

Not Medicine

Ligozone is not made by compounding drugs. Its virtues are derived solely from gas, made in large part from the best oxygen producers. By a process requiring immense apparatus and 24 hours of time, this gas is made part of the product. Ligozone has, for more than 20 years, been the constant subject of scientific and chemical research.

Will Get Expert Training.

LIBRARIAN OF THE PUBLIC LIBRARY WILL GO TO MONTREAL.

The Board of the Public Library last week was attended by James Harding, chairman, and Messrs. W. Flavell, F. F. Moore, R. K. R. M. Beal and E. A. Barry, secretary.

DESPONDENT WOMEN.

Find New Health in the Use of Dr. Williams' Pink Pills.

A few years ago Mrs. James R. Stuart, of Montreal, Que., who is well known to most of the residents of that town, found her health severely shattered as the result of an attack of anemia. As told practically in her own words, Mrs. Stuart says:

"My blood was turned almost to water; I suffered from nerve racking headaches, and the least exertion would cause my heart to palpitate so violently as to render me almost breathless. I wasted away in flesh and often was so weak that I could not walk about. I was under the care of a good doctor, but as I was not getting better, I grew melancholy and despondent, and felt I was becoming a hopeless invalid. At this stage I was advised to use Dr. Williams' Pink Pills and I began taking them, thinking it would be a miracle if they ever helped me. To my great gratification when I had been using the pills less than a month I found my health improving. I used about a dozen boxes in all and found myself enjoying once more the blessing of good health. I had been reduced to almost a skeleton in appearance, and while taking the pills gained over twenty pounds in weight. I gratefully recommend the pills to other ailing women."

Dr. Williams' Pink Pills are the greatest blood purifier and nerve tonic known to medical science. Through their use pale cheeks are made rosy, dull eyes made bright, and thin wasted figures made plump. Every dose makes new, rich red blood that drives out disease and strengthens every organ in the body. You can get these pills from any dealer in medicine, or by mail post-paid at 50 cents a box or six boxes for \$2.50 by writing the Dr. Williams' Medicine Co., Brockville, Ont.

ORILLIA POWER PLANT.

Rock Tunnel to be Bored Fifteen Hundred Feet.

The town of Orillia has decided to restore the power plant at Ragged Rapids by boring a large tunnel in the granite rock some fifteen hundred feet long. This will entail a large expenditure but will be of a permanent character that will insure a large increase of power secured. The work may take three months to accomplish, but it will be pushed with vigor. Contractors are being invited to submit tenders and specifications. The Canada Lime Works intends employing some four hundred men, and will commence building operations in a week or two.

Free Trade in Britain.

(W. K. Sun, Toronto.)

No experiment could well be more decisive than that of free trade in England. It was followed at once by commercial expansion, by the rapid growth of wealth, by an increase of general prosperity, and an improvement of the condition of the people. But most notable was the effect produced on the interest which seemed especially imprudent and most violently resisted the change. It was not unreasonable to fear that the land would lose the artificial value lent it by protection. Yet the land-wowners did not suffer. An assessment based on the rental of agricultural land was higher in 1852 than it had been in 1845. Under the stimulus of competition the methods of agriculture were improved. The condition of the farm laborer has changed for the better. No one acquainted with the rural districts of England can doubt in the same way the shipping interest, which found, perhaps not unexpectedly, that it would suffer by the repeal of the navigation laws, instead of suffering entered on a new era of prosperity. It is under the protection of the system, and ought, according to the Protectionist theory, to have been flourishing at the expense of Great Britain.

THE DEAD FISH NUISANCE.

Conflicting Opinions as to the Extent of the Slaughter.

It will interest Lindsay citizens and especially our Water Commissioners and members of the Board of Health, to learn that Capt. Jack Bowerman, Fishery Inspector, of Port Perry, is of the opinion that the number of dead fish this spring is no greater than in past years. (Capt. Bowerman writes to the Toronto World as follows: "I beg leave to state, acting in the capacity of captain on Lake St. George and the Kawarthas for the past thirty years, as fishery inspector for the last ten, that there was nothing unusual this spring over other years. As to the statement that the lake was frozen to the bottom, it is too ridiculous to need contradiction.")

In view of the fact that many wagon loads of dead fish have been picked up along the shores of the river above the Waterworks intake pipe, and that it is generally admitted by the farmers along the river that the number of dead fish this spring exceeds anything ever witnessed by them, Capt. Bowerman's statement appears to be ill-founded and not calculated to reflect credit upon his perspicacity as a fishery inspector. His opinion is not borne out by Lindsay railway men who pass through Port Perry daily, nor by the village representative of the Cambridge Journal, who writes as follows: "The oldest inhabitant does not remember when so many guilts were seen in the lake as this year. The reason is easily seen by anyone walking on the railway track, or what is termed the dump. There are thousands of dead fish lying up-turned in the gutters and on the banks of the river. It has been estimated that enough fish have died from the effects of the cold, hard water to cover a farm one hundred and fifty acres in size, if placed side by side. It is now estimated that so many fine fish have died from the extreme winter, and from want of air holes in the ice. It is said that ninety per cent. of the fish which have died are bass, and ten per cent. fine maskinonge."

AT ST. MARY'S CHURCH SUNDAY.

Sermon by Fr. O'Sullivan—"Zeal the Proof of Our Charity."

At St. Mary's church Sunday morning Rev. Fr. O'Sullivan delivered an earnest and impressive instruction, his text being "Above all things have a constant mutual charity among yourselves," words taken from the Epistle of the day, I Peter, iv: 7. Our Lord has told us that the first and greatest commandment is to love God with all the faculties of our being, and that the second is like to this, "Thou shalt love thy neighbor as thyself." The best proof that we love God is that we love our neighbor, for St. John tells us that if any man say that he loves God and hateth his neighbor, the truth is not in him, for how can a man love God, whom he seeth not, if he loveth not his neighbor, whom he seeth? "This is a matter in which, though well instructed, we are sometimes short in practice, consequently it is well for us, at the approach of the great feast of the Holy Ghost—the Spirit of charity—to recall our duties to our neighbor. We should love him because God loves him, so loved him as he became God for him. We should love him because God has commanded us to love him, not only by his own lips, but by the mouth of his apostles. "This is my commandment, that you love one another, as I have loved you." "By this shall all men know that we are his disciples if we love one another." We should love him because we are all children of a common Father, and no one should be inseparable to what affects the other. As Christians and Catholics we are bound by still stronger ties than the common one of humanity. By baptism we are members of the mystical body of Christ. We receive the same sacraments and assist at the same sacrifice.

An Open Letter

From the Chopin, S. C. News:

Early in the spring my wife and I were taken with diarrhoea and so severe were the pains that we called a physician, who prescribed for us, but his medicines failed to give any relief. My friend who had a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy on hand gave each of us a dose and we at once felt the effects. I procured a bottle and before using the entire contents we were entirely cured. It is a wonderful remedy and should be found in every household. H. C. Bailey, Editor. This remedy is for sale by all druggists.

Dustless Roads in France.

An official report of the Department of Bridges and Roads in France shows the continuance of the good results obtained in rendering roads free from dust by coating the surface with tar.

Silence Fell.

The little girl was taking a drive with her father behind the family horse, a spirited and high stepping bay.

How It Spreads.

The first package of Hem-Roid (the anti-billie pile cure) that was put out went to a small town in the State of Nebraska.

Hood's Sarsaparilla

Has won success far beyond the effect of advertising only.

The secret of its wonderful popularity is explained by its unapproachable merit. Based upon a prescription which cured people considered incurable, Hood's Sarsaparilla unites the best-known vegetable remedies, by such a combination, proportion and process as to have curative power peculiar to itself.

Its cures of scrofula, eczema, psoriasis, and every kind of humor, as well as catarrh and rheumatism—prove Hood's Sarsaparilla the best blood purifier ever produced. Its cures of dyspepsia, loss of appetite and that tired feeling make it the greatest stomach tonic and strength-restorer the world has ever known.

Hood's Sarsaparilla is a thoroughly good medicine. Begin to take it TODAY. Get HOOD'S.

STEPHEN OLIVER, LICENSED AUCTIONEER FOR THE COUNTY OF VICTORIA.

All sales promptly attended, charges moderate and satisfaction guaranteed. Residence—William-st. North, Lindsay—wt.

Chamberlain's Cough Remedy

ALWAYS CURES
And is Pleasant and Safe.

BAD DAYS FOR CHEESE.

Montreal Expert Talks of the Dairy Market—No Signs of Immediate Discovery.

The cheese and butter business was perhaps never in as bad shape as to-day, remarked Mr. W. A. Ritchie, commercial editor of the Montreal Gazette, while in London on Tuesday. Mr. Ritchie is at present on his annual trip through the cheese centres of the province, and spent Tuesday in London. "The market is away behind in every possible way. The season has opened away down in both price and make. In fact I may safely tell you that the spring make this year is hardly a quarter of last year's make during the early months. I attribute this first to the low prices, and second to the backward season."

"This is absolutely nothing to encourage farmers to make cheese at the present prices," continued Mr. Ritchie. The market is so slow that there is not a cent of profit in it either for the farmer, the cheese man or the exporter. Nor is there any immediate prospect of a recovery. There is a large accumulation of old cheese that will have to be worked out, while last year at this time there was hardly a single old cheese on the shelves. Times are bad in England, especially among the Lancashire exporters, and this is a source of concern to the consumer of Canadian cheese and who are at present working on half time.

Now's This

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all his business transactions, and financially able to carry out any obligations made by him. WALTERS, KIRKLAND & MARTIN, Wholesale Druggists, Toronto, Ont.

Saturday's Market

The attendance of sellers at Saturday's market was not up to expectations, but buyers were plentiful. The wet weather may be held responsible for the poor attendance of sellers. Eggs sold from 13c. to 14c. per doz.; butter, 17c.; chickens, 50c. each; hay, \$10 per ton.

How It Spreads.

The first package of Hem-Roid (the anti-billie pile cure) that was put out went to a small town in the State of Nebraska.

For the Farmer's Eye.

Oshawa Reformer. A wonderful difference could be made in the appearance of the country if each farmer would spend a day or two in the spring, clearing up the roadside along his farm. And this is improvement, too, which will pay for the labor. A farm which is neat and tidy in its approach, is worth more, and will sell for more, than a farm along the roadside of which there is rubbish, fallen limbs, stumps and clumps of weeds. Farmers should plant some trees along the roadside outside the fences. If the farmer in a district will make united efforts along these simple lines they can effect astonishing improvements in the few years. They should do it, too, as a matter of duty. The pioneers, their forefathers, have done the heavy work of clearing out homes for their successors, now in somewhat easier circumstances, should willingly take up the pleasant labor of beautifying the country.

BUSINESS CARDS
